Bloody A70x

Bloody A70x Optical Gaming Mouse Instruction Manual

Brand: Bloody | Model: A70x

INTRODUCTION

This manual provides detailed instructions for the setup, operation, maintenance, and troubleshooting of your Bloody A70x Optical Gaming Mouse. Please read this guide thoroughly to ensure optimal performance and longevity of your device.

KEY FEATURES

- Precision Gaming:** The Bloody A70x Gaming Mouse offers exceptional precision and accuracy for gaming, with an 8000CPI optical sensor and 1000Hz polling rate.
- Customizable RGB Lighting:** The A70x features customizable RGB lighting, allowing you to create a unique and personalized gaming setup.
- Comfortable Design:** The A70x is designed with ergonomic considerations, featuring a comfortable grip and non-slip side panels for extended gaming sessions.
- Programmable Buttons:** The A70x has eight programmable buttons, allowing you to customize the mouse to your specific gaming needs and preferences.
- Durable Build:** The A70x is built to last, with a high-quality matte black finish and durable construction that can withstand intense gaming sessions.

SETUP

- Connect the Mouse:** Plug the USB connector of the Bloody A70x mouse into an available USB port on your computer.
- Driver Installation:** Your operating system should automatically detect and install the necessary drivers. If not, please visit the official Bloody website to download the latest drivers and software for the A70x model.
- Software Installation (Optional but Recommended):** For full customization of RGB lighting, programmable buttons, and advanced macros, install the Bloody software from the official website.

OPERATING INSTRUCTIONS

Basic Usage

The Bloody A70x functions as a standard optical mouse upon connection. Move the mouse to control the cursor on your screen. Use the left and right click buttons for primary interactions.

DPI Adjustment

The mouse features an 8000CPI optical sensor. DPI (Dots Per Inch) can be adjusted to change cursor sensitivity. Use the dedicated DPI buttons (usually located near the scroll wheel) to cycle through preset DPI levels. The Bloody software allows for custom DPI settings.

Programmable Buttons & Macros

The A70x is equipped with eight programmable buttons. Utilize the Bloody software to assign custom functions, macros, or key combinations to these buttons. This allows for personalized control tailored to your gaming style or workflow.

RGB Lighting Customization

Personalize your gaming setup with the mouse's customizable RGB lighting. The Bloody software provides options to select various lighting effects, colors, and brightness levels.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the mouse surface. For optical sensor, use a cotton swab lightly dampened with rubbing alcohol. Ensure the mouse is disconnected before cleaning.
- **Storage:** Store the mouse in a cool, dry place away from direct sunlight and extreme temperatures.
- **Cable Care:** Avoid sharp bends or excessive pulling on the braided cable to prevent damage.

TROUBLESHOOTING

- **Mouse Not Responding:**
 - Ensure the USB cable is securely plugged into the computer.
 - Try plugging the mouse into a different USB port.
 - Restart your computer.
 - Check if the mouse drivers are properly installed.
- **Inconsistent Tracking:**
 - Clean the optical sensor on the bottom of the mouse.
 - Use the mouse on a clean, uniform surface or a high-quality mouse pad.
 - Adjust DPI settings using the mouse buttons or software.
- **RGB Lighting Not Working:**
 - Ensure the Bloody software is installed and running.

- Check lighting settings within the software.
- Update mouse firmware if available.
