Logitech 956-000007

Logitech Bolt USB-A Receiver Instruction Manual

Model: 956-000007 | Brand: Logitech

INTRODUCTION

The Logi Bolt USB-A Receiver provides a secure, high-performance wireless connection between your Logi Bolt wireless mouse, keyboard, or combo device and your computer. Designed for reliability, it ensures a stable connection even in congested wireless environments. This manual provides essential information for setting up, operating, and maintaining your receiver.

WHAT'S IN THE BOX

- Logi Bolt USB-A Receiver

SETUP GUIDE

Follow these steps to set up your Logi Bolt USB-A Receiver:

1. **Insert the Receiver:** Plug the Logi Bolt USB-A Receiver into an available USB-A port on your computer. The receiver is designed to be discrete and can remain plugged in.

2. **Install Logitech Software:** For optimal performance and to pair multiple devices, download and install the Logitech Options+ software from the official Logitech website. This software allows you to manage your Logi Bolt devices.
3. **Pair Your Devices:** Open the Logitech Options+ software. Follow the on-screen instructions to pair your Logi Bolt compatible wireless mouse, keyboard, or other devices with the receiver. The Logi Bolt receiver supports pairing up to six compatible devices simultaneously.

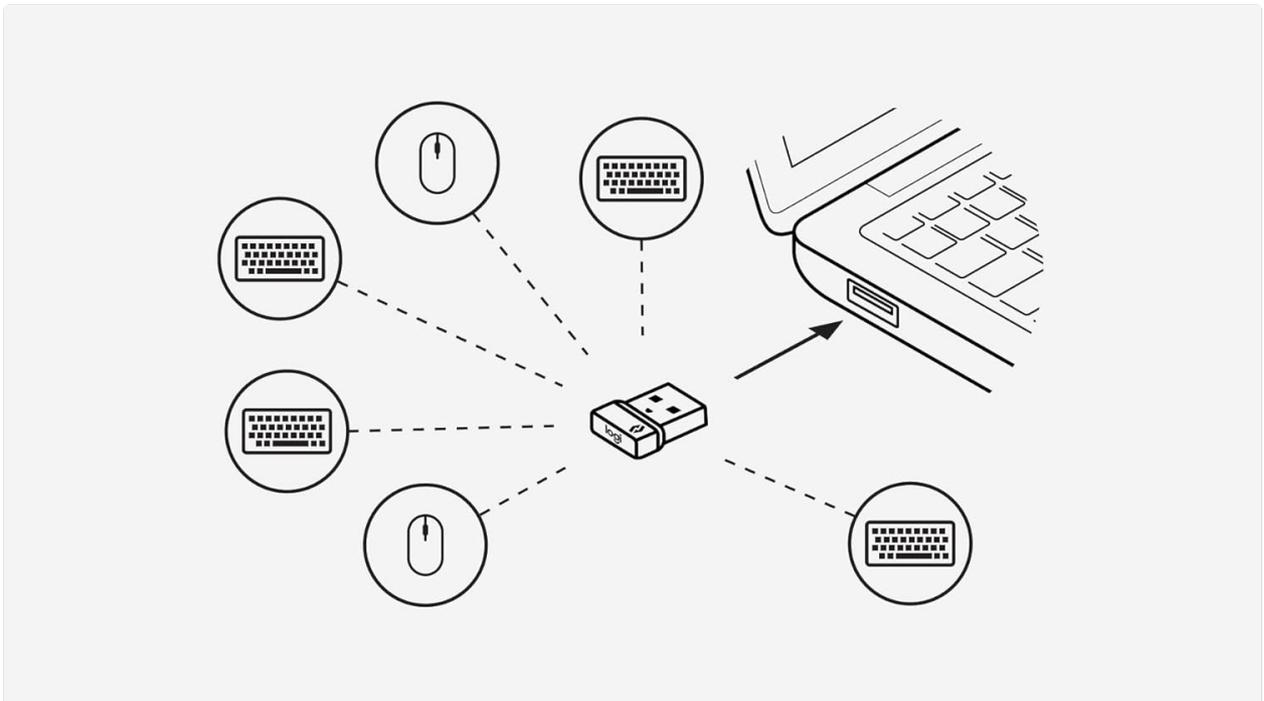

Image: An illustration demonstrating how a single Logi Bolt receiver can connect to up to six compatible wireless mice and keyboards.

4. **Compatibility:** The Logi Bolt receiver is compatible with Windows, macOS, Linux, and Chrome OS.

OPERATING INSTRUCTIONS

Once set up, the Logi Bolt receiver provides a reliable and secure wireless connection:

- **Seamless Connectivity:** Your paired devices will automatically connect to the receiver when within range.
- **Extended Range:** Enjoy a strong, secure, no-drop-off connection for up to 10 meters (33 feet), even in busy wireless environments.
- **Multi-Computer Use:** The receiver is ideal for multi-computer workflows. You can connect to two different computers with a strong, secure Logi Bolt wireless connection on both devices. Use it with your Flow-enabled Logi Bolt mouse for seamless transitions between systems.

MAINTENANCE

To ensure the longevity and optimal performance of your Logi Bolt USB-A Receiver:

- **Keep Clean:** Periodically wipe the receiver with a soft, dry cloth to remove dust and debris.
- **Avoid Physical Damage:** While designed to be durable, avoid dropping the receiver or exposing it to excessive force.
- **Store Properly:** When not in use, store the receiver in a safe place to prevent loss or damage.

TROUBLESHOOTING

If you encounter issues with your Logi Bolt USB-A Receiver, consider the following:

- **Device Not Connecting:**
 - Ensure the receiver is fully inserted into a working USB-A port.
 - Verify that your wireless device is powered on and within the 10-meter range of the receiver.
 - Re-pair your device using the Logitech Options+ software. Sometimes, a simple re-pairing can resolve connectivity issues.
- **Interference:**
 - Move the receiver closer to your wireless device.
 - Avoid placing the receiver near other wireless devices or large metal objects that might cause interference.
- **Using with Non-PC Devices (e.g., NVRs):**
 - If attempting to use the receiver with a device like a Network Video Recorder (NVR), it is often necessary to first pair the mouse/keyboard with the receiver on a PC or Mac using the Logitech Options+ software. Once paired, the receiver can then be moved to the NVR, and the connection should function.
