

BUNKER INDUST MCRT04H3-1-FRD

BUNKER INDUST Portable Tire Traction Mats

Model: MCRT04H3-1-FRD

INTRODUCTION

The BUNKER INDUST Portable Tire Traction Mats are engineered to assist in vehicle recovery when stuck in challenging terrains such as snow, ice, sand, or mud. These durable mats provide essential traction, preventing tire spin and enabling your vehicle to regain movement. This manual provides instructions for the proper use and care of your traction mats.

PRODUCT FEATURES

- **Enhanced Traction:** Provides maximum grip to prevent vehicle tires from spinning on snow, ice, or sand, facilitating recovery.
- **All-Weather Durability:** Constructed from materials highly resistant to UV, aging, chemicals, fatigue, and impact, ensuring reliable performance across various temperatures and conditions.
- **Upgraded Tungsten Steel Studs:** Features steel studs on the ground-facing side designed to firmly sink into the terrain, offering a more stable base for recovery.
- **User-Friendly Design:** Foldable for quick deployment and compact storage without the need for additional tools. An integrated handle enhances portability and comfort.
- **Portable Storage:** Includes a convenient carrying bag for easy transport and to maintain cleanliness within your vehicle. The compact design requires less storage space than traditional recovery boards.

SETUP AND PLACEMENT

PORTABLE DESIGN

Tire traction mats are foldable, you can load or fold it quickly without any tool. It is convenient for you to store it in a large backpack or in your car, and needs a smaller space in the car than boards

PACKAGE INCLUDE

Have a handy bag to easy for storage and carry. The bag will help to keep your car clean

1. **Assess the Situation:** Before deployment, ensure the area around the stuck wheel is clear of any large debris or obstacles that could hinder placement or cause damage.
2. **Position the Mat:** Place the traction mat firmly against the drive wheel's tread. Ensure the side with the tungsten steel studs is facing the ground to maximize grip.
3. **Optimal Placement:** For best results, position the mat directly in the path of the drive wheel, allowing the tire to engage with the mat's surface as it attempts to move.
4. **Multiple Mats:** If using multiple mats, place them sequentially to create a continuous path for the vehicle to drive onto stable ground.

OPERATING INSTRUCTIONS

UPGRADED TUNGSTEN STEEL

The side facing the ground has steel STUD easy to firmly sink into the ground to provide firmer base for recovery, and can also be used to get your vehicle unstuck

TOUGHER BUT LIGHTER

FRONT

BACK

- Made of TPR, flexible, strong and durable. This material has good friction with rubber tires and will not become hard and brittle in frozen or hot weather

Image: A vehicle using traction mats to recover from being stuck in sand.

1. **Gentle Acceleration:** Once the mats are positioned, slowly and gently apply throttle. Avoid sudden or aggressive acceleration, which can cause the tires to spin excessively, potentially damaging the mats or ejecting them.
2. **Maintain Steady Speed:** Drive slowly and steadily until the vehicle gains sufficient traction to move onto stable ground.
3. **Retrieve Mats:** Once the vehicle is clear of the stuck area and on stable ground, safely retrieve the traction mats.

MAINTENANCE

PRODUCT DIMENSION

Image: A BUNKER INDUST traction mat folded and stored in its dedicated carrying bag.

- **Cleaning:** After each use, clean the traction mats thoroughly to remove any accumulated mud, sand, snow, or other debris. Use water and a brush if necessary.
- **Inspection:** Regularly inspect the mats for any signs of wear, cracks, or damage. Check that all tungsten steel studs are securely in place. Replace mats if significant damage is observed to ensure optimal performance and safety.
- **Storage:** Store the cleaned and dried mats in their provided carrying bag. Keep them in a cool, dry place, away from direct sunlight, to prolong their lifespan and material integrity.

TROUBLESHOOTING

- **Vehicle Not Moving:** If the vehicle fails to gain traction, ensure the mats are correctly positioned directly under the drive wheels. Verify that the studded side is facing the ground.
- **Mats Ejecting:** Excessive tire spin can cause the mats to be thrown out. Reduce throttle input and apply power more gently.
- **Insufficient Grip:** Clear any additional debris or obstacles from around the tires and undercarriage. If available, consider using additional mats or repositioning the existing ones for a better angle of approach.

- **Damage to Mats:** Avoid prolonged tire spinning on the mats, as this can cause excessive wear or damage to the material and studs.

SPECIFICATIONS

Material	High Strength Engineering Rubber
Color	Black
Item Weight (per pair)	3.05 Kilograms (approx. 6.7 lbs)
Item Length (per mat)	11.61 Inches
Unit Count	2.0 Count (2 mats included)
Model Number	MCRT04H3-1-FRD
Included Components	Pair Tire Traction Mats
Recommended Uses	Off-Road Use

WARRANTY AND SUPPORT

For detailed warranty information, terms, and conditions, please refer to the official BUNKER INDUST website or contact their customer service department directly. Keep your purchase receipt as proof of purchase for any warranty claims.
