-
- **Slower Charging:** When charging multiple devices simultaneously, the total wattage is distributed, which may result in slower charging speeds for individual devices. For maximum speed on a single device, use the USB-C1 port.
 - **Overheating:** The charger is designed with over-heating protection. While it may become warm during heavy use, especially when charging multiple devices, it is built to dissipate heat safely and prevent damage.
 - **Device Not Charging:** Ensure the charger is properly plugged into the wall outlet and the charging cable is securely connected to both the charger and your device. Verify that your device is compatible with the charger's output specifications.
