### 3. Operating Your Headphones

The DT 900 PRO X headphones are designed for optimal performance across various applications, including audio monitoring, gaming, home audio, recording, and studio work. Their open-back design provides a natural soundstage, ideal for critical listening.

#### 3.1 Wearing the Headphones

Adjust the headband to comfortably fit your head. The circumaural (around-ear) design with velour ear cups ensures maximum comfort, even during prolonged use. The lightweight construction (0.76 lb / 345 g without cable) minimizes fatigue.

#### 3.2 Audio Experience

These headphones are suitable for a wide range of compatible devices including computers, gaming consoles, home audio systems, and music production equipment. The 48 Ohm impedance allows for consistent performance without requiring a dedicated headphone amplifier for most modern devices, though a high-

quality amplifier can further enhance the experience for audiophiles.
