5. Maintenance

- **Cleaning:** Use a soft, dry cloth to gently wipe down the figure. Avoid abrasive cleaners or solvents, as these may damage the paint or plastic.
- **Storage:** Store the figure in a cool, dry place away from direct sunlight and extreme temperatures to prevent discoloration or warping. Keeping the original packaging can help protect the figure.
- **Joint Care:** If joints become stiff, gently work them back and forth. Avoid excessive force.

6. Troubleshooting

Problem	Solution
Figure parts are stiff during transformation.	Apply gentle, consistent pressure. Do not force parts. If very stiff, try warming slightly with hands (not heat sources).
Accessories do not attach securely.	Ensure correct orientation and alignment with attachment ports. Check for any debris in the ports.
Figure does not stand stably in robot mode.	Adjust leg and foot articulation to find a stable center of gravity. Ensure all transformation tabs are fully engaged.
