

Evajoy EJ-HF021

EVAJOY 118" x 72" x 20" Inflatable Above Ground Pool User Manual

Model: EJ-HF021

1. INTRODUCTION

Thank you for choosing the EVAJOY Inflatable Above Ground Pool. This manual provides essential information for the safe and efficient setup, operation, and maintenance of your pool. Please read all instructions carefully before use and retain this manual for future reference.

2. SAFETY INFORMATION

WARNING: Failure to follow these instructions can result in serious injury or death.

- Always supervise children in and around the pool.
- Do not dive or jump into the pool.
- Ensure the pool is set up on a level, stable surface free of sharp objects.
- Empty the pool completely when not in use to prevent accidental drowning.
- Keep children away from the pool when it is being filled or drained.
- Do not allow rough play or climbing on the pool walls.
- This pool is designed for recreational use only.

3. PACKAGE CONTENTS

Verify that all items are present in the package:

- 1 x EVAJOY Inflatable Pool (Model: EJ-HF021)

- 2 x Repair Patch
- 1 x User Guide (this manual)

4. SETUP INSTRUCTIONS

1. **Choose a Location:** Select a flat, level area in your garden or backyard. Ensure the ground is clear of any sharp objects, debris, or uneven surfaces that could damage the pool.
2. **Unfold the Pool:** Carefully remove the pool from its packaging and unfold it on the chosen surface. Spread it out completely, ensuring the bottom is flat and free of wrinkles.
3. **Inflate the Air Chambers:** The EVAJOY pool features three individual air chambers for enhanced stability. Locate the inflation valves on each chamber.

Image: The three individual air chambers of the EVAJOY inflatable pool, highlighting the inflation valves and the speedy 3-5 minute inflation time.

Use an electric air pump (not included) to inflate each chamber. Inflate until each chamber is firm to the touch but not over-inflated. Over-inflation can cause damage. The inflation process typically takes 3-5 minutes.

4. **Fill with Water:** Once all chambers are inflated, begin filling the pool with water. Fill to the recommended water level, which is approximately 20 inches high. The pool has a capacity of 312 gallons.

Perfect Family Pool

Plenty of room for the whole family to chill

5. OPERATING INSTRUCTIONS

The EVAJOY Inflatable Pool is designed for family fun and can accommodate up to 2 adults and 3-5 children (ages 3+) comfortably. Its durable 0.4mm PVC hull provides a sturdy structure for play.

The Ultimate Fun Fiesta

Dive into an unforgettable summer experience

Image: A child enjoying the EVAJOY inflatable pool, demonstrating its suitability for active play.

Beyond a swimming pool, this versatile product can also be used as a ball pit, sand pit, fishing pond, or toy pool, making it suitable for both indoor and outdoor activities.

Indoor Ball Pit

Doubles as a ball pit to use for playtime indoors

6. MAINTENANCE

6.1. Cleaning

Regularly clean the pool to maintain water quality and hygiene. Use mild soap and water for cleaning the PVC surfaces. Rinse thoroughly.

6.2. Draining

The pool features a 90° vertical drain pipe to facilitate efficient water outflow. Open the drain plug located at the bottom of the pool to empty the water. Ensure the area where the water drains is suitable.

6.3. Repairs

In case of minor punctures, use the included repair patches. Clean and dry the damaged area thoroughly before applying the patch according to the patch instructions.

6.4. Storage

After use, completely drain and clean the pool. Allow it to dry thoroughly to prevent mold and mildew. Deflate all air chambers and fold the pool neatly. Store in a cool, dry place away from direct sunlight and sharp objects.

7. TROUBLESHOOTING

7.1. Pool Not Holding Air

- **Check Valves:** Ensure all inflation valves are securely closed after inflation.
- **Inspect for Punctures:** Visually inspect the pool surface for any holes or tears. Apply a repair patch if a puncture is found.
- **Over-inflation:** Avoid over-inflating the chambers, as this can stress the seams and lead to leaks.

7.2. Pool Not Draining Properly

- **Check Drain Plug:** Ensure the 90° vertical drain pipe is fully open and not obstructed.
- **Level Surface:** If the pool is not on a perfectly level surface, water may not drain completely from one side. Adjust the pool's position if possible.

