## Troubleshooting

If you encounter issues with your daybed, refer to the following common problems and solutions:

- **Trundle does not slide smoothly:**

- Ensure the mattress on the trundle is the correct size (Twin) and not too thick, which might prevent it from fitting under the main bed.
- Check for any obstructions or debris under the main bed or around the trundle wheels.
- Verify that the trundle wheels are securely attached and functioning correctly.
- **Bed feels unstable or wobbly:**
  - Recheck all assembly connections. Ensure all bolts and screws are fully tightened.
  - Confirm that the bed is placed on a flat, level surface.
- **Missing or damaged hardware:**
  - Carefully re-examine all packaging for any overlooked hardware.
  - Contact Bellemave customer support for replacement parts. Provide your model number and a description of the missing items.
- **Charging station not working:**
  - Ensure the bed's power cord is securely plugged into a functional wall outlet.
  - Check if the wall outlet itself is receiving power by testing it with another device.
  - Verify that the charging station unit is properly connected within the bed frame.
