Naroot Fly Fishing Stomach Pump User Manual

Model: Cuque5obv8762wz1721

1. INTRODUCTION

This manual provides instructions for the proper use and maintenance of your Naroot Fly Fishing Stomach Pump. Designed for fly fishing enthusiasts, this tool allows for the examination of a fish's stomach contents without causing harm, aiding in fly selection and understanding fish feeding habits. Please read these instructions carefully before use.

Made of high-quality plastic,
lightweight and durable

2. PRODUCT FEATURES

- **Material:** Constructed from high-quality silicone and plastic for durability and lightweight design.
- **Gentle Operation:** Designed to extract stomach contents without harming the fish.
- **Portable:** Compact and easy to carry for on-the-go fishing.
- **Manual Operation:** Simple and reliable manual pump mechanism.

3. SETUP INSTRUCTIONS

The Naroote Fly Fishing Stomach Pump comes in two main parts: the pump bulb with the main tube and a separate extension tube. Assembly is straightforward:

1. Ensure both the pump unit and the extension tube are clean before first use.
2. If desired, gently insert the narrower end of the extension tube into the open end of the main pump tube. It should fit snugly.
3. The pump can be used with or without the extension tube, depending on the size of the fish and the desired reach.

Figure 3: Main pump unit and separate extension tube.

4. OPERATING INSTRUCTIONS

Follow these steps to safely and effectively use the stomach pump:

1. **Prepare the Fish:** Gently hold the fish, ensuring it is calm and secure. Minimize stress to the fish.
2. **Lubricate the Tube:** Dip the end of the pump tube (with or without extension) into water to lubricate it. This makes insertion smoother and safer for the fish.
3. **Insert the Tube:** Carefully and slowly insert the lubricated tube into the fish's mouth and down into its stomach. Do not force the tube. The depth of insertion will depend on the fish's size.
4. **Operate the Pump:** Once the tube is in place, gently squeeze and release the silicone bulb several times. This action creates suction, drawing stomach contents into the tube.
5. **Extract Contents:** Slowly withdraw the tube from the fish's mouth. The stomach contents will be visible within the clear tube.
6. **Release the Fish:** Immediately and gently release the fish back into the water.

7. **Examine Contents:** Observe the contents in the tube to identify what the fish has been feeding on.

5. MAINTENANCE

Proper maintenance ensures the longevity and hygiene of your stomach pump:

