Troubleshooting

Common Issues and Solutions

- **Drawers do not slide smoothly or come loose:** Over time, drawers may experience friction or become slightly misaligned. Ensure all assembly screws for the drawers are tightened. If sliding issues persist, consider applying felt pads or a small amount of furniture wax to the drawer runners to improve smoothness.

- **Cabinet wobbles:** Check that the adjustable feet are properly leveled. Rotate each foot individually until the cabinet stands firmly on the floor without wobbling. Ensure the anti-tipping device is securely fastened to the wall.
- **Missing parts:** If any parts are missing upon unboxing, please refer to the contact information in the Support section for assistance.