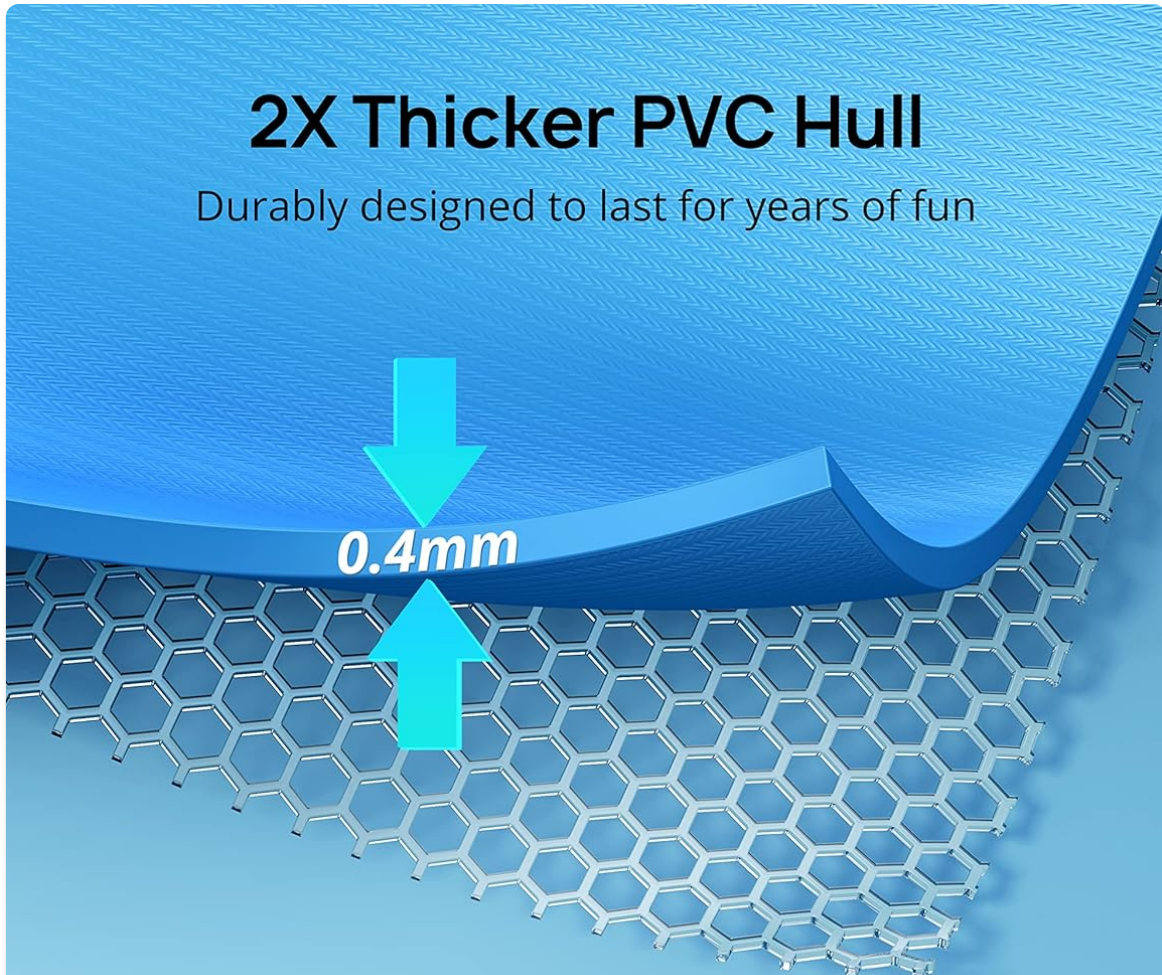

8. SPECIFICATIONS

Feature	Detail
Brand	Evajoy
Model Number	EJ-HF021
Product Dimensions	118"L x 72"W x 20"H
Material	Polyvinyl Chloride (PVC)
PVC Thickness	0.4mm (2X Thicker Hull)
Capacity	312 Gallons
Air Chambers	3 Individual Chambers
