BLANCO 526614

BLANCO JANDORA-S Kitchen Faucet User Manual

Model: 526614

INTRODUCTION

Thank you for choosing the BLANCO JANDORA-S Kitchen Faucet. This manual provides essential information for the proper installation, operation, and maintenance of your new faucet. Please read this manual thoroughly before installation and keep it for future reference.

PRODUCT FEATURES

- High-quality solid stainless steel construction with a brushed surface finish.

- Clean and modern design suitable for contemporary kitchens.
- High spout for convenient filling of large pots and vases.
- Operating lever with vertical zero position for increased design flexibility, especially when installed near a back wall.
- Energy-saving cold start function as the basic setting for the operating lever.
- Concealed, pull-out spray for extended reach and versatility.
- Spout swivels 190 degrees for wide coverage.
- Equipped with a cartridge featuring ceramic seals for durability and leak-free performance.
- Nylon-coated spray hose for smooth operation and longevity.
- Flexible connection hoses (700 mm length) with nuts for easy and secure installation.
- Patented aerator designed to significantly reduce limescale buildup.
- Includes a stabilizing plate to enhance the stability of the faucet when installed in stainless steel sinks.
- Equipped with a backflow preventer as standard, ensuring intrinsic safety against backflow according to EN 1717.
- LGA certified.

SETUP AND INSTALLATION

Before You Begin

Ensure you have all necessary tools and components as listed in the packaging. Turn off the main water supply before starting installation. A faucet hole drilling with a diameter of 35 mm is required for installation.

Installation Steps

1. Prepare the sink: Ensure the faucet hole is clean and has the required diameter (Ø 35 mm).
2. Install the faucet: Insert the faucet body into the prepared hole.
3. Secure the faucet: From underneath the sink, attach the stabilizing plate and secure the faucet using the provided mounting kit. This plate helps increase stability, especially in stainless steel sinks.
4. Connect water supply: Attach the flexible connection hoses (700 mm length) to your hot and cold water supply lines. Ensure connections are tight to prevent leaks.
5. Connect the pull-out spray hose: Connect the nylon-coated spray hose to the faucet body.
6. Test for leaks: Once all connections are made, slowly turn on the main water supply and check for any leaks.

