EARTEC PSMOIL

Eartec PSMOIL Proline Single Headset with 2-Pin Plug Inline PTT Instruction Manual

Model: PSMOIL

INTRODUCTION

This manual provides detailed instructions for the proper setup, operation, and maintenance of your Eartec PSMOIL Proline Single Headset. Please read this manual thoroughly before using the product to ensure optimal performance and longevity.

PRODUCT OVERVIEW

The Eartec PSMOIL Proline Single Headset is designed for clear communication, featuring a comfortable single-ear design, a flexible microphone, and an inline Push-to-Talk (PTT) button. It connects via a 2-pin plug, compatible with various communication devices.

PACKAGE CONTENTS

Verify that all items are present in the package:

- Eartec PSMOIL Proline Single Headset
- User Manual (this document)

SETUP

1. **Connect the Headset:** Locate the 2-pin port on your compatible communication device. Align the 2-pin plug of the headset with the port and gently insert it until it clicks into place. Ensure a secure connection to prevent audio interruptions.
2. **Position the Headset:** Place the earpiece comfortably over one ear. Adjust the headband for a snug fit.

3. **Adjust the Microphone:** Position the microphone boom approximately 1-2 inches (2.5-5 cm) from your mouth. Ensure the microphone is not directly in front of your mouth to avoid breath noises, but close enough for clear voice pickup. The boom is flexible and can be adjusted.

OPERATING INSTRUCTIONS

Push-to-Talk (PTT) Functionality

The PSMOIL headset features an inline Push-to-Talk (PTT) button for transmitting your voice.

- **To Transmit:** Press and hold the PTT button located on the inline module. Speak clearly into the microphone.
- **To Receive:** Release the PTT button to listen for incoming transmissions.

Volume Control

Volume adjustments are typically managed directly on your connected communication device. Refer to your device's manual for specific volume control instructions.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe down the headset and cable. For stubborn dirt, a slightly damp cloth with mild soap can be used, but ensure no moisture enters the earpiece or microphone. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** When not in use, store the headset in a clean, dry place, away from extreme temperatures and direct sunlight. Avoid tangling the cable.
- **Cable Care:** Do not pull on the cable to disconnect the headset. Always grasp the plug firmly. Avoid sharp bends or kinks in the cable, as this can damage internal wiring.

TROUBLESHOOTING

| Problem | Possible Cause | Solution |
|-----------------------------|---|---|
| No audio from headset | Headset not fully plugged in. Device volume too low or muted. Incorrect device settings. Damaged cable or connector. | Ensure the 2-pin plug is securely connected. Increase volume on your communication device. Check device mute settings. Verify audio output settings on your device. Inspect cable and connector for visible damage. If damaged, contact support. |
| Microphone not transmitting | PTT button not pressed. Microphone positioned incorrectly. Device microphone settings. Damaged microphone. | Press and hold the PTT button firmly while speaking. Adjust microphone to be 1-2 inches from your mouth. Check microphone input settings on your communication device. If microphone is visibly damaged or still not working, contact support. |
| Intermittent audio | Loose connection. Damaged cable. | Ensure the 2-pin plug is fully inserted and secure. Inspect the cable for any cuts, kinks, or fraying. |

SPECIFICATIONS

- **Model:** PSMOIL
- **Type:** Single-ear headset
- **Connector:** 2-Pin Plug
- **Feature:** Inline Push-to-Talk (PTT)
- **Compatibility:** Designed for compatible communication devices (refer to your device's manual for 2-pin accessory compatibility).
