Quechua 5.2 AIR SECONDS FRESH&BLACK Air Tent 5 Person Instruction Manual

1. INTRODUCTION

This manual provides essential instructions for the safe and effective use of your Quechua 5.2 AIR SECONDS FRESH&BLACK Air Tent. Please read this guide thoroughly before attempting to set up or use the tent. Proper setup and maintenance will ensure a comfortable and durable camping experience.

The Quechua 5.2 AIR SECONDS FRESH&BLACK tent is designed for 5 people, featuring an innovative inflatable structure for quick setup and the unique FRESH&BLACK fabric technology for superior heat reduction and darkness inside the tent, even during daylight hours.

2. SAFETY INFORMATION

- **Fire Safety:** Keep all flame and heat sources away from the tent fabric. The tent is made of flame-resistant material but is not fireproof.
- **Ventilation:** Ensure adequate ventilation to prevent condensation and carbon monoxide buildup if using heating or cooking appliances (not recommended inside the tent).
- **Weather Conditions:** Do not set up the tent under trees during thunderstorms. In strong winds, ensure all guy ropes are securely anchored and the tent is properly tensioned.
- **Children:** Keep children away from the tent during setup and takedown to prevent injury.
- **Site Selection:** Choose a flat, clear area free of sharp objects. Avoid setting up on slopes or in depressions where water might collect.

3. PACKAGE CONTENTS

Verify that all components are present before beginning setup:

- Quechua 5.2 AIR SECONDS FRESH&BLACK Tent (outer flysheet and inner sleeping compartments)
- Integrated inflatable air beams
- Tent stakes/pegs
- Guy ropes (pre-attached or separate)
- Repair kit (patches)

- Carry bag
- Inflation pump (may be sold separately or included)

4. SETUP INSTRUCTIONS

The AIR SECONDS system allows for rapid inflation and setup.

1. **Unpack and Lay Out:** Remove the tent from its carry bag and lay it flat on your chosen campsite. Ensure the ground sheet is spread out evenly.
2. **Identify Inflation Points:** Locate the inflation valves on the air beams.
3. **Inflate Air Beams:** Using a suitable pump (not always included), inflate each air beam until it is firm. The tent structure will begin to take shape. Do not over-inflate.

Image: The Quechua 5.2 AIR SECONDS FRESH&BLACK Air Tent laid flat on the ground before inflation, showing the deflated air beams and an inflation pump next to it.

4. **Secure the Tent:** Once inflated, stake down the four corners of the tent.
5. **Attach Guy Ropes:** Extend and secure all guy ropes to the ground using stakes. Adjust tension to ensure stability.

5. OPERATING AND USAGE

Your Quechua 5.2 AIR SECONDS FRESH&BLACK tent offers several features for enhanced comfort.

- **FRESH&BLACK Technology:** The patented FRESH&BLACK flysheet significantly reduces heat inside the tent during hot weather and provides a high level of darkness (up to 7 lux inside under 100,000 lux sunlight), allowing for better sleep.
- **Ventilation:** Utilize the multiple vents and openings to manage airflow and minimize condensation. Keep vents open, especially in humid conditions.
- **Waterproofing:** The tent has been laboratory tested to withstand tropical rain conditions (200 L/m²/hour). Ensure all zippers are fully closed during rain.
- **Living Space:** The tent features a spacious living area and two separate sleeping compartments, each measuring 210cm x 140cm, suitable for two people. The living area is approximately 7.9 m².

6. MAINTENANCE

- **Cleaning:** Clean the tent with a sponge and soapy water. Avoid using harsh detergents or high-pressure washers,

as these can damage the fabric's waterproofing.

- **Drying:** Always ensure the tent is completely dry before packing it away to prevent mold and mildew. If you must pack it wet, unpack and dry it as soon as possible.
- **Storage:** Store the tent in a dry, cool place, away from direct sunlight and extreme temperatures.
- **Air Beams:** Check air beams for punctures or leaks before and after each use. Use the provided repair kit for minor damages.

7. TROUBLESHOOTING

- **Tent Not Inflating:** Check that all inflation valves are securely closed and the pump is properly attached. Inspect air beams for visible damage.
- **Condensation Inside:** Ensure all ventilation points are open. Condensation is natural in tents, especially in humid conditions or with many occupants.
- **Water Leaks:** Check for small holes or tears in the flysheet. Ensure all zippers are fully closed and seams are intact. Use the repair kit for small punctures.
- **Tent Instability:** Verify that all stakes are firmly in the ground and guy ropes are properly tensioned and secured.

8. SPECIFICATIONS

Feature	Detail
Brand	Quechua
Model Number	8584565
Capacity	5 Person
Weight	21.8 kg
Seasons	4 Seasons
Waterproof	Yes (Tested at 200 L/m²/hour)
Assembly Type	Inflatable (AIR SECONDS)
Special Features	FRESH&BLACK technology for heat reduction and blackout

9. WARRANTY AND SUPPORT

For warranty information, product support, or to purchase replacement parts, please refer to the official Quechua website or contact your retailer. Keep your proof of purchase for any warranty claims.
