Zinus Maddon Ottoman Gaslift Storage Bed Frame 120x190cm User Manual

Model: EU-FPPST2-12J

1. INTRODUCTION

Thank you for choosing the Zinus Maddon Ottoman Gaslift Storage Bed Frame. This manual provides essential information for the safe assembly, operation, maintenance, and troubleshooting of your new bed frame. Please read these instructions thoroughly before assembly and retain them for future reference.

2. SAFETY INFORMATION

Your safety is paramount. Please adhere to the following safety guidelines:

- **Weight Capacity:** Do not load the bed frame with more than 318 kg (700 lbs). Exceeding this limit can lead to instability or collapse.
- **Assembly:** Read and follow all assembly instructions carefully. Incorrect assembly can compromise the structural integrity of the bed frame.
- **Sharp Edges:** Exercise caution when handling components during assembly to avoid injury from sharp edges.
- **Children and Pets:** Keep children and pets away from the assembly area. The gas lift mechanism should only be operated by adults.
- **Moving Parts:** Be aware of pinch points when operating the gas lift mechanism. Ensure hands and fingers are clear

before lowering the mattress platform.

- **Maintenance:** Regularly inspect all bolts and connections to ensure they remain tight. Loose connections can affect stability.

3. PACKAGE CONTENTS

Before beginning assembly, verify that all parts, tools, and instructions are present. All necessary components are efficiently packaged and typically located within the zippered compartment of the headboard.

4. SETUP AND ASSEMBLY INSTRUCTIONS

Assembly of your Zinus Maddon bed frame is designed to be straightforward and can typically be completed in under an

hour with the assistance of a friend. Follow the step-by-step instructions provided in the separate assembly guide included with your package.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface to prevent scratches.
2. **Identify Parts:** Match each component with the parts list in your assembly guide.
3. **Follow Steps:** Adhere strictly to the sequence of steps outlined in the assembly guide. Do not overtighten bolts until instructed.
4. **Secure Connections:** Ensure all bolts and fasteners are securely tightened once assembly is complete.

5. OPERATING INSTRUCTIONS (GASLIFT STORAGE)

The Zinus Maddon bed frame features a hydraulic gas lift mechanism for convenient under-bed storage access. This

mechanism allows you to lift the mattress platform with ease, without needing to remove the mattress.

- **To Open:** Stand at the foot or side of the bed. Firmly grasp the edge of the mattress platform (or the designated handle if present) and lift upwards. The hydraulic pistons will assist in raising the platform smoothly.
- **To Close:** Gently push the mattress platform downwards. The gas springs will offer resistance, allowing for a controlled descent. Ensure no objects or body parts are in the path of the closing platform.
- **Storage Capacity:** Utilize the spacious area beneath the bed for storing items such as bedding, seasonal clothing, luggage, or storage boxes.

6. MAINTENANCE

Proper maintenance will ensure the longevity and continued performance of your Zinus Maddon bed frame.

- **Cleaning:** For the upholstered fabric, gently spot clean with a damp cloth and mild detergent. Avoid harsh chemicals. Vacuum regularly to remove dust and debris.
- **Hardware Check:** Periodically (e.g., every 3-6 months), check all bolts and screws to ensure they are tight. Loose connections can lead to instability and wear.
- **Gas Lift Mechanism:** The hydraulic pistons are designed for long-term use. If the mechanism feels stiff or difficult to operate, refer to the troubleshooting section. Do not attempt to lubricate the pistons unless specifically instructed by Zinus support.

- **Slats:** Ensure the wooden slats are properly seated and undamaged. Replace any broken slats immediately to maintain mattress support.

7. TROUBLESHOOTING

If you encounter issues with your Zinus Maddon bed frame, consult the following common solutions:

Problem	Possible Cause	Solution
Gas lift mechanism is difficult to close or open.	New gas pistons may be stiff; air pressure needs to equalize.	Lift the bed base firmly several times to help "empty" the gas pistons and allow them to operate more smoothly. Ensure the mattress is on the frame when testing, as the weight is needed for proper operation.
Bolts become loose over time.	Normal wear and vibration.	Regularly check and retighten all assembly bolts using the provided Allen key or appropriate tool.

Problem	Possible Cause	Solution
Bed frame feels unstable or wobbly.	Loose connections or incorrect assembly.	Verify all bolts are securely tightened. Review the assembly instructions to ensure all steps were followed correctly.
Slats are breaking or sagging.	Excessive weight or improper mattress support.	Ensure the total weight on the bed (mattress + occupants) does not exceed 318 kg. Contact Zinus support for replacement slats if necessary.

8. SPECIFICATIONS

Feature	Detail
Brand	Zinus
Model Number	EU-FPPST2-12J
Colour	Dark Grey
Product Dimensions (L x W x H)	195.4 cm x 125 cm x 87.8 cm (Overall)
Bed Frame Height	31 cm (from floor to top of frame)
Under-frame Clearance	28 cm
Maximum Weight Capacity	318 Kilograms (700 lbs)
Material	Metal, Wood, Fabric Upholstery
Special Feature	Ottoman Gaslift Storage
Included Components	Headboard, Foundation, Slats
Compatible Mattress Size	120x190 cm (Queen size equivalent for some regions)
