- Always ensure the umbrella is securely anchored. It is strongly recommended to use a weight base (sold separately) with the cross base provided for optimal stability.
- Do not use the umbrella in strong winds, heavy rain, or other severe weather conditions. Retract and secure the umbrella when not in use or during adverse weather.
- Keep children and pets away from the umbrella during operation (opening, closing, rotating, or tilting) to prevent injury.
- Avoid placing the umbrella near open flames or heat sources.
- Regularly inspect all parts for wear, damage, or loose connections. Do not operate if any part is damaged.
- Ensure proper clearance around the umbrella when rotating or tilting to avoid collision with other objects or structures.

6. MAINTENANCE

Proper maintenance will extend the life of your umbrella:

- **Cleaning:** The canopy is made of premium fabric that is UV resistant, water resistant, and fade resistant. For cleaning, hand wash only with mild soap and water. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** When not in use for extended periods, or during strong winds, gently close and secure the umbrella. Store it in a dry, protected area to prevent damage and prolong its lifespan.
- **Inspection:** Periodically check all bolts and connections to ensure they are tight. Inspect the fabric for any tears or damage.

7. TROUBLESHOOTING

If you encounter issues with your umbrella, consider the following common solutions:

- **Umbrella Not Opening/Closing Smoothly:** Check for any obstructions in the canopy or crank mechanism. Ensure the fabric is not caught in the ribs. Apply a silicone-based lubricant to moving parts if necessary.
- **Umbrella Instability:** Ensure the cross base is on a flat, level surface. Verify that a sufficient weight base is used and properly secured. Tighten all connections on the pole and base.
- **Difficulty Rotating:** Ensure the foot pedal is fully depressed when attempting to rotate the umbrella. Check for any debris or obstructions around the rotation mechanism.
- **Canopy Damage:** If the canopy is torn or significantly damaged, it may need to be replaced. Contact customer support for replacement options.
