Beghelli Dom-e Wireless Wi-Fi/GSM Alarm System User Manual

Model: 60103

1. INTRODUCTION

The Beghelli Dom-e Wireless Wi-Fi/GSM Alarm System is a comprehensive security solution designed to protect your home or office. This kit includes a central control unit, various sensors, and remote controls, offering versatile management options through a dedicated app, remote control, magnetic key, or keypad. It also integrates with voice assistants like Alexa and Google Home for enhanced convenience. The system features a built-in battery for continued operation during power outages and supports both Wi-Fi and GSM connectivity for reliable alerts.

2. WHAT'S IN THE BOX

The Beghelli Dom-e Wireless Wi-Fi/GSM Alarm System includes the following components:

- 1 Control Unit with internal siren (code 60035)
- 1 Volumetric Sensor (PIR Motion Sensor) (code 60031)
- 1 Opening Sensor (Door/Window Sensor) (code 60030)
- 2 Remote Controls (code 60032)
- 2 RFID Magnetic Keys (code 60033)

3. PRODUCT OVERVIEW

Familiarize yourself with the main components of your Beghelli Dom-e alarm system:

Main Control Panel: The central unit of the alarm system, featuring a keypad, display, SOS button, and internal siren. It manages all connected sensors and communicates alerts.

Door/Window Sensor: A two-part magnetic sensor designed to detect the opening of doors or windows. When separated, it triggers an alarm.

PIR Motion Sensor: A volumetric sensor that detects movement within its detection area. Ideal for securing rooms or hallways.

Remote Control: A portable device for convenient arming, disarming, and activating the SOS function of the alarm system.

