BLANCO Kano-S Kitchen Faucet Instruction Manual

Model: 526668

1. INTRODUCTION

Thank you for choosing the BLANCO Kano-S Matte Black Kitchen Faucet. This high-quality faucet is designed to provide reliable performance and aesthetic appeal in your kitchen. Its sleek design, matte black finish, and practical features like the pull-out hose and 360-degree swivel spout make it a versatile addition to any modern kitchen environment.

This manual provides essential information for the safe and efficient installation, operation, and maintenance of your new faucet. Please read it thoroughly before installation and keep it for future reference.

2. SAFETY INSTRUCTIONS

- Always turn off the main water supply before beginning any installation or maintenance work on the faucet.
- Ensure all connections are secure and watertight to prevent leaks.
- Do not overtighten connections, as this may damage the components.
- If you are unsure about any part of the installation process, consult a qualified plumber.
- Keep small parts out of reach of children to prevent choking hazards.
- Use appropriate tools for installation to avoid damaging the faucet's finish or components.

3. PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- BLANCO Kano-S Kitchen Faucet (1 unit)

- Mounting Kit (includes all necessary hardware for installation)

4. SETUP AND INSTALLATION

The BLANCO Kano-S faucet is designed for single-hole deck mounting. Follow these steps for proper installation:

1. **Prepare the Sink:** Ensure the mounting hole on your sink or countertop is clean and free of debris. The required hole diameter is approximately 55mm.
2. **Install the Faucet:** Insert the faucet base into the mounting hole. Ensure the faucet is oriented correctly.
3. **Secure the Faucet:** From underneath the sink, slide the rubber washer, metal washer, and mounting nut onto the threaded shank of the faucet. Tighten the mounting nut securely using the provided tool or an adjustable wrench. Do not overtighten.
4. **Connect Water Supply Lines:** Connect the hot and cold water supply lines from your home's plumbing to the corresponding inlets on the faucet. Use thread sealant tape on the threads for a watertight seal.
5. **Connect Pull-Out Hose:** If applicable, connect the pull-out spray hose to the designated connection point on the faucet body. Ensure the hose weight is properly installed on the pull-out hose to allow for smooth retraction.
6. **Test for Leaks:** Slowly turn on the main water supply and check all connections for leaks. Run water through the faucet for a few minutes to flush out any debris.

5. OPERATING INSTRUCTIONS

The BLANCO Kano-S faucet features a single lever handle for controlling both water flow and temperature, along with a pull-out spray and 360-degree swivel spout for enhanced functionality.

- **Water Flow and Temperature:** Lift the single lever handle to increase water flow. Move the handle left for hot water and right for cold water.
- **Pull-Out Spray:** Gently pull the spray head from the spout to extend the hose. The hose will retract automatically when released, thanks to the counterweight.
- **360° Swivel Spout:** The faucet spout can rotate 360 degrees, providing extended reach and flexibility for various sink tasks, such as filling large pots or cleaning multiple sink basins.

6. MAINTENANCE

Regular cleaning and maintenance will help preserve the finish and functionality of your BLANCO Kano-S faucet.

- **Cleaning the Finish:** Clean the matte black finish with a soft cloth and mild soap and water. Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the finish. Rinse thoroughly and dry with a soft cloth.
- **Aerator Maintenance:** Periodically unscrew the aerator from the end of the spout and clean any mineral deposits or debris that may have accumulated. This helps maintain optimal water flow.
- **Hose Maintenance:** Ensure the pull-out hose moves freely and is not obstructed by items under the sink.
- **Ceramic Cartridge:** The faucet is equipped with a durable ceramic cartridge, which typically requires no maintenance. If you experience persistent drips or leaks, the cartridge may need to be replaced by a qualified professional.

7. TROUBLESHOOTING

If you encounter issues with your faucet, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Low Water Flow	Clogged aerator; partially closed shut-off valves; debris in supply lines.	Clean the aerator; ensure shut-off valves are fully open; flush supply lines.

Problem	Possible Cause	Solution
Leaking from Spout	Worn ceramic cartridge; debris in cartridge.	Contact a qualified plumber for cartridge inspection or replacement.
Leaking from Base	Loose mounting nut; damaged O-rings.	Tighten mounting nut; inspect and replace O-rings if damaged.
Difficulty Pulling Out/Retracting Hose	Hose obstructed; hose weight dislodged.	Clear obstructions under the sink; re-position hose weight.