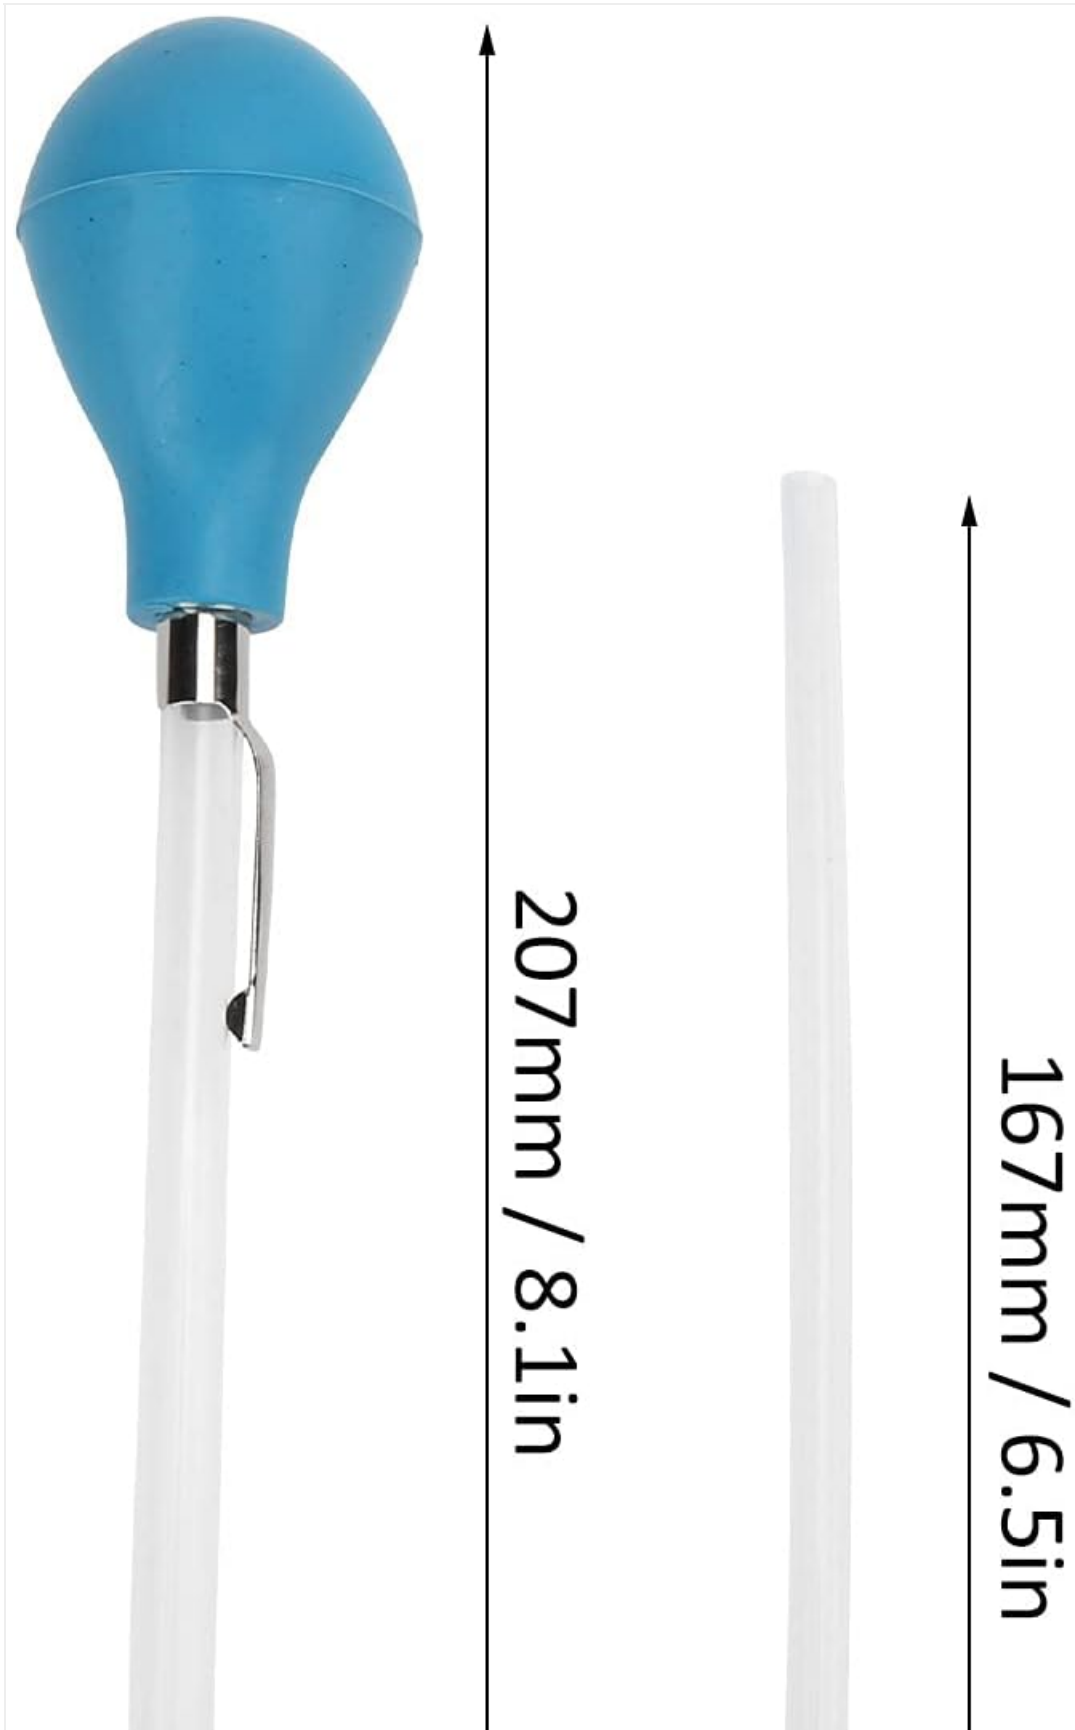

- **Cleaning:** After each use, thoroughly rinse the pump and tube with clean water. Use a mild soap if necessary, ensuring all soap residue is removed.
- **Drying:** Allow all components to air dry completely before storage to prevent mold or mildew.
- **Storage:** Store the pump in a clean, dry place, away from direct sunlight and extreme temperatures.
- **Inspection:** Periodically inspect the silicone bulb and plastic tube for any signs of wear, cracks, or damage. Replace if necessary.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
No contents extracted	Tube not deep enough; insufficient suction; fish stomach empty.	Gently re-insert tube deeper; ensure bulb is fully squeezed and released; try on another fish.
Difficulty inserting tube	Tube not lubricated; fish resisting.	Ensure tube is well-lubricated with water; handle fish more gently to reduce stress.
Tube appears damaged	Wear and tear; improper storage.	Discontinue use and replace the damaged component or entire pump.

7. SPECIFICATIONS

- **Brand:** Narrote
- **Model Number:** Cuque5obv8762wz1721
- **Material:** Plastic, Silicone
- **Power Source:** Manual
- **Item Weight:** 0.03 Kilograms
- **Main Unit Length:** Approximately 207mm (8.1 inches)
- **Extension Tube Length:** Approximately 167mm (6.5 inches)
