TSAR BOMBA FYTB-8204Q

TSAR BOMBA TB8204Q Chronograph Quartz Watch User Manual

Model: FYTB-8204Q

Introduction

Thank you for choosing the TSAR BOMBA TB8204Q Chronograph Quartz Watch. This manual provides essential information for the proper setup, operation, and maintenance of your timepiece. Designed with a durable sapphire glass, 50-meter water resistance, and a precise Japan Quartz Movement (TMI VK67), this watch combines functionality with a distinctive tonneau design.

Watch Components

Image: Front view of the TSAR BOMBA TB8204Q watch, showcasing the dial, hands, and chronograph subdials.

- **Crown:** Used for setting time and date.
- **Pushers:** Operate the chronograph functions (start, stop, reset).
- **Dial:** Displays time, chronograph measurements, and date.
- **Hands:** Hour, minute, and chronograph second hands.
- **Subdials:** Measure elapsed time for the chronograph.
- **Date Window:** Displays the current date.
- **Strap:** Silicone strap for comfortable wear.

Setup and Operation

Setting the Time and Date

Your watch is equipped with a Japan Quartz Movement (TMI VK67) for accurate timekeeping. Follow these steps to set the time and date:

1. **Pull the Crown:** Gently pull the crown out to position 2 (for date setting) or position 3 (for time setting).
2. **Set the Date:** In position 2, rotate the crown to adjust the date. Avoid setting the date between 9 PM and 3 AM to prevent damage to the movement.
3. **Set the Time:** In position 3, rotate the crown to move the hour and minute hands. Ensure the AM/PM is correctly set by observing if the date changes when the hour hand passes midnight.
4. **Push the Crown Back:** Once the time and date are set, push the crown back into position 1 to engage the movement and start the watch.

Using the Chronograph Function

The chronograph allows you to measure elapsed time. The watch features a chronograph second hand and subdials for 1-hour, 12-hour, and 1-minute measurements.

1. **Start:** Press the top pusher to start the chronograph. The chronograph second hand will begin to move.
2. **Stop:** Press the top pusher again to stop the chronograph. The elapsed time will be displayed on the subdials and by the chronograph second hand.
3. **Reset:** After stopping, press the bottom pusher to reset the chronograph hands to their zero positions.

Luminous Features

The hands and markers of your watch are treated with A-grade luminous material, providing enhanced visibility in low-light conditions. Exposure to light will charge the luminous elements, allowing them to glow in the dark.

Water Resistance

Your TSAR BOMBA watch is designed with a water resistance rating of 50 meters (5 ATM). This means it is suitable for daily use and can withstand splashes, rain, and brief immersion in water. However, it is **not recommended for showering, bathing, swimming, or diving**. Always ensure the crown is fully pushed in before any contact with water.

Important Note: Do not operate the crown or pushers while the watch is wet or submerged, as this can compromise the water resistance.

Maintenance and Care

- **Cleaning:** Wipe the watch case and strap with a soft, dry cloth regularly to remove dirt and sweat. For silicone straps, a mild soap and water solution can be used, followed by thorough rinsing and drying.
- **Avoid Chemicals:** Do not expose the watch to harsh chemicals, solvents, or detergents, as these can damage the case, strap, or seals.
- **Temperature Extremes:** Avoid exposing the watch to extreme temperatures (hot or cold) or sudden temperature changes, which can affect the movement and seals.
- **Magnetic Fields:** Keep the watch away from strong magnetic fields, as they can interfere with the quartz movement's accuracy.
- **Battery Replacement:** The watch uses 1 LR44 battery (included). When the battery runs low, the watch may lose accuracy or stop. It is recommended to have the battery replaced by a qualified watch technician to ensure proper sealing and water resistance.

Specifications

Feature	Detail
Brand	TSAR BOMBA
Model Number	FYTB-8204Q
Movement	Japan Quartz Movement (TMI VK67)
Case Material	316L Stainless Steel
Case Diameter	50.5mm
Case Thickness	15.5mm
Band Material	Silicone
Band Width	22mm
Wearable Circumference	210mm
Water Resistance Depth	50 Meters (5 ATM)
Special Features	Luminous, Chronograph, Calendar
Batteries	1 LR44 battery (included)

Troubleshooting

If you encounter any issues with your watch, please refer to the following common solutions:

- **Watch Not Running:** Check if the crown is fully pushed in. If the watch still does not run, the battery may need replacement.
- **Incorrect Time/Date:** Follow the "Setting the Time and Date" instructions carefully. Ensure the crown is fully pushed in after setting.
- **Chronograph Not Resetting to Zero:** This may require a chronograph reset procedure specific to the TMI VK67 movement. Consult a professional watch technician if the issue persists after following the basic reset steps.
- **Condensation Inside Crystal:** If condensation appears under the sapphire glass, it may indicate a breach in the water resistance. Avoid further water exposure and seek professional service immediately.
