- **Wi-Fi Connectivity Issues:** Ensure Wi-Fi is enabled in Settings. Try restarting your Wi-Fi router. Forget the network and reconnect.
- **App Crashing:** Close the app from the App Switcher (swipe up from the bottom of the screen and swipe the app card up). Reopen the app. If the issue persists, try deleting and reinstalling the app.
- **Battery Draining Quickly:** Review battery usage in Settings > Battery to identify apps consuming significant power. Adjust settings or limit background activity for those apps.
- **Software Glitches:** Ensure your iPadOS is up to date. A factory reset (Settings > General > Transfer or Reset iPad > Erase All Content and Settings) can resolve persistent software issues, but back up your data first.
