## SETUP AND ASSEMBLY

The cabinet unit is designed for straightforward assembly. Follow the provided instructions carefully. If you encounter any questions during assembly, please contact customer support.

### Anti-Tipping Device Installation

It is crucial to install the anti-tipping device to ensure the stability and safety of the cabinet, especially in households with children. This device helps prevent the cabinet from tipping over.

Video 1: VINGLI Anti-Tipping Device Installation Demo. This video demonstrates the step-by-step process of installing the L-shaped bracket and securing the wall-mounting hardware for the anti-tipping device.

### Bottom-Mounted Drawer Slide Installation

Proper installation of the drawer slides ensures smooth operation of the drawers. Refer to your product manual for exact screw hole locations, as they may differ slightly from the video.

Video 2: VINGLI Bottom-Mounted Drawer Slide Installation Demo. This video guides you through attaching the bottom-mounted slides to the drawer and cabinet side panels, and how to insert and remove the drawer.

## 3-in-1 Connector & Wooden Dowel Installation

This video provides guidance on installing the 3-in-1 connectors and wooden dowels, which are essential for securing the cabinet panels together. Pay attention to the orientation of the eccentric wheel during installation.

Video 3: VINGLI 3-in-1 Connector & Wooden Dowel Installation Demo. This video demonstrates the correct method for inserting wooden dowels and cam bolts, and how to properly align and tighten cam locks for secure panel connection.

## OPERATING INSTRUCTIONS

- **Drawers:** Gently pull the drawers open and push them closed. Avoid forcing them to prevent damage to the slides.
- **Cupboard:** Open the cupboard door by pulling the knob. The internal shelf can be adjusted to different heights to accommodate items of varying sizes. To adjust, remove the shelf, reposition the shelf pins to the desired height, and reinsert the shelf.
- **Weight Distribution:** For optimal stability, place heavier items in the lower drawers and on the bottom shelf of the cupboard.

## MAINTENANCE

- **Cleaning:** The cabinet's waterproof surface can be cleaned with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that may damage the finish.
- **Spills:** Wipe up spills immediately to prevent water damage, especially in humid environments like bathrooms.
- **Inspection:** Periodically check all screws and connectors to ensure they remain tight. Retighten if necessary to maintain structural integrity.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Drawers do not slide smoothly or fit properly.	Incorrect slide installation; misaligned panels; debris in slides.	Review the drawer slide installation video and instructions. Ensure all screws are tightened and panels are aligned. Clean any debris from the drawer slides.
Cabinet feels wobbly or unstable.	Loose connections; anti-tipping device not installed or improperly secured.	Check all cam locks, cam bolts, and wooden dowels for tightness. Ensure the anti-tipping device is correctly installed and securely fastened to both the cabinet and the wall.
Cupboard door does not close completely.	Misaligned hinges; magnetic catch not engaging.	Adjust the hinges to ensure proper door alignment. Check if the magnetic catch is securely installed and aligned with the metal plate on the door.
