Livpure Liv-Glitz-DX

Livpure Glitz Pure UV+UF Water Purifier User Manual

Model: Liv-Glitz-DX | Brand: Livpure

1. INTRODUCTION

This manual provides essential information for the installation, operation, and maintenance of your Livpure Glitz Pure UV+UF Water Purifier. Please read these instructions carefully before using the appliance to ensure safe and efficient operation. This water purifier is designed for municipal water sources with a Total Dissolved Solids (TDS) level up to 250 ppm.

2. KEY FEATURES

- **Multi-Stage Purification:** The Livpure Glitz DX water purifier employs a multi-stage advanced purification process to ensure clean drinking water. It has a 7-liter storage capacity, providing a continuous supply of purified water. This machine is suitable for input water with TDS less than 500 mg/litre.
- **UV+UF Purification Technology:** This technology effectively removes bacteria and improves water clarity by eliminating fine suspended impurities.
- **Carbon Block Filter:** The carbon block filter technology adsorbs undesirable taste, color, and odor-causing organic compounds, enhancing the overall taste of the water.
- **Super Sediment Filter:** A pre-installed Super Sediment Filter removes physical particulates such as dirt, dust, and mud from the water, protecting the subsequent purification stages and ensuring consistent water quality.
- **UV Sterilization:** Optimal Ultraviolet radiation disinfects the water by neutralizing disease-causing bacteria, viruses, and protozoa, safeguarding against microbiological threats.
- **Ultra Filtration:** Ultra Filtration disinfects water by removing bacteria and viruses without stripping beneficial minerals, ensuring pure and safe water.

3. SPECIFICATIONS

Feature	Specification
Brand	Livpure
Model Name	Liv-Glitz-DX(UV+UF)
Purification Method	Ultra Filtration, Ultraviolet
Capacity	7 litres
Installation Type	Wall-Mounted
Product Dimensions (L x W x H)	29.5L x 25.5W x 30.5H Centimeters
Item Weight	6.6 Kilograms
Material	ABS Plastic
Power Source Type	Corded Electric
Supported Water TDS Level Maximum	200 PPM (Recommended for municipal water)
Maximum Flow Rate	15 Cubic Centimeters Per Minute
What's in the box?	User Manual

Adaptable to Any Water Source

The water purifier has an RO-TDS Membrane for universal water purification from any water source. Whether it is the tap water from a borewell or tanker supply, it filters water to meet quality standards

4. SETUP AND INSTALLATION

For optimal performance and safety, professional installation is recommended. Please ensure the following conditions are met before installation:

1. **Unboxing:** Carefully remove the purifier from its packaging and check for any damage or missing parts. Refer to the 'What's in the box?' section in specifications.
2. **Location:** Choose a suitable wall-mounted location in your kitchen, close to a municipal water inlet and a power outlet. Ensure sufficient space around the unit for maintenance.
3. **Water Connection:** Connect the purifier to the municipal water supply line. Ensure all connections are secure to prevent leaks.
4. **Power Connection:** Plug the power cord into a grounded electrical outlet.
5. **Initial Flush:** Before first use, flush the system as per the installer's instructions or by dispensing a few liters of water to remove any manufacturing residues.

5. OPERATION

Operating your Livpure Glitz Pure UV+UF Water Purifier is straightforward:

1. **Power On:** Ensure the purifier is connected to a power source and switched on. The unit will automatically begin the purification process and fill the storage tank.
2. **Water Dispensing:** To dispense purified water, simply press or turn the tap located at the front of the unit.
3. **Indicators:** Observe the indicator lights on the unit for power status and purification progress. Refer to the specific indicator guide in your detailed product manual for light meanings.

6. MAINTENANCE

Regular maintenance ensures the longevity and efficiency of your water purifier:

- **Filter Replacement:** The Super Sediment Filter, Carbon Block Filter, and UF membrane require periodic replacement. The

frequency depends on water quality and usage. Consult your detailed product manual or service provider for recommended replacement schedules.

- **UV Lamp Replacement:** The UV lamp has a limited lifespan and should be replaced as recommended by the manufacturer to ensure effective sterilization.
- **Cleaning:** Regularly wipe the exterior of the purifier with a soft, damp cloth. For internal tank cleaning, it is advisable to contact authorized service personnel.

Figure 7: Internal components of the Livpure Glitz UV+UF Water Purifier, including filters that require periodic maintenance.

7. TROUBLESHOOTING

If you encounter any issues, refer to the following common troubleshooting steps:

- **No Water Flow:** Check if the water supply valve is open and if the power supply is connected. Ensure there are no kinks in the water inlet pipe. Clogged filters can also restrict water flow.
- **Bad Taste or Odor:** This often indicates that the carbon filter needs replacement. Ensure the initial flush was performed

correctly.

- **Leakage:** Immediately turn off the water supply and power. Check all connections for tightness. If the leak persists, contact customer support.
- **Indicator Lights Not Working:** Verify the power connection. If the issue continues, there might be an electrical fault requiring professional inspection.

For complex issues, always contact authorized service personnel.

8. WARRANTY AND SUPPORT

Your Livpure Glitz Pure UV+UF Water Purifier comes with a **1-year manufacturer warranty** from the date of purchase. This warranty covers manufacturing defects under normal use conditions.

For warranty claims, service requests, or technical assistance, please contact Livpure customer support. Free installation is provided with no hidden charges.
