TROUBLESHOOTING

If you encounter any issues with your Srhythm NC35 headphones, please refer to the following table for common problems and their solutions.

Problem	Possible Cause	Solution
Headphones do not power on.	Low battery.	Charge the headphones fully using the provided Type-C cable.
Cannot pair with Bluetooth device.	Headphones not in pairing mode; device Bluetooth off; too far from device.	Ensure headphones are in pairing mode (flashing blue/red LED). Turn on Bluetooth on your device. Move headphones closer to the device (within 10 meters).
No sound or low volume.	Volume too low on headphones or device; incorrect audio source; headphones not connected.	Increase volume on both headphones and connected device. Ensure headphones are properly paired or connected via audio cable. Check audio output settings on your device.
Active Noise Cancellation (ANC) not effective.	ANC switch off; high-frequency noise present.	Ensure the ANC switch is in the "ON" position. ANC is most effective against low-frequency, constant noises, not sudden or high-pitched sounds.