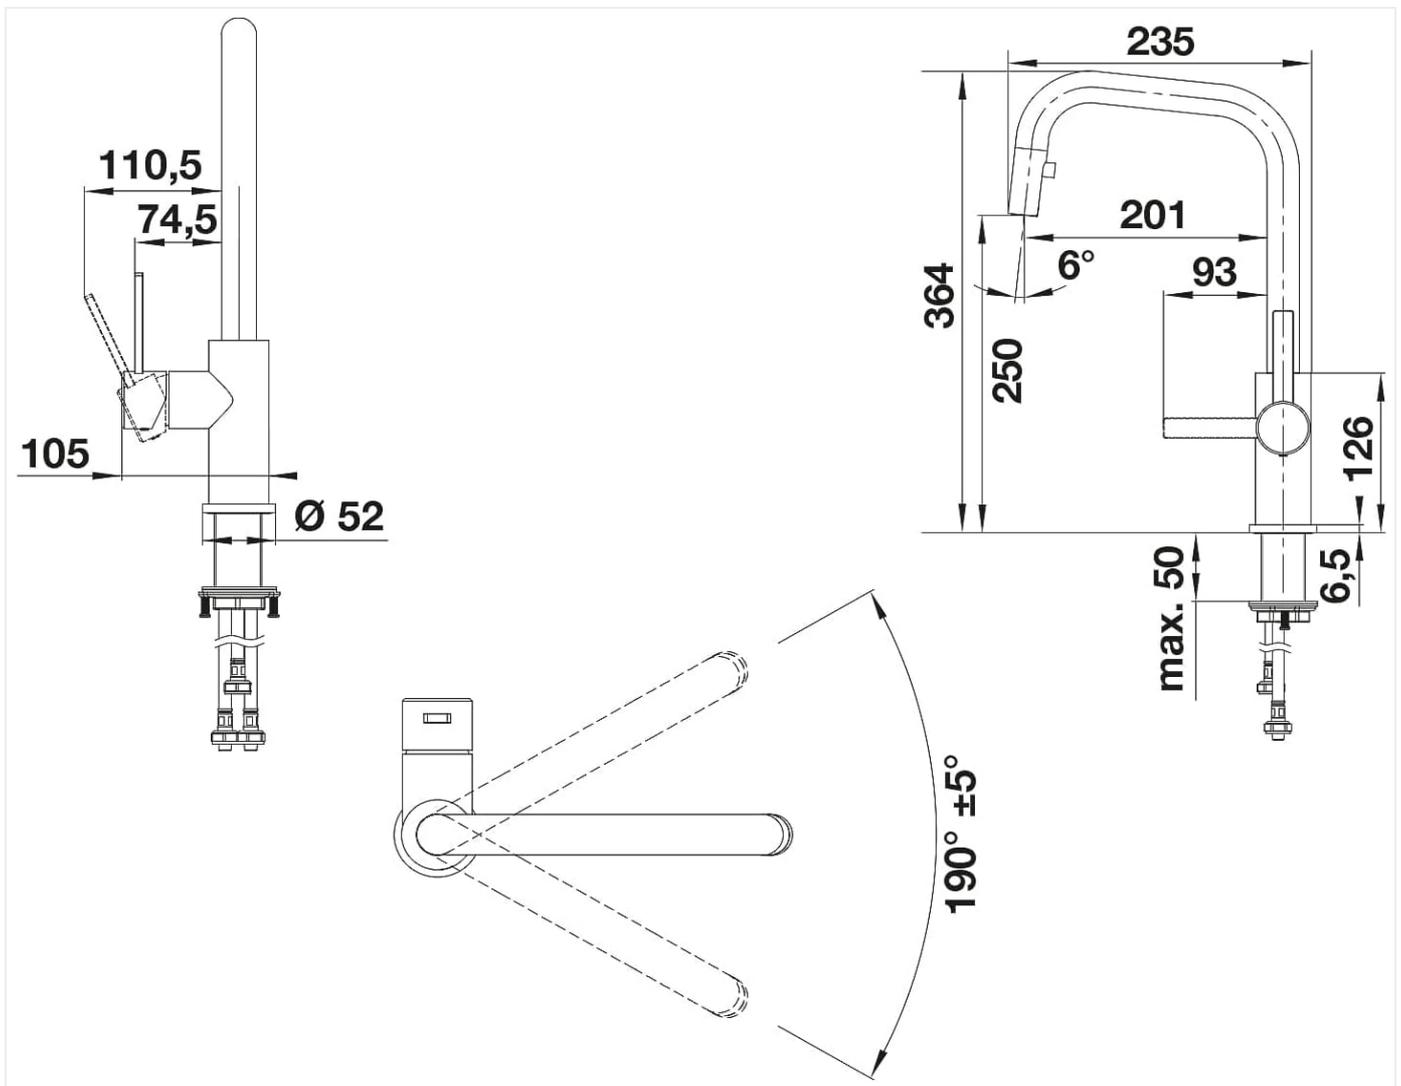

Figure 2: Technical drawing showing dimensions and installation details for the BLANCO JANDORA-S faucet. Note the required $\text{Ø } 35 \text{ mm}$ hole and the 190° swivel range.

OPERATING INSTRUCTIONS

Water Flow and Temperature Control

The BLANCO JANDORA-S features a single lever handle for controlling both water flow and temperature. The basic setting of the operating lever is for cold start, which helps save energy.

- To turn on the water: Lift the lever.
- To increase water flow: Lift the lever further.
- To adjust temperature: Move the lever to the left for hot water and to the right for cold water. The default position (vertical zero position) provides cold water.
- To turn off the water: Push the lever down to its original position.

Using the Pull-Out Spray

The faucet is equipped with a concealed, pull-out spray for added convenience.

- To extend the spray: Gently pull the spray head downwards from the spout.
- To retract the spray: Guide the spray head back into the spout until it clicks securely into place.

MAINTENANCE

Cleaning the Faucet

To maintain the brushed stainless steel finish, clean the faucet regularly with a soft cloth and mild soap. Avoid abrasive cleaners, scouring pads, or harsh chemicals, as these can damage the surface.

Aerator Maintenance

The patented aerator is designed to reduce calcification. However, if water flow becomes restricted, the aerator may need cleaning. Unscrew the aerator from the tip of the spout, rinse any debris, and gently clean with a soft brush if necessary. Reattach the aerator securely.

General Care

Periodically check all connections for tightness to prevent leaks. Do not overtighten. The ceramic seals in the cartridge are designed for long-lasting, drip-free performance.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Low water flow	Clogged aerator; partially closed shut-off valve; kinked supply line.	Clean the aerator (see Maintenance section); ensure shut-off valves are fully open; check supply lines for kinks.
Leaking at connections	Loose connection; damaged washer/seal.	Tighten connections (do not overtighten); replace damaged washers or seals.
Dripping from spout	Worn cartridge.	Contact customer support for a replacement cartridge.
Pull-out spray not retracting fully	Obstruction in hose path; insufficient weight on hose.	Check for obstructions under the sink; ensure the counterweight on the hose is properly positioned and not obstructed.

SPECIFICATIONS

Attribute	Detail
Model Number	526614
Brand	BLANCO
Material	Solid Stainless Steel
Finish	Brushed
Dimensions (L x W x H)	10.5 x 23.5 x 36.4 cm
Weight	1.9 kg
Installation Method	Single-hole, Deck Mounted
Required Faucet Hole Diameter	Ø 35 mm
Flow Rate	10.5 Liters per minute
Spout Height	253 mm
Spout Depth	234 mm
Number of Handles	1
Special Feature	Pull-out spray
Certifications	LGA certified, EN 1717 compliant (backflow preventer)

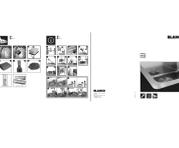

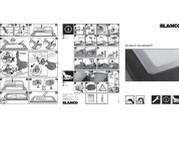

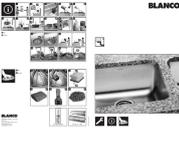

WARRANTY AND SUPPORT
