Zenna Home E76F5ALBN

Zenna Home Rustproof Adjustable Tension Shower Curtain Rod

Model: E76F5ALBN | Adjusts from 26 to 76 Inches | Brushed Nickel Finish

1. INTRODUCTION

This manual provides instructions for the proper installation, operation, and maintenance of your Zenna Home Rustproof Adjustable Tension Shower Curtain Rod. This product is designed for versatile use in various spaces, including shower enclosures, windows, and closets, offering a strong, tool-free tension mount solution.

The rod features rustproof aluminum construction and a brushed nickel finish, designed for durability and aesthetic appeal. It offers an adjustable length range from 26 to 76 inches, accommodating a wide variety of spaces without the need for drilling or permanent fixtures.

2. SAFETY INFORMATION

- Ensure the rod is securely installed and tensioned correctly before hanging any items. An improperly installed rod may fall, causing damage or injury.

- Do not overload the rod. While designed for a strong hold, excessive weight can compromise its stability.
- Keep small children away from the rod during installation to prevent accidental injury.
- This product is intended for indoor use only.

3. PACKAGE CONTENTS

Verify that all components are present before beginning installation:

- Adjustable Tension Rod (consisting of multiple interlocking segments)
- Decorative Finials (pre-attached to rod segments)
- Instruction Sheet

4. SETUP AND INSTALLATION

The Zenna Home tension rod is designed for easy, tool-free installation without drilling or causing damage to your walls. Follow these steps for a secure setup:

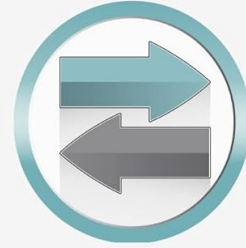

1. **Determine Desired Length:** Measure the width of the opening where the rod will be installed (e.g., shower, window, closet). The rod adjusts from 26 to 76 inches.
2. **Assemble Rod Segments:** Based on your measured length, select the appropriate rod segments (A, B, C) to achieve the desired approximate length. The rod is designed to be extended, not cut. Refer to the included instruction sheet for guidance on segment combinations for specific lengths.
3. **Extend and Position:** Hold the rod with one finial against one wall. Extend the rod by twisting and pulling the inner tube until it is slightly longer than the opening.
4. **Apply Tension:** Compress the rod slightly to fit it between the two walls. Once in position, release the compression to allow the internal spring mechanism to create tension against the walls. Twist the rod to further tighten and secure it. Ensure both finials are firmly pressed against the wall surface.
5. **Verify Stability:** Gently tug on the rod to confirm it is securely in place and does not slip. Adjust tension as needed.

**NO TOOLS
NO DRILLING
NO DAMAGE**

5. OPERATING INSTRUCTIONS

Once installed, the Zenna Home tension rod functions as a stable support for various items. Its primary use is to hold shower curtains, but its versatility allows for other applications:

- **Shower Curtain Support:** Hang your shower curtain and liner using appropriate rings or hooks.
- **Window Curtains:** Use the rod to hang window treatments without drilling into frames or walls.
- **Closet Organization:** Install the rod inside a closet to create additional hanging space for clothes or accessories.

**GREAT FOR
WINDOWS**

**OR ORGANIZING
YOUR CLOSET!**

6. MAINTENANCE

To ensure the longevity and appearance of your Zenna Home tension rod, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the rod periodically with a soft, damp cloth. For stubborn spots, a mild soap solution can be used. Avoid abrasive cleaners or scouring pads, as these can damage the brushed nickel finish.
- **Rustproof Feature:** The rod is constructed from rustproof aluminum, ensuring it will not rust over time, even in humid bathroom environments. No special rust prevention treatments are required.
- **Tension Check:** Periodically check the tension of the rod to ensure it remains securely in place. Re-adjust if necessary.

7. TROUBLESHOOTING

If you encounter issues with your tension rod, consider the following:

- **Rod Keeps Falling:**
 - **Insufficient Tension:** The most common reason for a falling rod. Ensure the rod is extended

sufficiently to create firm pressure against both walls. Twist the rod to increase tension.

- **Slippery Surface:** If installing on very smooth or wet tile, the finials may slip. Ensure the wall surface is clean and dry. Some surfaces may require a stronger tension setting.
- **Overloaded:** Reduce the weight hanging on the rod.

- **Difficulty Adjusting Length:**

- Ensure the internal mechanism is not jammed. Gently twist and pull/push the rod segments.
- Verify you are using the correct combination of rod segments for your desired length, as per the instruction sheet.

8. SPECIFICATIONS

Feature	Detail
Model Number	E76F5ALBN
Adjustable Length	26 to 76 inches
Material	Rustproof Aluminum
Finish	Brushed Nickel
Mounting Type	Tension Mounted
Item Weight	499 g
Product Dimensions	127 x 66.04 x 66.04 cm (fully extended)

26 - 76 in

50 INCHES OF ADJUSTABILITY

Fits all standard tub or stall
shower enclosures
