## OPERATING INSTRUCTIONS

---

Your Vanity Art cabinet is designed for straightforward use with its soft-closing drawers.

### Using the Drawers

To open a drawer, gently pull the handle. To close, push the drawer until the soft-closing mechanism engages, allowing it to close smoothly and quietly without slamming. Avoid forcing the drawers open or closed, as this can damage the slides or the soft-closing feature.

## MAINTENANCE

---

Proper care will ensure the longevity and appearance of your Vanity Art cabinet.

### Cleaning

- **General Cleaning:** Wipe the cabinet surfaces with a dry, soft cloth. For light dirt, a slightly damp cloth can be used, followed immediately by a dry cloth to prevent moisture damage.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, strong detergents, or solvents, as these can damage the finish of the engineered wood.
- **Spills:** Clean up spills immediately to prevent staining or water damage, especially on the engineered wood surfaces.

## Drawer Slides

The soft-closing drawer slides are designed for durability. If you notice any stiffness over time, ensure no debris is obstructing the slides. Lubrication is generally not required for these mechanisms.

## TROUBLESHOOTING

This section addresses common issues you might encounter with your vanity cabinet.

### Assembly Challenges

- **Vague Instructions:** If the provided instructions are unclear, carefully examine the diagrams and compare them to your components. Online resources or the manufacturer's website may offer additional visual guides.
- **Missing or Damaged Hardware:** Immediately inspect all hardware upon unboxing. If any parts are missing or damaged, contact Vanity Art customer support for replacements before proceeding with assembly. Do not attempt to substitute parts unless explicitly instructed.
- **Misaligned Pilot Holes:** If pilot holes are misaligned or absent, use caution. It is recommended to contact customer support for guidance. If you proceed with drilling, use an appropriate drill bit size and depth stop to avoid splitting the wood or drilling through surfaces.

### Drawer Operation Issues

- **Stiff Drawers:** Ensure the drawer slides are correctly installed and aligned. Check for any obstructions within the slides or the drawer tracks. Verify that the cabinet frame is square and level.
- **Drawers Not Closing Softly:** Confirm that the soft-closing mechanism on the slides is engaged and not damaged. Re-check the installation of the drawer slides and ensure they are fully extended and retracted during testing.

### Product Damage
