SPY Optic Cyrus RX Prescription Ophthalmic Eyeglass Frames User Manual

Model: Cyrus

INTRODUCTION

Thank you for choosing SPY Optic Cyrus RX Prescription Ophthalmic Eyeglass Frames. These frames are designed for durability and style, suitable for prescription lenses. The Cyrus model is known for its distinct styling and subtle beveled details, crafted to fit large faces or those seeking a bold aesthetic. This manual provides essential information for the proper setup, use, maintenance, and care of your new eyewear frames.

PRODUCT OVERVIEW

The SPY Optic Cyrus frames are handcrafted from acetate, featuring high-quality spring hinges for a secure and comfortable fit. They are available in two sizes to accommodate various face shapes.

Image: Side view of the SPY Optic Cyrus eyeglass frames, showing the temple arm and the subtle micro-cross detail near the hinge.

SETUP

- 1. Prescription Lens Installation:** These frames are designed for prescription ophthalmic lenses. Take your new SPY Optic Cyrus frames to a qualified optician for professional lens installation. Ensure the optician is aware of the frame material and design to prevent damage during the process.
- 2. Initial Fitting:** After lens installation, your optician will perform an initial fitting to ensure the frames sit comfortably and correctly on your face. This includes adjusting the nose pads and temple arms for optimal alignment.

OPERATING (WEARING)

- **Putting On/Taking Off:** Always use both hands to put on and take off your eyeglasses. This helps maintain the frame's shape and prevents stress on the hinges and temple arms.
- **Proper Fit:** The frames should rest comfortably on your nose without slipping and the temple arms should extend straight back to your ears without causing pressure. If the fit feels loose or too tight, consult your optician for adjustments.
- **Storage:** When not in use, store your eyeglasses in a protective case to prevent scratches and damage. Avoid placing them face down on surfaces.

MAINTENANCE

- **Cleaning:** Clean your frames regularly with a soft, lint-free cloth and a cleaning solution specifically designed for eyeglasses. Avoid using harsh chemicals, paper towels, or clothing, as these can scratch the lenses and damage the frame finish.
- **Hand Wash Only:** As per product specifications, the frames should be hand washed if necessary. Use mild soap and lukewarm water, then rinse thoroughly and dry with a soft cloth.
- **Avoid Extreme Temperatures:** Do not expose your eyeglasses to extreme heat (e.g., leaving them on a car dashboard in direct sunlight) or extreme cold, as this can warp the frame material.
- **Regular Check-ups:** Periodically check screws and hinges. If any parts become loose, visit your optician for professional tightening or repair.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Frames feel loose or slip down nose.	Adjustments needed to nose pads or temple arms.	Visit your optician for professional fitting and adjustments.
Frames feel too tight or cause pressure.	Adjustments needed to temple arms or bridge.	Visit your optician for professional fitting and adjustments.
Lenses appear scratched or dirty.	Improper cleaning methods or storage.	Clean with appropriate solution and soft cloth. Store in a protective case.
Hinges are loose.	Normal wear and tear.	Visit your optician to have the screws tightened.
