HOMIDEC DE1X10TR

HOMIDEC 10-Tier Plastic Shoe Rack Instruction Manual

INTRODUCTION

Thank you for choosing the HOMIDEC 10-Tier Plastic Shoe Rack. This manual provides essential information for the safe assembly, operation, and maintenance of your new shoe storage solution. Please read these instructions carefully before beginning assembly and retain them for future reference.

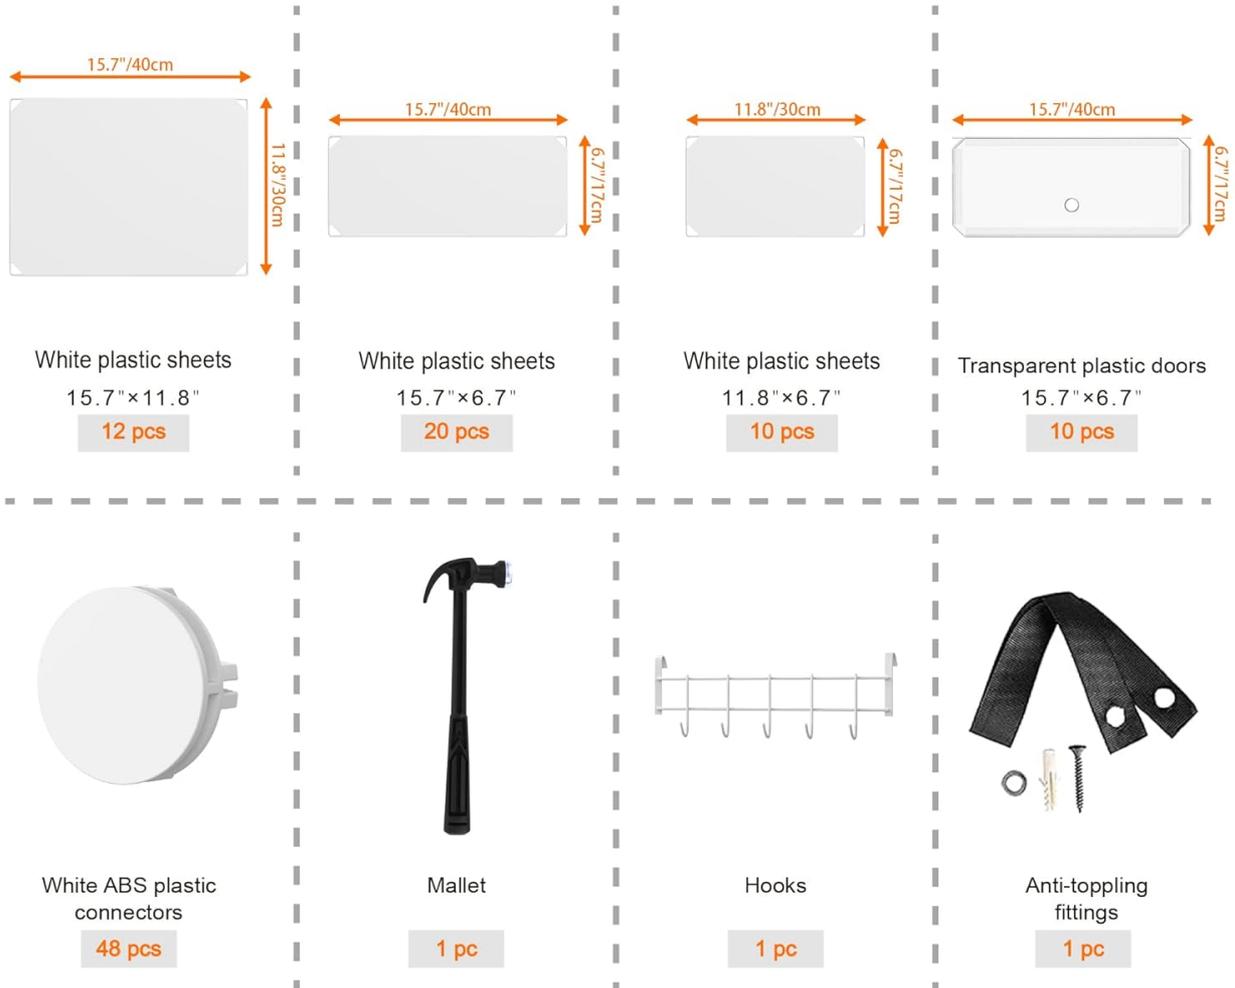

SAFETY INFORMATION

- Ensure all connectors are firmly attached during assembly to prevent instability.
- Do not exceed the maximum load capacity of 5 kg (11 lbs) per cube.
- Use the provided anti-toppling fittings to secure the rack to a wall, especially if children or pets are present, to prevent accidental tipping.
- Keep small parts away from children to avoid choking hazards.
- Assemble on a soft, clean surface to prevent scratching the panels.

