Igloo IGLICEB33SL

Igloo Electric Countertop Ice Maker Machine

Model: IGLICEB33SL

Brand: Igloo

PRODUCT OVERVIEW

This stylish and portable ice maker allows you to make ice accessible almost anywhere you need it. With its intuitive, easy-to-use design, you'll be making ice cubes soon after you plug in your new appliance. It can made 9 cubes, large or small, in almost 7 minutes. Perfect for kitchens, RVs, club houses, home bars, and more.

Key Features:

- Note : Please check the dimension and item weight of the product and confirm it fits your space
- DESIGNED FOR CONVENIENCE: The Igloo countertop ice maker is portable, convenient, compact in size, and looks great on any countertop. This portable ice maker does not require installation so you can make ice whenever or wherever you need it. A large window on the lid allows for easy viewing of ice cube capacity
- LARGE ICE MAKING CAPACITY: With a 2.5-quart capacity water tank, this countertop ice maker will produce 33 pounds of ice cubes in a 24-hour period, enough to keep drinks cold all day and night long. Need ice quickly, This Igloo ice maker will make 9 small or large cylinder-shaped ice cubes in as little as 7 minutes
- ICE BASKET AND SCOOP: The Igloo ice cube maker comes with an easy to remove basket that can store up to 2 pounds of ice at a time. The removeable ice basket allows you to quickly move large quantities of ice cubes at a time or effortlessly fill large containers. Utilize the included ice scoop to easily fill beverage glasses or small containers.
- CONTROL PANEL: This ice maker machine is equipped with a simple electronic control panel allowing you to choose small or large ice cube sizes depending on your needs. Illuminated led lights indicate when you need to add water and when the ice basket is full

The Igloo Electric Countertop Ice Maker Machine, designed for convenience and portability.

High 2.5qt Capacity

KEEP DRINKS COLD ALL DAY

Compact dimensions make the ice maker suitable for various countertop spaces.

SETUP

Initial Placement and Preparation

Place the ice maker on a flat, level surface away from direct sunlight and heat sources. Ensure there is adequate ventilation around the unit. Allow the unit to sit upright for at least one hour before plugging it in to allow refrigerant fluids to settle.

Initial Cleaning

Before first use, remove the ice basket and clean the interior of the ice maker with a soft cloth and mild detergent. Rinse thoroughly with clean water. Drain any remaining water from the reservoir using the drain plug located at the bottom of the unit.

Adding Water

Open the lid and pour potable water into the water reservoir up to the MAX fill line. Do not overfill. Using cold water is recommended for faster ice production.

Fill the water reservoir with potable water up to the MAX fill line before starting the ice maker.

OPERATING INSTRUCTIONS

Powering On and Ice Production

Press the 'ON/OFF' button on the control panel to turn on the ice maker. The unit will automatically begin the ice-making cycle. The 'POWER' indicator light will illuminate.

Selecting Ice Cube Size

Press the 'SELECT' button to choose between small (S) or large (L) ice cube sizes. The corresponding LED light will illuminate to indicate your selection. The size of the ice cubes may vary slightly depending on the ambient room temperature.

The electronic control panel allows you to easily select ice cube size and monitor the unit's status.

Low Noise Operation

AND INTUITIVE CONTROL PANEL

Know when to add water, when the ice basket is full, and easily choose your ice cube size.

Choose between small or large bullet-shaped ice cubes to suit your preference.

Ice Collection

The ice maker will produce 9 ice cubes in as little as 7 minutes. Ice will drop into the removable ice basket. The 'ICE FULL' indicator light will illuminate when the basket is full, signaling that it's time to empty it. If the ice basket is not emptied, the unit will automatically stop making ice.

Quick Yield

9 ice cubes in
7 minutes

33lb yield in
24 hours

automatic shut off
when full

Freshly produced ice cubes are collected in the removable basket, ready for use.

MAINTENANCE

Regular Cleaning

For optimal performance and hygiene, regularly clean the water reservoir and ice basket. Use a soft cloth with mild soap and warm water. Rinse thoroughly to remove any soap residue.

Draining Water

When the unit is not in use for an extended period, or before moving it, drain all water from the reservoir. Locate the drain plug at the bottom of the unit, remove it, and allow all water to flow out. Replace the plug securely after draining.

Descaling

If mineral deposits or hard water stains build up inside the unit, use a descaling solution specifically designed for ice makers. Follow the descaling product's instructions carefully. Always rinse the unit thoroughly with clean water after descaling to ensure no residue remains.

TROUBLESHOOTING

Problem	Possible Cause	Solution
"ADD WATER" indicator light is on.	Water reservoir is empty.	Add potable water to the MAX fill line.
"ICE FULL" indicator light is on.	Ice basket is full.	Empty the ice basket.
Ice cubes are melting quickly.	Ambient room temperature is too high.	Ensure the unit is in a cool, well-ventilated area. Transfer ice to a freezer for long-term storage.
Ice production is slow or ice is not forming.	Water temperature is too high or unit needs cleaning.	Use colder water. Perform a cleaning cycle as per maintenance instructions.

SPECIFICATIONS
