2. SETUP INSTRUCTIONS

2.1 Assembling the Device

1. Unpack all components from the box.
2. Attach the phone clip to the top of the tracking base. Ensure it is securely fastened.
3. Slide the two removable light boards onto the sides of the phone clip until they click into place.

Easy to Found the Perfect Shooting Angle

Image 2.1: The phone holder allows for 360-degree horizontal rotation and 180-degree vertical angle adjustment.

Image 2.2: Installation of the removable side lights onto the phone holder.

2.2 Charging the Device

Before first use, fully charge the device. Connect the provided Type-C charging cable to the charging port on the device and a suitable power source. The LED indicator will show charging status.

- **Battery Capacity:** 2000mAh
- **Charging Time:** Approximately 2 hours
- **Operating Time:** 8-10 hours on a full charge
- **LED Indicator:** Blue light means Start. Green light means Pause. Red light means Charging.

3. OPERATING INSTRUCTIONS

3.1 Power On/Off

Press and hold the power button for 2 seconds to turn the device on or off. The blue LED indicator will illuminate when the device is active.

3.2 Auto Face and Body Tracking

The device utilizes dual-core AI computing power to automatically track faces, bodies, or pets. No Bluetooth connection or external application is required. Simply power on the device, and it will begin tracking the subject in its field of view, rotating 360 degrees to follow movement.

Image 3.1: The device supports intelligent tracking of faces, bodies, and pets.

3.3 Using the Fill Lights

The two removable light boards provide adjustable illumination. Each light board has three adjustable light modes: Cold White, Natural White, and Warm White. Press the button on each light board to cycle through the modes and adjust brightness as needed.

Image 3.2: The fill lights offer three adjustable modes for optimal lighting.

3.4 Remote Control Operation

A wireless remote control is included for convenient photo capture. This remote operates independently and does not require an app or Bluetooth connection to the tracking device itself. It functions as a standard camera shutter remote for your smartphone.

Video 3.2: Overview of the YENDILI Smart AI Auto Face Tracking Tripod Phone Holder, including remote control usage.

3.5 Tripod Compatibility

The base of the auto tracking tripod is compatible with standard 1/4" camera stand tripods, allowing for versatile mounting options and extended height.

Image 3.3: The device can be attached to any standard tripod with a 1/4-inch screw.

4. MAINTENANCE

4.1 Cleaning and Care

To maintain the device, wipe it with a soft, dry cloth. Avoid using abrasive cleaners or solvents that could damage the surface or internal components. Keep the tracking sensor clear of dust and debris.

4.2 Battery Care

The device is equipped with a 2000mAh lithium-ion battery. To prolong battery life, avoid fully discharging the battery frequently. The device includes over-charged, over-current, over-heated, and short-circuit protection. Store the device in a cool, dry place when not in use for extended periods.

5. TROUBLESHOOTING

5.1 Device Not Tracking

- Ensure the device is powered on and the blue LED indicator is lit.
- Check that the tracking sensor (small camera on the base) is not obstructed.
- Ensure the subject is within the device's field of view and at an appropriate distance.

5.2 Lights Not Functioning

- Verify that the light boards are securely attached to the phone clip.
- Press the power button on each light board to cycle through modes and ensure they are turned on.
- Ensure the device has sufficient battery charge.

5.3 Phone Stability Issues

- Ensure your phone is securely placed in the phone clip. The clip can extend up to 3.5 inches.
- If using a heavy phone, ensure it is balanced to prevent stuttering or falling over during movement.
- The device is not designed for high-speed sports shooting.

6. SPECIFICATIONS

Feature	Detail
Model Number	P5S-WH-01
Product Dimensions	3.54 x 3.54 x 8.27 inches
