BOFENG 01

BOFENG Queen Size Bed Frame Instruction Manual

Model: 01 | Brand: BOFENG

1. Introduction

This manual provides detailed instructions for the assembly, usage, maintenance, and troubleshooting of your new BOFENG Black Queen Size Bed Frame with Wood Headboard. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

2. Safety Information

- **Weight Limit:** Do not load more than 890 pounds onto the bed frame. Exceeding this limit may compromise the structural integrity and lead to damage or injury.
- **Assembly:** Follow assembly instructions carefully to prevent instability or collapse. Ensure all bolts and fasteners are securely tightened.
- **Children:** Keep small parts away from children during assembly to prevent choking hazards.
- **Maintenance:** Regularly check all connections to ensure they remain tight. Loose connections can lead to instability and noise.
- **Placement:** Place the bed frame on a level surface to ensure stability.

3. Package Contents

Before assembly, verify that all components are present and undamaged. If any parts are missing or damaged,

please contact customer support.

- Headboard (with wood panel)
- Footboard (with wood panel)
- Side Rails (Left and Right)
- Center Support Beam
- Metal Slats
- Support Legs
- Hardware Pack (bolts, washers, nuts, Allen wrench)
- Installation Manual

4. Setup and Assembly Instructions

Assembly is designed to be straightforward, with all necessary tools included. Please follow these steps carefully.

1. **Unpack and Identify Parts:** Carefully remove all components from the packaging. Lay them out on a clean, soft surface (like a carpet) to prevent scratches. Identify each part using the provided parts list in your installation manual.
2. **Assemble Headboard and Footboard:** Attach the metal frame components to the wood panels for both the headboard and footboard as per the detailed diagrams in your manual. Ensure all bolts are finger-tight at this stage.
3. **Connect Side Rails:** Attach the side rails to the assembled headboard and footboard. Use the provided bolts and tighten them securely. Ensure the bed frame is square and stable.
4. **Install Center Support Beam and Legs:** Place the center support beam in the designated slots along the length of the bed frame. Attach any required support legs to the center beam and the frame.
5. **Place Metal Slats:** Position the metal slats across the bed frame. The non-slip strips on the slats help keep them in place. Ensure each slat is properly seated in its groove.
6. **Final Tightening:** Once all components are in place, go back and securely tighten all bolts and fasteners using the provided Allen wrench. Do not overtighten.

5. Operating (Usage)

Your BOFENG bed frame is designed for optimal support and comfort without the need for a box spring.

- **Mattress Placement:** Place your Queen size mattress directly onto the metal slats. The robust steel slat system provides ample support.
- **Under-bed Storage:** The frame offers 10.6 inches of clearance underneath, providing convenient space for storage bins or other items.
- **Noise-Free Design:** The integrated non-slip strips and plastic foot plugs are engineered to minimize noise during use.

6. Maintenance

Proper maintenance will extend the life and performance of your bed frame.

- **Cleaning:** Wipe the metal frame with a damp cloth and mild detergent. For the wood headboard/footboard, use a dry or slightly damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Fastener Check:** Periodically (e.g., every 3-6 months) check all bolts and screws to ensure they are tight. Re-tighten if necessary to maintain stability and prevent squeaking.
- **Inspection:** Inspect the slats and support legs for any signs of wear or damage. Replace any damaged parts immediately.

7. Troubleshooting

If you encounter any issues with your bed frame, refer to the following common solutions:

Problem	Possible Cause	Solution
Bed frame squeaks or makes noise	Loose bolts or connections; slats not properly seated.	Ensure all bolts are securely tightened. Check that all metal slats are correctly positioned within their grooves. The anti-noise plastic plugs should be fully engaged.

Problem	Possible Cause	Solution
Bed frame feels unstable or wobbly	Uneven floor surface; loose connections; incorrect assembly.	Verify the bed frame is on a level surface. Re-tighten all bolts. Review assembly instructions to ensure all parts are correctly installed.
Mattress slides on the frame	Lack of friction between mattress and slats.	Consider placing a non-slip mat between the mattress and the slats.

8. Specifications

Feature	Detail
Brand	BOFENG
Model Number	01
Colour	Black+brown Board
Product Dimensions	211 x 154 x 88.5 cm (83.07L x 60.63W x 34.84H inches)
Material	Alloy Steel, Metal, P2 Grade MDF Board
Item Weight	24.5 kg
Special Features	No Box Spring Needed, Pre-drilled Holes, Squeak Resistant, Stain Resistant, 10.6 inch Under-bed Storage
Compatible Mattress Size	Queen
Max Load Capacity	890 pounds
