5. INSTALLATION INSTRUCTIONS

This section provides a general guide for installation. A detailed installation video is also available for visual assistance. Proper installation depth of the rough-in valve is crucial for correct operation and appearance.

5.1. Rough-in Valve Installation

The solid brass rough-in valve is the core of your faucet system. Ensure it is securely installed within the wall according to the specified depth.

Video 1: Step-by-step guide on how to install the SUMERAIN wall mount tub filler faucet rough-in valve (Model S2129XW, similar to S2129BGW).

1. **Prepare the Wall:** Ensure the wall opening is correctly sized for the rough-in valve.
2. **Connect Water Lines:** Connect the hot and cold water supply lines to the designated inlets on the rough-in valve. Use appropriate thread sealant.
3. **Secure the Valve:** Mount the rough-in valve securely to the wall studs or blocking.
4. **Test for Leaks:** Before closing the wall, turn on the water supply and check all connections for leaks.

6. OPERATING INSTRUCTIONS

Your SUMERAIN faucet is designed for ease of use with separate controls for water temperature and flow, and a diverter for the handheld shower.

- **Water Flow:** Turn the main handle to control the water flow from the waterfall spout.
- **Temperature Control:** Adjust the hot and cold handles to achieve your desired water temperature.
- **Diverter:** Use the diverter knob to switch water flow between the waterfall tub spout and the handheld shower.
- **Handheld Shower:** The handheld shower provides a focused spray for rinsing or cleaning.

7. MAINTENANCE AND CLEANING

To maintain the brushed gold finish and ensure optimal performance of your SUMERAIN faucet, follow these cleaning guidelines:

- **Regular Cleaning:** Clean the faucet regularly with a soft cloth and mild soap or a non-abrasive cleaner specifically designed for brushed finishes.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, ammonia, bleach, or other harsh chemicals, as these can damage the finish.
- **Rinse and Dry:** After cleaning, rinse thoroughly with clean water and dry with a soft cloth to prevent water spots and mineral buildup.
- **Ceramic Disc Cartridge:** The ceramic disc cartridge is designed for long-lasting, drip-free performance. If issues arise, consult the troubleshooting section or contact support.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Low Water Flow	Clogged aerator or debris in water lines.	Clean the aerator. Check water supply valves for full opening.
Leaks from Spout/Handles	Loose connections or worn cartridge.	Check and tighten all connections. If leak persists, the ceramic cartridge may need replacement.
Water Temperature Issues	Incorrect hot/cold supply connections or water heater settings.	Verify hot and cold connections. Adjust water heater temperature.
Diverter Not Switching	Debris in diverter mechanism or worn diverter.	Clean or replace the diverter.

9. WARRANTY INFORMATION

SUMERAIN provides a **5-year quality warranty for the ceramic disc cartridge**. For any service requests or warranty claims, please contact SUMERAIN customer service. We commit to responding to customer service requests within 24 hours by phone or email. If the rough-in valve is installed at an improper depth, customized parts may be provided to reduce customer losses. Please refer to the detailed user manual for installation depth requirements.
