

GOOLOO GE1200

GOOLOO Jump Starter User Manual

MODEL: GE1200

BRAND: GOOLOO

Introduction

The GOOLOO GE1200 Jump Starter is a versatile and powerful device designed to provide emergency jump-starting for 12V vehicles, act as a portable power bank for electronic devices, and serve as an emergency LED light. With a 3000A peak current, it can jump start vehicles with up to 8.5L gas or 6.0L diesel engines. Its compact and lightweight design makes it an essential tool for any vehicle owner.

What's Included

- GOOLOO Portable Car Battery Jump Starter Pack
- Smart Jumper Clamp
- USB to Type-C Quick-Charge Cable
- Carrying Case
- User Manual

Product Features

Emergency Life Saver

The GOOLOO portable car battery jump starter power pack features a 3000A peak current, enabling it to easily jump start 12V vehicles with engines up to 8.5L gas or 6.0L diesel. It also includes a "Boost" feature to revive completely dead vehicle batteries. Once fully charged, it can maintain its charge for up to 24 months.

Power Bank Charger

The GOOLOO portable car battery jump starter box can charge various devices via its USB output ports (5V 2.1A, 5V 2.4A/9V 2A) or a 15V 10A output using the included cigarette lighter socket. The Quick-Charge 3.0 USB port ensures faster charging for compatible devices like cell phones, tablets, Kindles, or digital cameras.

Lightweight and Sleek Design

Weighing just 1.19 pounds and measuring 6.18x2.95x1.42 inches, the GOOLOO portable car jumper starter is highly portable. It can be easily held in hand, stored in a pocket, or placed conveniently anywhere in the car.

WHAT YOU GET

Figure 7: Compact size and weight for easy portability.

Setup

Before first use, ensure the GOOLOO Jump Starter is fully charged. It takes approximately 3-4 hours to fully charge using either the wall charger (not included) or the car charger (not included) via the USB to Type-C Quick-Charge Cable.

24-MONTH STAND-BY

Enjoy emergency power for up to 24 months. It's always ready when you need it.

Operating Instructions

Jump Starting a Vehicle

1. Insert the smart jumper clamp cable into the jump starter unit.
2. Connect the red (+) clamp to the positive terminal of the vehicle battery and the black (-) clamp to the negative terminal.
3. Check the indicator light on the smart clamp. A solid green light indicates a correct connection and readiness to jump start. If the light is red or blinking, check connections or refer to troubleshooting.
4. If the battery is completely dead and the green light is blinking, press the "Boost" button on the smart clamp until the green light becomes solid.
5. Start your vehicle.
6. Once the vehicle starts, immediately remove the smart jumper clamps from the battery terminals, then disconnect them from the jump starter unit.

Using as a Power Bank

Connect your electronic devices (e.g., smartphone, tablet) to the USB output ports on the side of the jump starter using their respective charging cables. The Quick-Charge 3.0 port (blue USB port) will charge compatible devices faster.

SIZE AND WEIGHT

1.2 pounds (540g)

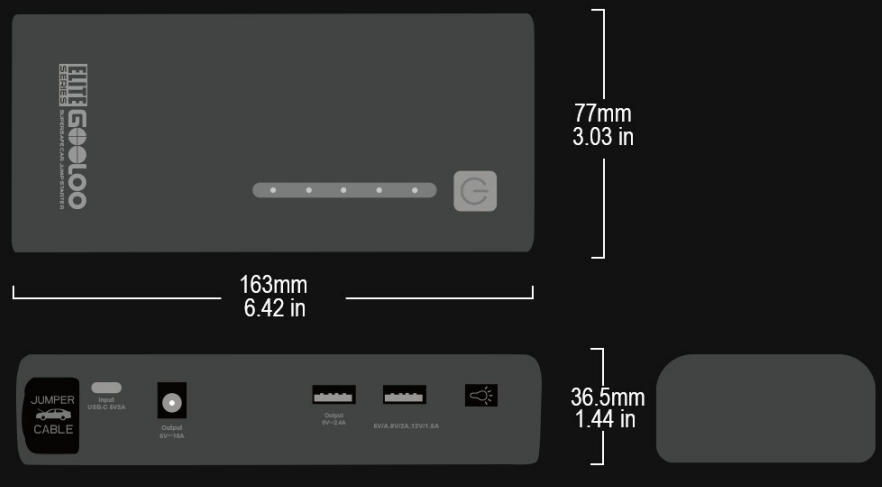

Figure 11: The jump starter can be used as a portable power bank.

Using the LED Work Light

Press and hold the power button on the jump starter for a few seconds to turn on the LED light. Subsequent short presses will cycle through the modes: Flash Light, Strobe Light, and SOS Light. Press and hold again to turn off the light.

Maintenance

- Recharge the jump starter every 3 months to ensure optimal performance and battery longevity, even if not in use.
- Store the unit in a cool, dry place within its operating temperature range (-4°F to 140°F).
- Keep the unit and accessories clean and free from dust and moisture.

Troubleshooting

- **Smart Clamp Indicator Light:** If the indicator light on the smart clamp is red or blinking during connection, it may indicate incorrect polarity (reversed clamps) or insufficient battery voltage. Recheck connections or use the "Boost" feature if the battery is completely dead.
- **Unit Not Powering On:** Ensure the unit is sufficiently charged. If the battery level indicators do not light up, charge the unit for at least 3-4 hours.
- **Vehicle Not Starting:** After connecting and ensuring the green light is solid, if the vehicle does not start, wait 30 seconds before attempting to restart. Ensure all vehicle accessories are turned off.

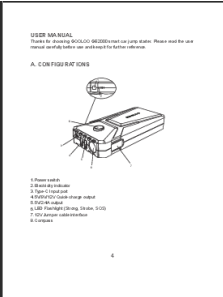

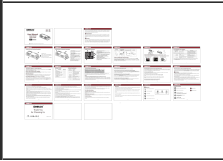

Specifications

Attribute	Value
Brand	GOOLOO
Product Dimensions	2.95"D x 6.18"W x 1.42"H
Item Weight	1.19 Pounds
Amperage	3000 Amps (Peak)
Model Number	GE1200
Battery Type	Lithium Polymer
Operating Temperature	-4°F to 140°F

Warranty and Support

The GOOLOO Jump Starter comes with an 18-month warranty. Additionally, GOOLOO offers a 30-day unconditional return guarantee and lifetime customer and technical support. For any inquiries or assistance, please refer to the contact information provided in your user manual or visit the official GOOLOO website.
