De'Longhi EC885M

De'Longhi DedicA Arte Espresso Machine User Manual

Model: EC885M

Brand: De'Longhi

PRODUCT OVERVIEW

De'Longhi DedicA Arte Espresso Machine is the gateway to exceptional flavor, controlled by you. Our slimmest machine yet makes a statement atop your counter – even in the most compact kitchen. The easy-to-use My LatteArt steam wand is a powerful, commercial-style wand that lets you create picture-perfect latte art.

SETUP

Unboxing and Components

Upon unboxing your De'Longhi DedicA Arte Espresso Machine, ensure all components are present:

- DedicA Arte Espresso Machine
- Measuring Scoop
- Total Hardness Test
- Single coffee filter
- Double coffee Filter
- ESE Pod filter
- Professional tamper

Image: The main espresso machine with all its accompanying accessories laid out on a white surface, including the portafilter, tamper, milk pitcher, and different filter baskets.

Initial Setup

1. Place the machine on a stable, flat surface.
2. Fill the 35-ounce removable water tank with fresh, cold water. Ensure the water level is easily visible.
3. Plug the machine into a grounded electrical outlet.
4. Turn on the machine using the power button. Allow the machine to heat up until the indicator lights are steady, indicating it's ready for use.

OPERATING INSTRUCTIONS

Making Espresso

The 15-bar professional pressure ensures quality results. The Automatic Flow Stop feature dispenses the right amount of espresso.

1. Select the appropriate filter basket (single or double shot) and place it in the portafilter.
2. Add finely ground coffee to the filter basket. Use the professional tamper to evenly press the coffee grounds.
3. Attach the portafilter to the group head by inserting it and turning it to the right until it locks securely.
4. Place your espresso cup(s) on the drip tray. The double drip tray can be adjusted or removed to accommodate taller cups.
5. Press the single or double espresso button on the control panel to start brewing. The machine will automatically stop when the desired volume is reached.

3 Temperature

Frothing Milk with My LatteArt Steam Wand

The My LatteArt steam wand allows you to achieve the perfect milk texture for café-quality lattes and cappuccinos.

1. Fill a milk pitcher with cold milk (dairy or alternative).
2. Position the steam wand just below the surface of the milk.
3. Turn the steam knob to activate the steam.
4. Lower the pitcher slightly to introduce air into the milk, creating foam.
5. Once desired foam is achieved, submerge the wand deeper to heat the milk to the desired temperature.
6. Turn off the steam and immediately wipe the wand with a damp cloth to prevent milk residue from drying.

Powerful Steam Wand

Froths milk & alternatives to silky smooth microfoam

Image: A close-up shot of a hand expertly frothing milk in a stainless steel pitcher using the machine's steam wand, demonstrating the creation of silky microfoam.

MAINTENANCE

Regular cleaning and maintenance will ensure the longevity and optimal performance of your espresso machine.

Daily Cleaning

- Empty and clean the drip tray after each use. The drip tray is easy to remove.
- Remove the portafilter and discard used coffee grounds. Rinse the filter basket and portafilter under running water.
- Wipe down the group head with a damp cloth to remove any coffee residue.
- Purge the steam wand after each use by briefly activating steam to clear any milk residue, then wipe it clean.

Compact Italian Design

Image: A collection of the machine's removable parts, such as the portafilter, tamper, and various filter baskets, arranged on a clean surface, indicating they are ready for cleaning or maintenance.

Descaling

Descaling is crucial to prevent mineral buildup. The machine includes a Total Hardness Test to determine your water hardness and frequency of descaling.

- Use a suitable descaling solution (e.g., De'Longhi EcoDecalk).
- Follow the instructions provided with your descaling solution and the machine's user manual for the descaling process.
- Regular descaling helps maintain optimal brewing temperature and pressure.

TROUBLESHOOTING

If you encounter issues with your machine, please refer to the official user manual PDF for detailed troubleshooting steps. Common issues may include:

- No coffee dispensing or slow flow.
- No steam or weak steam.
- Machine not heating up.
- Leaking from the machine.

For comprehensive solutions, consult the [User Manual \(PDF\)](#).

SPECIFICATIONS

Feature	Detail