PACKAGE CONTENTS

Please verify that all components listed below are present before starting assembly. If any parts are missing or damaged, contact customer support.

Package Contents

This diagram details all the components provided in the package, including various sizes of plastic sheets, transparent doors, ABS connectors, a mallet, hooks, and anti-toppling fittings, along with their respective quantities.

Component	Dimensions	Quantity
White Plastic Sheets	15.7" x 11.8" (40cm x 30cm)	12 pcs
White Plastic Sheets	15.7" x 6.7" (40cm x 17cm)	20 pcs
White Plastic Sheets	11.8" x 6.7" (30cm x 17cm)	10 pcs
Transparent Plastic Doors	15.7" x 6.7" (40cm x 17cm)	10 pcs
White ABS Plastic Connectors	N/A	48 pcs
Mallet	N/A	1 pc
Hooks	N/A	1 pc
Anti-toppling Fittings	N/A	1 pc

SETUP AND ASSEMBLY INSTRUCTIONS

The HOMIDEC shoe rack features a modular design for easy assembly. Follow these steps carefully:

1. **Plan Your Configuration:** Decide on the desired height and width of your shoe rack. The modular design allows for various arrangements, such as a single tall unit or multiple shorter units.
2. **Connect the Panels:** Insert the edges of the plastic sheets into the slots of the ABS plastic connectors. Ensure the panels are fully seated and secured.
3. **Use the Mallet:** Firmly tap the connectors with the provided mallet to ensure a tight and stable connection between all panels. This step is crucial for the rack's overall stability.
4. **Build Layer by Layer:** Start from the bottom layer and build upwards, connecting panels and doors as you go. For each cube, ensure all four side panels and the bottom panel are securely connected before adding the top panel.
5. **Attach Doors (Optional):** If using, attach the transparent plastic doors to the front of each cube using the designated slots on the connectors.
6. **Install Anti-Toppling Fittings:** For added safety, especially with taller configurations, attach the anti-toppling fittings to the top of the rack and secure them to a wall using appropriate hardware.

This image displays two fully assembled HOMIDEC shoe racks. The taller unit on the right shows 10 tiers, while the unit on the left is configured as a 6-tier and a 4-tier unit, demonstrating modularity. Both are filled with shoes, showcasing their storage capacity.

This diagram illustrates the key dimensions of the shoe rack: 16.5 inches (42cm) width, 12.2 inches (31cm) depth, and 68.9 inches (175cm) height. Each cube has a height of 6.7 inches (17cm).

