SAEUYVB C-002

SAEUYVB Candle Making Kit Model C-002 User Manual

Your Guide to Creative Candle Crafting

1. Introduction

Thank you for choosing the SAEUYVB Candle Making Kit, Model C-002. This comprehensive kit provides all the necessary tools and materials to create beautiful, custom-colored soy wax candles. This manual will guide you through the setup, operation, maintenance, and safety precautions to ensure a successful and enjoyable candle-making experience.

2. What's in the Box

Carefully unpack your SAEUYVB Candle Making Kit and verify that all components are present. The kit includes:

- 1 x Electric Stove (110V-500W)
- 1 x 900ml Large Candle Melting Pot (Stainless Steel)
- Soybean Wax
- 6 x Bottles of Scented Essential Oils
- 16 x Candle Dyeing Blocks
- 6 x 4-ounce Candle Tins
- 4 x Stainless Steel Wick Centering Devices
- 1 x Thermometer
- 20 x Candle Wick Stickers
- 20 x 15cm Candle Wicks
- 1 x Mixing Spoon
- 20 x Warning Stickers
- 20 x Wooden Wick Centering Devices
- 6 x Gift Tags
- 1 x U-shaped Scissors
- 1 x Anti-Scalding Pad
- 1 x Instruction Manual

3. Safety Information

Please read all safety warnings before using the candle making kit.

- **Adult Supervision:** This kit is recommended for adults. Children should only use this kit under direct adult supervision.
- **Hot Surfaces:** The electric stove and melting pot will become extremely hot during use. Always use the anti-scalding pad and heat-resistant gloves (not included) when handling hot items.
- **Hot Wax:** Melted wax is very hot and can cause severe burns. Avoid direct contact with skin. If wax comes into contact with skin, immediately rinse with cool water.
- **Electrical Safety:** Ensure the electric stove is connected to a standard 110V outlet. Do not use with non-standard voltages. Keep the stove away from water and flammable materials. Unplug the stove when not in use.
- **Ventilation:** Work in a well-ventilated area to disperse any fumes from melting wax or essential oils.
- **Flammable Materials:** Keep all flammable materials (curtains, paper, etc.) away from the working area. Never leave melting wax unattended.
- **Candle Safety:** Once candles are made, always burn them on a heat-resistant surface, away from drafts, children, and pets. Trim wicks to 1/4 inch before each use. Do not burn candles for more than 4 hours at a time.

4. Setup

1. **Choose Your Workspace:** Select a clean, flat, heat-resistant surface in a well-ventilated area, away from flammable objects and drafts.
2. **Prepare Your Tins:** Ensure your candle tins are clean and dry.
3. **Attach Wicks:** Peel one candle wick sticker and attach it to the metal base of a candle wick. Firmly press the wick into the center of the bottom of a candle tin.
4. **Secure Wicks:** Use either the stainless steel or wooden wick centering devices to hold the wick upright and centered in the tin. Place the device across the top of the tin, threading the wick through the center hole.

5. Operating Instructions: Making Your Candles

Follow these steps to create your custom aromatherapy candles:

1. **Measure the Wax:** Place the desired amount of soybean wax into the 900ml melting pot. A general guideline is that 1 ounce of wax fills approximately 1 fluid ounce of container volume.
2. **Melt the Wax:** Place the melting pot onto the electric stove. Turn the stove to a medium-low setting. Allow the wax to melt slowly and evenly. Stir occasionally with the mixing spoon to ensure even melting. Do not let the wax boil.
3. **Monitor Temperature:** Use the thermometer to monitor the wax temperature. For best results, melt the wax until it reaches approximately 180-185°F (82-85°C).
4. **Add Dye (Optional):** Once the wax is fully melted and at the desired temperature, add a candle dyeing block. Start with a small piece and add more until you achieve your desired color. Stir well until the dye is completely dissolved and evenly distributed.
5. **Cool and Add Scent:** Remove the melting pot from the electric stove and place it on the anti-scalding pad. Allow the wax to cool slightly to around 160-170°F (71-77°C). This is the ideal temperature to add essential oils for optimal scent throw. Add your chosen essential oil(s) and stir gently for about 2 minutes to ensure the scent is well

incorporated.

6. **Pour the Wax:** Carefully pour the scented, colored wax into your prepared candle tins, ensuring the wick remains centered. Leave about 1/2 inch of space from the top of the tin.
7. **Cure the Candles:** Allow the candles to cool and solidify completely at room temperature. This can take several hours, or even overnight, depending on the room temperature and candle size. Avoid moving them while they are solidifying.
8. **Trim the Wick:** Once the candles are fully hardened, remove the wick centering device. Use the U-shaped scissors to trim the wick to about 1/4 inch (0.6 cm) above the wax surface.
9. **Apply Warning Stickers:** Attach a warning sticker to the bottom of each finished candle tin.
10. **Enjoy or Gift:** Your candles are now ready to be enjoyed or given as gifts using the provided gift tags.

6. Maintenance

- **Cleaning the Melting Pot:** After use, allow any remaining wax in the pot to cool and solidify. Once solid, it can often be popped out. Wipe the pot clean with a paper towel while it's still slightly warm (but not hot) to remove any residue. Do not use abrasive cleaners.
- **Cleaning the Electric Stove:** Ensure the stove is unplugged and completely cool before cleaning. Wipe the surface with a damp cloth. Do not immerse the stove in water.
- **Storage:** Store all kit components in a cool, dry place away from direct sunlight and extreme temperatures.

7. Troubleshooting

Problem	Possible Cause	Solution
Wick drowns or won't stay lit	Wick is too small for the candle diameter; too much fragrance oil.	Ensure wick is properly sized (though provided wicks are standard). Reduce fragrance oil slightly in future batches.
Tunneling (wax burns down the middle, leaving wax on sides)	Wick is too small; candle not burned long enough on first use.	Ensure the first burn creates a full melt pool to the edges of the container.
Rough top surface after cooling	Wax cooled too quickly; pouring temperature too low.	Pour wax at the recommended temperature (around 160-170°F). Allow candles to cool slowly at room temperature. A heat gun can be used briefly to smooth tops.
Weak scent throw	Not enough fragrance oil; fragrance added at wrong temperature.	Ensure fragrance oil is added when wax is between 160-170°F and stirred thoroughly. Increase fragrance oil slightly in future batches if desired.

8. Specifications

Feature	Detail
Brand	SAEUYVB
Model Name/Number	C-002 / SAEUYVB-002
Material	Stainless Steel (Melting Pot), Soy Wax
Electric Stove Voltage	110V
Electric Stove Power	500W
Melting Pot Capacity	900ml
Item Dimensions (L x W x H)	10.63 x 3.94 x 12.2 inches
Item Weight	1 kg
UPC	767012411735

9. Warranty and Support

The SAEUYVB Candle Making Kit Model C-002 comes with a **3-year warranty** from the date of purchase. This warranty covers manufacturing defects under normal use. Please retain your proof of purchase for warranty claims.
For any questions, concerns, or support needs regarding your candle making kit, please contact SAEUYVB customer service through the retailer's platform or the official brand website. Provide your model number (C-002) and a detailed description of the issue for prompt assistance.
