SETUP

Setting the TSA Combination Lock (Medium Checked Suitcase Only)

Your medium checked suitcase comes with an integrated TSA-approved combination lock. To set your personal combination:

1. Ensure the lock is set to its default combination (usually 0-0-0).
2. Locate the small reset button (often recessed and requires a pen or pointed object to press).
3. Press and hold the reset button until you hear a click or feel it depress.
4. Set your desired 3-digit combination by turning the dials.
5. Release the reset button. Your new combination is now set. Remember your combination as Samsonite does not retain personal codes.

OPERATING

Packing Your Suitcase

The Omni 2 Hardside suitcases feature a 50/50 split design, offering equal packing space on both sides. Utilize the internal compression straps and zippered mesh divider to secure your belongings and maximize space. For additional capacity, unzip the expansion zipper located around the perimeter of the suitcase.

Using the 360° Dual Spinner Wheels

The oversized, multidirectional spinner wheels allow for effortless mobility. You can push the suitcase upright beside you, pull it behind you on two wheels, or navigate tight spaces with ease. The wheels are designed for smooth rolling on various surfaces.

Charging with the Built-in USB Port (Carry-On Only)

The carry-on suitcase includes a built-in USB port. To use this feature, place your own portable power bank (not included) into the designated internal pocket and connect it to the internal USB cable. Then, connect your device to the external USB port for convenient charging on the go.

MAINTENANCE

Cleaning the Exterior

To clean the polycarbonate hardshell exterior, wipe with a soft cloth dampened with mild soap and water. Avoid abrasive cleaners or solvents that could damage the finish. For stubborn marks, a gentle plastic cleaner may be used.

Cleaning the Interior

The interior lining can be spot cleaned with a damp cloth and mild detergent. Allow to air dry completely before closing the suitcase to prevent mildew.

Wheel Care

Periodically check the spinner wheels for any debris or hair that may impede their movement. Clean as necessary to ensure smooth rolling performance.

TROUBLESHOOTING

TSA Lock Not Opening

If your TSA combination lock is not opening, ensure you have entered the correct 3-digit code. If you forgot your code, there is no master reset key provided to the user. You may need to try all 1000 combinations (000-999) or contact Samsonite customer support for assistance.

Wheels Not Rolling Smoothly

Check the wheels for any trapped debris, lint, or hair. Clean the wheel axles thoroughly. If the issue persists, contact customer support.

Zipper Malfunction

If a zipper is stuck, try gently moving the slider back and forth. Ensure no fabric is caught in the zipper teeth. Apply a small amount of zipper lubricant if necessary. For significant damage, refer to the warranty information.
