3. Silicone Keyboard Cover Installation

The silicone keyboard cover is a free-cut type, allowing customization to fit your specific keyboard layout.

1. **Measure and Cut:** Carefully measure the dimensions of your M-WORKS MW-WPC02 keyboard area. The cover measures approximately 345 x 145 mm. Use scissors to cut the silicone sheet to match your keyboard's shape, ensuring it covers only the key area and not the touchpad or other components.
2. **Clean Surface:** Ensure the keyboard surface is clean and free of dust or debris before application.
3. **Apply Cover:** Gently place the cut silicone cover over the keyboard. The cover has a micro-adhesive property that helps it stay in place.
4. **Secure (Optional):** For a more secure fit, use the included double-sided tape to adhere the cover more firmly to the keyboard edges, if desired.