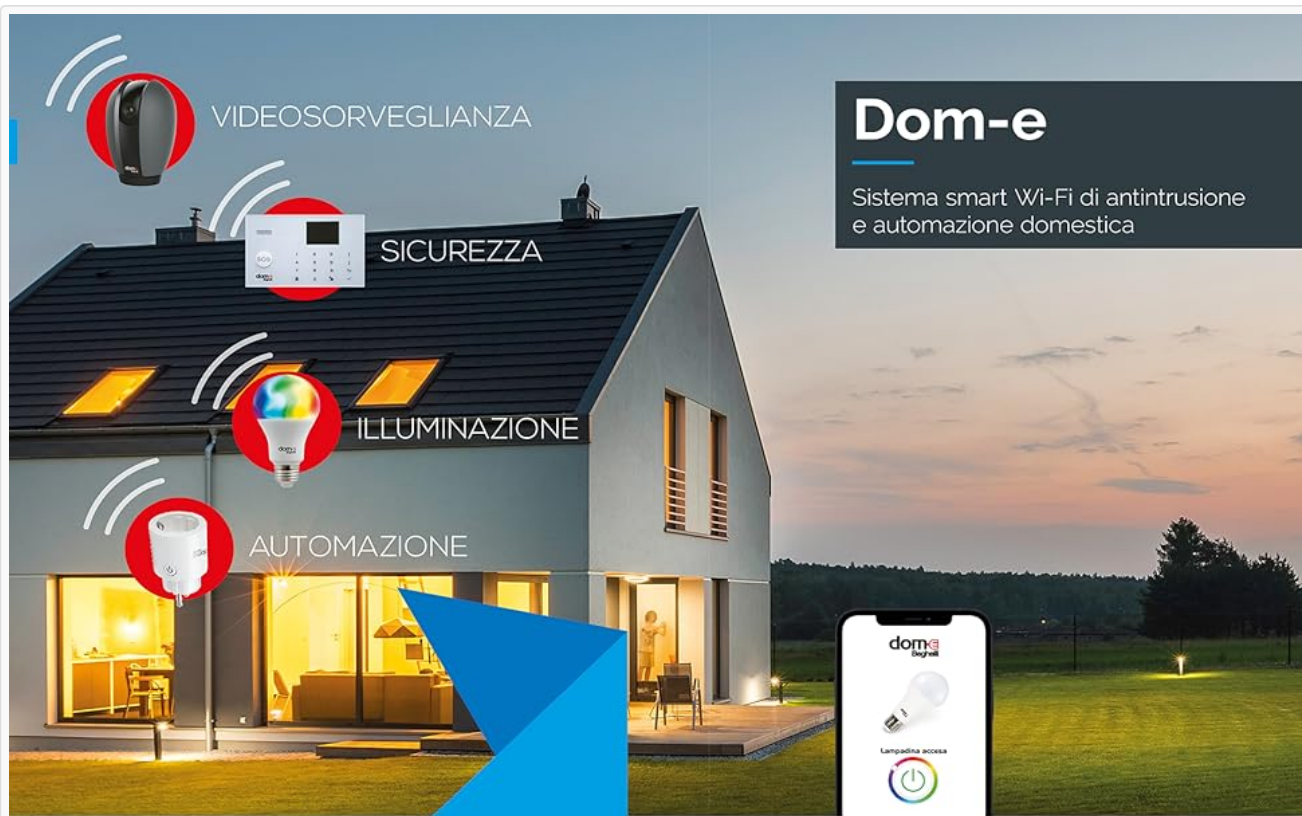

RFID Magnetic Keys: Used to quickly arm or disarm the system by swiping them near the control panel's reader.

4. SETUP

Follow these steps to set up your Beghelli Dom-e alarm system:

1. **Power On the Control Unit:** Connect the main control unit to a power outlet. The internal battery will provide backup power in case of an outage.
2. **Download the Dom-e App:** Search for the "Dom-e Beghelli" app on the Apple App Store (for iOS 8.0 or later) or Google Play Store (for Android 4.2 or later).
3. **Connect to Wi-Fi:** Open the app and follow the on-screen instructions to connect your control unit to your home Wi-Fi network. Ensure your Wi-Fi network is 2.4 GHz, as the system is compatible with IEEE802.11 b/g/n - 2.4 GHz standards. Some routers may require specific configuration to enable 2.4 GHz or separate it from 5 GHz.
4. **Insert GSM SIM Card (Optional):** If you wish to receive SMS alerts or emergency calls without Wi-Fi, insert a compatible GSM SIM card into the designated slot on the control unit.
5. **Pair Accessories:** The sensors, remote controls, and RFID keys included in the kit are typically pre-paired. If not, refer to the app or control unit menu for instructions on how to add new devices. The system supports up to 100 sensors/remotes/sirens.
6. **Placement of Sensors:** Install door/window sensors on entry points and motion sensors in areas requiring surveillance. Ensure sensors are placed within wireless range of the control unit.

App Setup Flow: Visual representation of the three main steps for initial setup: 1. Download the App, 2. Connect the Central Unit, 3. Connect and Program.

5. OPERATING INSTRUCTIONS

The Beghelli Dom-e system offers multiple ways to control its functions:

- **Arming the System:**

- **Via App:** Open the Dom-e app and select the 'Arm' option.
- **Via Remote Control:** Press the 'Lock' button on the remote control.
- **Via Keypad:** Enter your security code and press the 'Arm' button on the control panel.
- **Via RFID Key:** Swipe the magnetic key near the designated area on the control panel.

- **Disarming the System:**

- **Via App:** Open the Dom-e app and select the 'Disarm' option.
- **Via Remote Control:** Press the 'Unlock' button on the remote control.
- **Via Keypad:** Enter your security code and press the 'Disarm' button on the control panel.
- **Via RFID Key:** Swipe the magnetic key near the designated area on the control panel.

- **SOS Function:** Press the 'SOS' button on the control panel or remote control to immediately trigger an emergency alarm and send alerts to pre-configured contacts.
- **Environmental Listening:** The control unit features an environmental microphone, allowing you to listen to the surroundings of the alarm system via the app.
- **Two-Zone Management:** The system supports managing two distinct security zones, allowing for partial arming (e.g., arming perimeter sensors while allowing movement indoors). Configure zones via the app.
- **Notifications:** Receive real-time alerts via push notifications through the app. If a GSM SIM card is installed, you will also receive SMS messages or emergency calls during an alarm event or power outage.

6. APP CONTROL AND SMART HOME INTEGRATION

The Dom-e app provides comprehensive control and customization options for your alarm system:

- **Remote Control:** Arm, disarm, and monitor your system from anywhere.
- **Device Management:** Add, remove, and configure sensors, remote controls, and other compatible Dom-e devices.
- **Event Log:** Review a history of all system events, including arming/disarming, alarms, and sensor activations.
- **Customization:** Set up schedules, adjust sensor sensitivity, and personalize notification preferences.
- **Smart Home Integration:** The Beghelli Dom-e system is compatible with Amazon Alexa and Google Home. Link your Dom-e account to these voice assistants to control your alarm system using voice commands.
- **Expandability:** The system is expandable, supporting up to 100 wireless sensors, remote controls, and sirens to adapt to your specific security needs.

