WHAT'S IN THE BOX

Upon unboxing your Fujifilm Instax Link Wide Printer, ensure all the following components are present:

- Instax Link Wide Printer Unit
- USB Charging Cable
- Printer Stand
- Wrist Strap
- User Manual (this document)

SETUP

1. Charging the Printer

Before initial use, fully charge the printer using the provided USB charging cable. Connect the small end of the USB cable to the charging port on the printer and the larger end to a USB power adapter (not included) or a computer's USB port. The charging indicator light will show the charging status.

2. Loading Instax Wide Film

To load film, open the film compartment cover on the back of the printer. Align the yellow mark on the film pack with the yellow mark inside the printer, then gently insert the film pack. Close the cover firmly until it clicks. The dark slide will

automatically eject. Do not open the film compartment cover until all 10 photos have been printed, as this will expose the film and render it unusable.

3. Installing the Instax Link Wide App

Download the free "Instax Link Wide" app from your smartphone's app store (available for iOS and Android). Ensure your smartphone's Bluetooth is enabled.

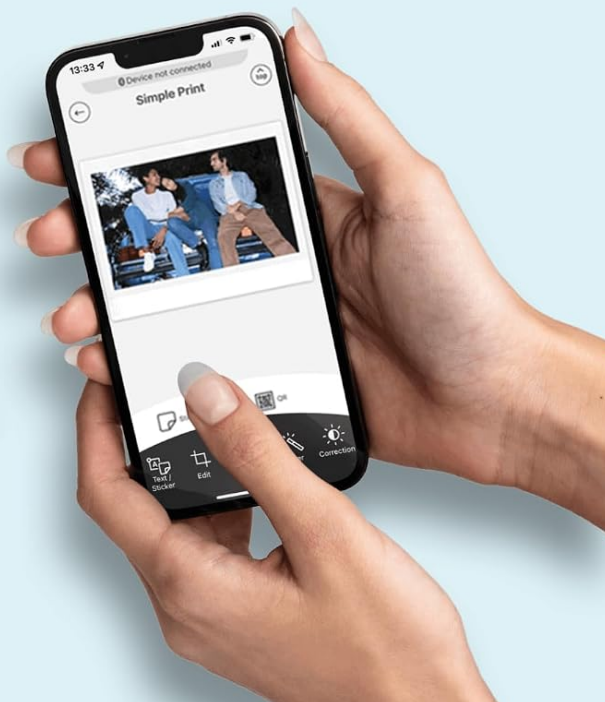

4. Connecting to Your Smartphone

Turn on the Instax Link Wide printer. Open the Instax Link Wide app on your smartphone. The app will guide you through the Bluetooth pairing process. Once connected, the printer's LED indicator will show a steady blue light.

MAINTENANCE

- Keep the printer clean by wiping it with a soft, dry cloth.
- Avoid exposing the printer to extreme temperatures, direct sunlight, or high humidity.

- Store film packs in a cool, dry place.
- Charge the battery regularly, even if not in frequent use, to maintain battery health.

TROUBLESHOOTING

Printer Not Turning On

- Ensure the battery is charged. Connect the printer to a power source and allow it to charge for at least 30 minutes before attempting to turn it on.

Cannot Connect via Bluetooth

- Make sure Bluetooth is enabled on your smartphone.
- Ensure the printer is within range (typically 10 meters or 33 feet).
- Restart both your smartphone and the printer.
- If previously paired, try unpairing and re-pairing the device in your smartphone's Bluetooth settings.

Film Not Ejecting or Poor Print Quality

- Check if the film pack is correctly loaded and not expired.
- Ensure there is enough film remaining in the pack.
- Do not open the film compartment cover once film is loaded until all exposures are used.
- Avoid shaking or bending the film after it ejects, as this can affect development.
