Zinus EU-FPPST2-12G

Zinus Maddon Ottoman Gas Lift Bed Frame 160x200 cm - User Manual

Model: EU-FPPST2-12G

1. Introduction

Thank you for choosing the Zinus Maddon Ottoman Gas Lift Bed Frame. This bed frame is designed to provide both comfort and practical storage solutions for your bedroom. Its hydraulic lift mechanism offers easy access to a spacious under-bed storage area, making it ideal for optimizing space in smaller homes or apartments. The upholstered design adds a modern and minimalist aesthetic to any decor.

2. Safety Warnings

- **Maximum Weight Capacity:** Do not exceed the maximum load capacity of 318 kg (700 lbs) for this 160x200 cm bed frame.
- **Pinch Points:** Exercise caution and keep hands clear of pinch points when operating the hydraulic lift function.
- **Assembly:** Always follow the assembly instructions carefully. Two people are recommended for safe and efficient assembly.
- **Gas Lifts:** The gas lift pistons are designed to operate under the weight of a mattress. Do not attempt to compress them by hand without the mattress in place, as this may require significant force and could cause injury.

3. Package Contents

All necessary parts, assembly tools, and detailed instructions are conveniently located within the zippered compartment at the back of the headboard. Please ensure all components are present before beginning assembly.

4. Setup and Assembly

The Zinus Maddon bed frame is designed for straightforward assembly. All required tools and step-by-step instructions are included in the headboard's zippered compartment. We recommend two adults for assembly, which typically takes less than one hour.

1. Unzip the compartment at the back of the headboard to retrieve all parts, tools, and the instruction manual.
2. Follow the provided step-by-step instructions carefully. Ensure all bolts are securely tightened.
3. Once the frame is assembled, place your mattress onto the slat foundation. The mattress weight is crucial for the proper function of the gas lift mechanism.

5. Operating Instructions

5.1. Using the Gas Lift Storage

The Zinus Maddon bed frame features a hydraulic gas lift system for easy access to under-bed storage. To open the storage compartment:

1. Ensure there are no objects on the bed that could fall or obstruct the lifting mechanism.
2. Grasp the handle or edge of the mattress platform firmly.
3. Lift the platform upwards. The hydraulic pistons will assist in raising and holding the platform in an open position.
4. To close, gently pull the platform downwards. The pistons will guide it back into place. Ensure hands and fingers are clear of the frame edges to avoid pinching.

Important Note on Gas Lift Operation:

The gas lift pistons are designed to function optimally under the weight of a mattress. When first assembled or if the mattress is not yet placed on the frame, the pistons may be stiff and difficult to compress by hand. It is normal and expected that significant force may be required to lower the bed frame initially, especially without the mattress. Always ensure the mattress is on the frame before attempting to lower it, and apply firm, even pressure.

6. Maintenance

- **Cleaning:** For the upholstered fabric, gently spot clean with a damp cloth and mild detergent if necessary. Avoid harsh chemicals.
- **Hardware Check:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten if any looseness is detected to maintain stability and prevent squeaking.
- **Gas Lifts:** The hydraulic pistons are generally maintenance-free. Do not attempt to lubricate or disassemble them.

7. Troubleshooting

7.1. Gas Lift Mechanism Not Lowering

If the bed frame's mattress platform does not lower easily after lifting:

- **Mattress Weight:** Ensure your mattress is placed on the bed frame. The gas lift pistons are designed to work with the weight of a mattress. Without the mattress, they will be very stiff and difficult to push down.
- **Initial Use:** For the first few uses, the gas lifts may require more force to compress. Apply firm, even pressure to lower the platform.
- **Obstructions:** Check for any objects or bedding that might be obstructing the mechanism or preventing the platform from fully closing.
- **Assembly Check:** Verify that all parts of the gas lift mechanism were assembled correctly according to the instructions.

7.2. Squeaking Noises

If the bed frame produces squeaking noises:

- **Tighten Bolts:** Re-tighten all assembly bolts and screws. Loose connections are a common cause of squeaking.
- **Slat Placement:** Ensure all wooden slats are correctly seated in their holders and evenly spaced.

8. Specifications

Attribute	Detail
Brand	Zinus
Model Number	EU-FPPST2-12G
Color	Dark Grey
Product Dimensions (L x W x H)	205 x 165 x 87.8 cm
Weight	41 Kilograms
Maximum Weight Capacity	318 Kilograms (700 lbs)
Material	Wood, Metal, Upholstered Fabric
Special Features	Easy to install, Squeak-resistant, Solid construction, Gas lift storage
Compatible Mattress Size	160 x 200 cm (Queen)

9. Warranty Information

This Zinus Maddon Ottoman Gas Lift Bed Frame comes with a **5-year limited warranty**. Please refer to the warranty documentation included with your product for specific terms and conditions. Keep your proof of purchase for warranty claims.

10. Customer Support

For any questions, concerns, or assistance with your Zinus Maddon Ottoman Gas Lift Bed Frame, please contact Zinus customer support. Contact information can typically be found on the Zinus official website or in the documentation provided with your purchase.
