INTEX PureSpa Plus Bubble Massage Spa Set

Model: 28429EP

PRODUCT OVERVIEW

The INTEX PureSpa Plus Bubble Massage Spa Set provides a relaxing and therapeutic experience. It features advanced construction for durability and stability, a built-in hard water treatment system, and powerful bubble jets for a soothing massage. This manual provides essential information for setup, operation, and maintenance.

Key Features

- **FIBER-TECH BEAM CONSTRUCTION:** Innovative Fiber-Tech Technology offers superior structural stability while maintaining a comfortable surface for a luxurious and refreshing spa experience.
- **HARD WATER TREATMENT SYSTEM:** Built-in Hard Water Treatment System makes water gentler on skin, clothes and the entire spa system; hard water buildup limits water flow and reduces the life of your spa.
- **HEATED AIR BUBBLE TECHNOLOGY:** The Positive Temperature Coefficient (PTC) heater is designed to maximize heat transfer to the water, while ensuring the highest level of safety, performance, and longevity.
- **PREMIUM ACCESSORIES:** Includes 2 contoured headrests and a mood-setting multi-colored LED light (requires 3 AAA batteries, not included).

BUBBLE MASSAGE PureSpa Plus

FIBER-TECH® CONSTRUCTION

Inside, thousands of high-strength fibers fortify the spa's wall for durability and stability.

SETUP INSTRUCTIONS

Proper setup is crucial for the safe and efficient operation of your PureSpa Plus. Follow these steps carefully.

1. Site Selection and Preparation

1. Choose a flat, level surface free of sharp objects.
2. Ensure the location has access to a 120V AC power outlet.
3. Consider drainage for water changes and potential spills.

2. Inflation

Use the included air pump to inflate the spa body and the insulated cover. Do not over-inflate.

Video: A demonstration of the Intex Spa Control panel, showing how to operate various functions including heating and bubbles.

4. Filling the Spa

Fill the spa with water to the recommended level, typically indicated by a fill line inside the spa. The 4-person model has a capacity of 210 gallons.

OPERATING INSTRUCTIONS

Learn how to use the various features of your PureSpa Plus for optimal relaxation.

1. Control Panel Functions

The tilt-adjustable control panel allows you to customize your spa experience. Use the buttons to control heating, bubble jets, and filtration.

Image: Close-up of the tilt-adjustable control panel, showing the digital display and various function buttons.

2. Heating the Water

Press the heat button on the control panel to activate the PTC heater. The temperature range is 68°F to 104°F (20°C to 40°C). Heating time will vary based on ambient temperature and initial water temperature.

3. Activating Bubble Jets

The spa features 140 high-powered bubble jets for a relaxing massage. Press the bubble button on the control panel to activate them.

MAINTENANCE

Regular maintenance ensures the longevity and cleanliness of your PureSpa Plus.

1. Water Treatment

The built-in Hard Water Treatment System helps reduce calcium buildup. However, regular chemical treatment and testing of water quality are recommended to maintain proper pH and sanitation levels.

2. Filter Cartridge Replacement

Inspect and clean the filter cartridges regularly. Replace them as needed to ensure efficient filtration and water clarity.

Your browser does not support the video tag.

Video: Instructions on how to easily replace the spa filters, demonstrating the process for maintaining water quality.

3. Spa Cover Care

The energy-efficient spa cover helps retain heat and keep debris out. Keep the cover clean and ensure it is securely fastened when the spa is not in use.

Image: A diagram illustrating how the energy-efficient spa cover helps to insulate the spa and reduce heat loss.

TROUBLESHOOTING

This section addresses common issues you might encounter with your PureSpa Plus.

1. Leaks or Air Loss

If you notice air loss or water leaks, first check all valve connections and ensure they are tightly secured. Inspect the spa body for any punctures. Small punctures can often be repaired using the included patch kit.

Your browser does not support the video tag.

Video: A review discussing the durability of the spa, including how it has held up after patching and being moved, demonstrating its resilience.

2. Heating Issues

If the spa is not heating or heating slowly, ensure the filter is clean and water levels are adequate. Check for any error codes on the control panel and consult the full user manual for specific code meanings.

3. Bubble Jet Malfunction

If the bubble jets are not functioning correctly, check the power connection to the control unit and ensure the bubble function is activated on the panel.