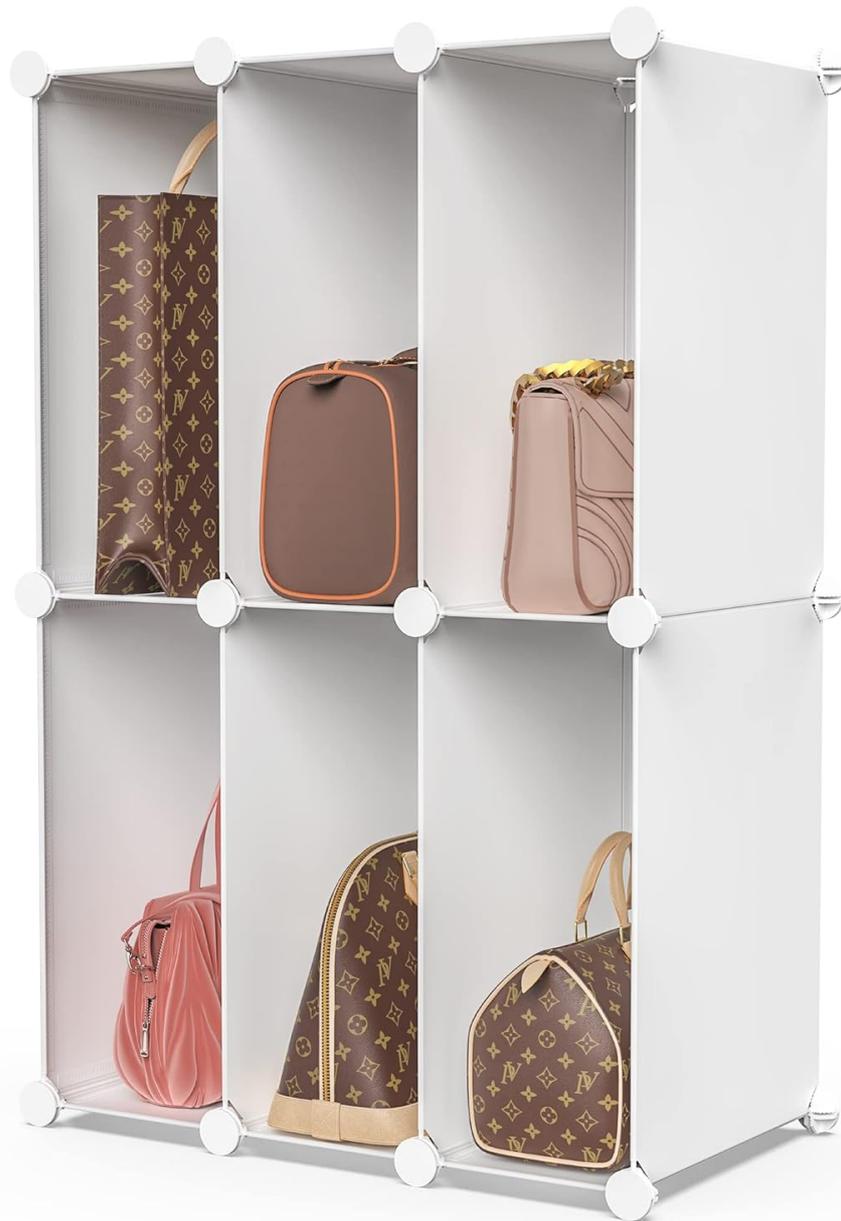

This image shows the HOMIDEC shoe rack configured into two separate, shorter units, each with five tiers. This demonstrates the product's modularity, allowing for different arrangements to fit various spaces.

OPERATING INSTRUCTIONS

The HOMIDEC shoe rack is designed for versatile storage in various home environments.

- **Shoe Storage:** Each cube is designed to comfortably hold one pair of adult shoes, accommodating up to 20 pairs in a 10-tier configuration. Suitable for trainers, high-heeled shoes, boots, stilettos, ballet shoes, flats, and children's shoes.
- **Multifunctional Use:** Beyond shoes, the cubes can be used to store various items such as toys, handbags, clothes, accessories, bedding, and books.
- **Placement:** Ideal for closets, hallways, bedrooms, and entrances to help keep your home tidy.

This image shows the versatility of the HOMIDEC cubes, used here to store various handbags and accessories, demonstrating its utility beyond just shoes.

MAINTENANCE

To ensure the longevity and appearance of your HOMIDEC shoe rack, follow these simple maintenance guidelines:

- **Cleaning:** The polypropylene panels are water-resistant and easy to clean. Wipe surfaces with a damp cloth and mild detergent if necessary. Avoid abrasive cleaners.
- **Dusting:** Regularly dust the panels to prevent accumulation.
- **Inspection:** Periodically check all connectors to ensure they remain firmly attached. Re-tap with the mallet if any connections feel loose.

A close-up view of the shoe rack's polypropylene panel with water droplets on its surface, highlighting its water-resistant and easy-to-clean properties.

TROUBLESHOOTING

If you encounter any issues with your shoe rack, refer to the following common solutions:

- **Rack feels wobbly or unstable:** Ensure all plastic sheets are fully inserted into the connectors and that each connector has been firmly tapped with the mallet. Uneven weight distribution can also cause instability; redistribute items evenly.
- **Doors do not close properly:** Check that the panels forming the cube are correctly aligned and fully seated in their connectors. Sometimes, a slight adjustment or re-tapping with the mallet can resolve this.
- **Missing or damaged parts:** If you find any parts missing or damaged upon unboxing, please contact HOMIDEC customer support for assistance.

SPECIFICATIONS

Feature	Detail
---------	--------

Feature	Detail
Brand	HOMIDEC
Model Name	Organizer
Model Number	DE1X10TR
Material	Polypropylene
Color	White and Transparent
