- **Bluetooth 5.0:** Connect wireless headphones, soundbars, or other Bluetooth-enabled accessories.
- **ALLM (Auto Low Latency Mode):** Automatically switches to a low-latency mode when a gaming console is detected, reducing input lag.

5. Maintenance

5.1. Cleaning the TV

- Always unplug the TV from the power outlet before cleaning.
- Use a soft, lint-free cloth to gently wipe the screen. For stubborn marks, slightly dampen the cloth with water or a specialized screen cleaner (avoid harsh chemicals).
- Wipe the TV frame and stand with a dry, soft cloth.
- Do not spray cleaning liquids directly onto the screen or TV body.

5.2. Software Updates

Ensure your TV's software is up to date to benefit from the latest features and performance improvements. The TV will typically notify you of available updates. You can also manually check for updates in the TV's settings menu under "About" or "System Updates."

6. Troubleshooting

If you encounter issues with your TV, refer to the following common problems and solutions:

Problem	Possible Solution
No Power	Ensure the power cable is securely connected to both the TV and a working power outlet. Check if the power outlet is functioning by plugging in another device.
No Picture / Black Screen	Verify that the correct input source (HDMI 1, HDMI 2, etc.) is selected. Check all cable connections to external devices. Try restarting the TV and any connected devices.
No Sound	Check the TV's volume level and ensure it is not muted. Verify external audio system connections if applicable. Check audio settings in the TV menu.
Remote Control Not Responding	Replace the batteries in the remote control. Ensure there are no obstructions between the remote and the TV's IR receiver. Re-pair the Bluetooth remote if necessary (refer to TV settings).
Network Connection Issues	For Wi-Fi, ensure your router is on and within range. Re-enter the Wi-Fi password in the TV settings. For wired connection, check the Ethernet cable. Restart your router and the TV.
HDMI Port Malfunction	If an HDMI port stops working, try connecting the device to a different HDMI port. Ensure the HDMI cable is not damaged. If the issue persists across multiple devices and cables, contact customer support.
Laggy Performance / App Crashes	Ensure the TV has completed its startup processes (allow a few minutes after turning on). Close unused applications. Clear cache for problematic apps in settings. If issues persist, consider a factory reset (note: this will erase all personal data and settings).