Funziona con Apple iPhone iOS 8.0 o successivi / Android 4.2 o successivi

Controllo vocale
Se associati ad uno smartphone compatibile i dispositivi possono essere controllati dagli assistenti vocali

Wi-Fi
IEEE802.1 b/g/n - 2.4 GHz

 Registrazione in cloud (opzionale in abbonamento)

Si installa e si configura facilmente in pochi minuti!

- 
1
Scarica l'App dallo store
- 
2
Collega i dispositivi alla rete elettrica e alla Wi-fi
- 
3
Connetti e programma

Il sistema Dom-e non ha limiti di configurazione e in ogni momento possono essere aggiunti dispositivi in base alle necessità.

Dom-e System Overview: Illustrates the integration of security, video surveillance, illumination, and automation features, all controllable via the Dom-e app on a smartphone.

7. MAINTENANCE

Regular maintenance ensures the optimal performance of your alarm system:

- **Battery Replacement:** The control unit includes 4 Lithium-Ion batteries. Sensors and remote controls are also battery-powered. Replace batteries as indicated by low battery warnings on the control unit or app. Refer to individual device manuals for specific battery types and replacement procedures.
- **Cleaning:** Gently clean the control unit and sensors with a soft, dry cloth. Avoid using abrasive cleaners or solvents.
- **Firmware Updates:** Periodically check the Dom-e app for available firmware updates for your control unit to ensure you have the latest features and security enhancements.

8. TROUBLESHOOTING

If you encounter issues with your Beghelli Dom-e alarm system, consider the following:

Issue	Possible Cause / Solution
Difficulty with initial Wi-Fi setup	Ensure your router is broadcasting a 2.4 GHz Wi-Fi signal. The system is not compatible with 5 GHz networks. You may need to configure your router to separate 2.4 GHz and 5 GHz bands or temporarily disable 5 GHz during setup.
Accidental arming/disarming via remote	Remote control buttons can be sensitive. Handle with care. Consider using the app, keypad, or RFID key for daily arming/disarming to prevent unintended actions.
No notifications during power outage	The control unit's internal battery provides backup power, but Wi-Fi connectivity will be lost if your router loses power. For notifications during power outages, ensure a working GSM SIM card is installed in the control unit. Alternatively, consider a UPS (Uninterruptible Power Supply) for your router.
Sensors not responding	Check sensor batteries. Ensure sensors are within wireless range of the control unit. Re-pair the sensor if necessary via the app.
Keypad lock/display settings not intuitive	Explore the control unit's menu and the Dom-e app's settings thoroughly. Advanced configuration options for keypad lock, display timeout, and other features are available within these interfaces.
Voice assistant integration issues	Ensure your Dom-e account is correctly linked to your Alexa or Google Home account. Check network connectivity for both the alarm system and your smart speaker/device.

9. SPECIFICATIONS

- **Model Number:** 60103
- **Power Source:** Battery (4 Lithium-Ion batteries included for control unit)
- **Product Dimensions:** 15 x 10 x 2 cm (Control Unit)
- **Product Weight:** 590 grams
- **Wireless Connectivity:** Wi-Fi (IEEE802.1 b/g/n - 2.4 GHz), GSM
- **Compatible Devices:** Smartphones (iOS 8.0+, Android 4.2+), Amazon Alexa, Google Home
- **Expandability:** Up to 100 sensors/remote controls/sirens
- **Color:** White
- **Manufacturer:** Beghelli
- **Country of Origin:** Italy

10. WARRANTY AND SUPPORT

Warranty: For information regarding product warranty, please refer to the documentation provided with your purchase or visit the official Beghelli website.

Returns: If you wish to return a product within 30 days of receipt because you have changed your mind, please consult the Amazon return policy page. For defective or damaged products, refer to the Amazon help page on

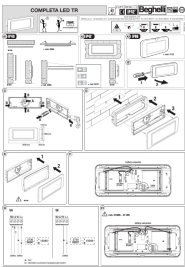

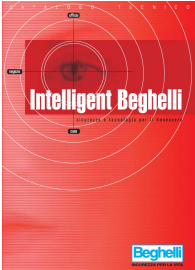

returns. Specific information for Marketplace purchases is also available on Amazon's help pages.

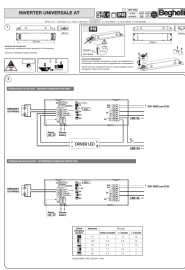

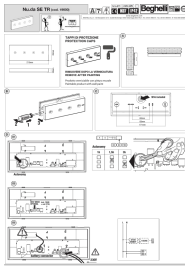

Manufacturer Support: For further assistance, technical support, or to explore additional Beghelli Dom-e products, please visit the [Beghelli Store on Amazon](#) or their official website.
