# BLAZEVIDEO Trail Camera Security Box User Manual

For Models A280, A280W, A350, A350W, W600, A270, E5, E5S, E6, E7, E8, P60, P80, P90, S800

## 1. PRODUCT OVERVIEW

The BLAZEVIDEO Trail Camera Security Box is designed to provide enhanced protection for your trail cameras against theft and environmental damage. This durable metal enclosure is compatible with a range of trail camera models from BLAZEVIDEO, Agitato, GardePro, and Meidase. It features multiple mounting options for secure placement in various outdoor environments.

### Key Features:

- **Enhanced Security:** Protects your trail camera from theft and tampering.
- **Durable Construction:** Made from robust metal to withstand harsh outdoor conditions.
- **Multiple Mounting Options:** Allows for direct bolt mounting, strap attachment, or use with a Python security cable.
- **Easy Access:** Designed for convenient insertion and removal of the camera.

## 3. PACKAGE CONTENTS

Your package should contain the following items:

- 2 x BLAZEVIDEO Trail Camera Security Boxes (Brown)

*Note: Trail cameras, mounting straps, bolts, and security cables are sold separately.*

## 4. SETUP AND INSTALLATION

### 4.1 Inserting the Camera into the Box

1. Open the front cover of the security box. The cover is designed to fit snugly.
2. Carefully slide your compatible trail camera into the security box, ensuring it is seated correctly and the lens, sensors, and controls align with the box's openings.
3. Close the front cover, ensuring the tabs engage securely with the main body of the box. A firm push may be

required to ensure a tight fit.

## 4.2 Mounting Options

The security box offers several methods for mounting:

- **Strap Mounting:** Utilize the integrated slots on the back and sides of the box to thread a standard mounting strap (not included). This is ideal for attaching to trees or poles.
- **Bolt Mounting:** The box features pre-drilled holes on the back for direct bolt mounting to a tree or other stable surface. Use appropriate screws or bolts (not included) for secure attachment.
- **Cable Lock:** Slots are provided for use with a Python-style security cable (not included) to deter theft. Thread the cable through the designated slots and secure it with a padlock.

Figure 4: Security Box with padlock for enhanced protection.

## 5. OPERATION

Once the trail camera is securely installed within the box and the box is mounted, the operation of the camera itself remains unchanged. The security box provides a protective shell without interfering with the camera's functionality. Ensure that the camera's lens, PIR sensor, and any necessary ports (e.g., external power, antenna) are unobstructed by the box's design.

For maximum security, always use a padlock or security cable in conjunction with the box's locking points.

## 6. MAINTENANCE

To ensure the longevity and effectiveness of your security box, follow these maintenance guidelines:

- **Regular Inspection:** Periodically check the box for any signs of damage, corrosion, or wear. Ensure all mounting points remain secure.
- **Cleaning:** Clean the exterior of the box with a damp cloth to remove dirt, dust, or debris. Avoid abrasive cleaners that could damage the finish.
- **Lock Mechanism:** If using a padlock, ensure it is functioning correctly and lubricate it if necessary to prevent seizing.

## 7. TROUBLESHOOTING

### 7.1 Difficulty Closing the Box

If the front cover is difficult to close or does not engage properly:

- **Check Camera Placement:** Ensure the trail camera is fully seated and not obstructing the cover's closing mechanism.
- **Verify Compatibility:** Confirm that your camera model is listed as compatible with this security box. Incompatible cameras may not fit correctly.
- **Inspect for Debris:** Check the edges of the box and cover for any debris that might prevent a proper seal.

### 7.2 Perceived Lack of Security

If you are concerned about the security provided by the box:

- **Use a Padlock:** Always utilize a robust padlock through the designated holes to secure the front cover.
- **Employ a Security Cable:** For additional deterrence, use a Python-style security cable threaded through the appropriate slots and secured to a fixed object.
- **Secure Mounting:** Ensure the box is mounted firmly using bolts or a tightly cinched strap to prevent easy removal.

## 8. SPECIFICATIONS
