Important Safety Information

Please read all safety warnings and instructions before using this appliance to avoid injury or damage. Keep this manual for future reference.

- **Electronic Tip-Over Safety Switch:** The heater is equipped with an electronic tip-over safety switch that automatically turns off the unit if it is accidentally knocked over. A phone notification will be sent to your device if this occurs.
- **Automatic Overheat Protection:** The heater will automatically shut off if it detects an internal temperature that could cause overheating.
- **Cool-Touch Housing:** The exterior housing is designed to remain cool to the touch during operation, reducing the risk of burns.
- **Self-Regulating Heating Element:** Ensures stable and safe heating performance.
- Always place the heater on a firm, level surface.
- Do not cover the heater or block its air inlets/outlets.
- Keep flammable materials at least 3 feet (0.9 meters) away from the heater.

Setup and Installation

1. **Unpack the Heater:** Carefully remove the heater from its packaging. Retain packaging for storage or future transport.
2. **Placement:** Place the heater on a stable, flat surface. Ensure there is at least 3 feet (0.9 meters) of clear space around the heater to allow for proper airflow and prevent fire hazards.
3. **Power Connection:** Plug the heater directly into a 110V AC wall outlet. Do not use extension cords or power strips.
4. **Download Atomi Smart App:** Download the free Atomi Smart app from the App Store (iOS) or Google Play Store (Android).
5. **Connect to Wi-Fi:**
   - Open the Atomi Smart app and create an account or log in.
   - Follow the in-app instructions to add a new device. The app will guide you through connecting the heater to your 2.4GHz Wi-Fi network.
   - Ensure your phone is connected to a 2.4GHz Wi-Fi network during the setup process.
6. **Voice Assistant Integration (Optional):**
   - Once connected to the Atomi Smart app, you can link your account with Amazon Alexa or Google Assistant through their respective apps.
   - Search for the "Atomi Smart" skill/action and enable it.
   - Follow the prompts to discover your new heater and assign it a name for voice commands (e.g., "Living Room Heater").

Maintenance and Care

Regular maintenance ensures optimal performance and longevity of your Atomi Smart WiFi Tower Heater.

- **Cleaning:**
  - Always unplug the heater and allow it to cool completely before cleaning.
  - Wipe the exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or solvents.
  - Do not immerse the heater in water or allow water to drip into the interior.

- **Dust Filter:** The heater includes a removable dust filter to help maintain air quality and unit efficiency.
  - Regularly check and clean the dust filter.
  - To remove, locate the filter cover (usually at the back or bottom of the unit), open it, and slide out the filter.
  - Clean the filter with a vacuum cleaner or rinse it under warm water. Ensure the filter is completely dry before reinserting.
- **Storage:** When not in use, store the heater in a cool, dry place, preferably in its original packaging, to protect it from dust and damage.

Troubleshooting

If you experience issues with your Atomi Smart WiFi Tower Heater, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Heater does not turn on.	Not plugged in; power outlet not working; tip-over switch activated; overheat protection activated.	Ensure the heater is securely plugged into a working 110V outlet. Check if the heater was tipped over and is now upright. Allow the unit to cool down if it overheated.
No heat output.	Incorrect mode selected; thermostat set too low.	Ensure the heater is in High or Low mode, not just Fan mode (if applicable). Increase the thermostat setting above the current room temperature.
Wi-Fi connection issues.	Incorrect Wi-Fi band (5GHz); weak signal; incorrect password; router issues.	Ensure your router is broadcasting a 2.4GHz Wi-Fi signal. Move the heater closer to the router. Re-enter Wi-Fi password in the app. Restart your router.
Voice control not working.	Incorrect device name; skill/action not enabled; internet connectivity issues.	Verify the device name in the Atomi Smart app and your voice assistant app. Ensure the Atomi Smart skill/action is enabled and linked. Check your internet connection.
Heater makes unusual noises.	Dust/debris in fan; internal component issue.	Unplug and clean the dust filter. If noise persists, contact customer support.

If the problem persists after attempting these solutions, please contact Atomi Smart customer service for further assistance.
