## 2. SAFETY INFORMATION

To reduce the risk of fire, electric shock, or injury, please observe the following safety precautions:

- Always unplug the air purifier before moving, cleaning, or performing any maintenance.
- Do not operate the unit with a damaged cord or plug.
- Keep the air purifier away from water or other liquids.
- Do not insert fingers or foreign objects into the air inlets or outlets.
- Ensure the unit is placed on a stable, level surface.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

## 3. PRODUCT OVERVIEW

---

### 3.1 Components

The CUCKOO Air Purifier features a robust design with essential components for effective air purification.

- **Main Unit:** Houses the fan, motor, and control panel.
- **Filter System:** Consists of a Pre-Filter, H13 True HEPA Filter, and Activated Carbon Filter.
- **Control Panel:** Top-mounted interface for operating the unit.
- **Air Quality Sensor:** Detects real-time air pollution levels.

## 4. SETUP

---

### 4.1 Unpacking

Carefully remove the air purifier from its packaging. Ensure all packing materials are removed before operation.

### 4.2 Filter Installation

The air purifier comes with a True HEPA H13 filter. Before first use, ensure the filter is properly installed and any protective packaging is removed from the filter itself.

1. Unscrew the base cover of the air purifier.
2. Remove the new filter from its sealed plastic bag.
3. Insert the filter into the unit, ensuring it is seated correctly.
4. Replace and secure the base cover.

Figure 4: H13 True HEPA Filter

### 4.3 Placement

Place the air purifier on a firm, level surface. For optimal performance, ensure there is adequate space around the unit for air circulation. It is ideal for home offices, small bedrooms, and kids' rooms, covering up to 1,109 square feet.

# Ideal for Home Offices

Up to 231 ft<sup>2</sup> of AHAM Verified Coverage

## 5. OPERATING INSTRUCTIONS

### 5.1 Power On/Off

Press the power button ( ) on the control panel to turn the unit on or off.

### 5.2 Modes and Fan Speed

The air purifier offers various modes and fan speed settings to suit your needs.

- **Auto Mode:** The smart dust sensor detects the pollution status of the air in real-time and automatically adjusts the fan speed accordingly.
- **Sleep Mode:** Designed for quiet operation, this mode slows down the fan speed and dims the lights for a calm ambiance, ideal for nighttime use.
- **Manual Fan Speed:** Adjust the fan speed manually to your preferred level.

## Peaceful Sleep Mode

With a dimmed display and slower speed,  
enjoy a quiet night.

Figure 6: Peaceful Sleep Mode

### 5.3 Air Quality Indicator

The 4-color LED display indicates the cleanliness of indoor air based on the dust sensor readings:

- **Blue:** Excellent Air Quality
- **Green:** Good Air Quality
- **Orange:** Moderate Air Quality
- **Red:** Poor Air Quality

# LED Air Quality Sensor

Monitors air quality throughout the day, automatically adjusting purification to the required level.

## 6. MAINTENANCE

### 6.1 Filter Replacement

The air purifier is equipped with a filter replacement indicator that alerts you when replacements are needed. It is recommended to replace the filter every 6-12 months, depending on usage and air quality.

1. When the filter replacement indicator lights up, it's time to replace the filter.
2. Unplug the unit and unscrew the base cover.

3. Remove the old filter and dispose of it properly.
4. Install a new CUCKOO True HEPA H13 filter (Model: CAC-AB0610FI-FILTER, sold separately).
5. Replace the base cover.
6. Press and hold the filter reset button for 3 seconds to reset the filter indicator.

## Filter Replacement Indicator

Filter change indicator alerts you when replacements are needed.

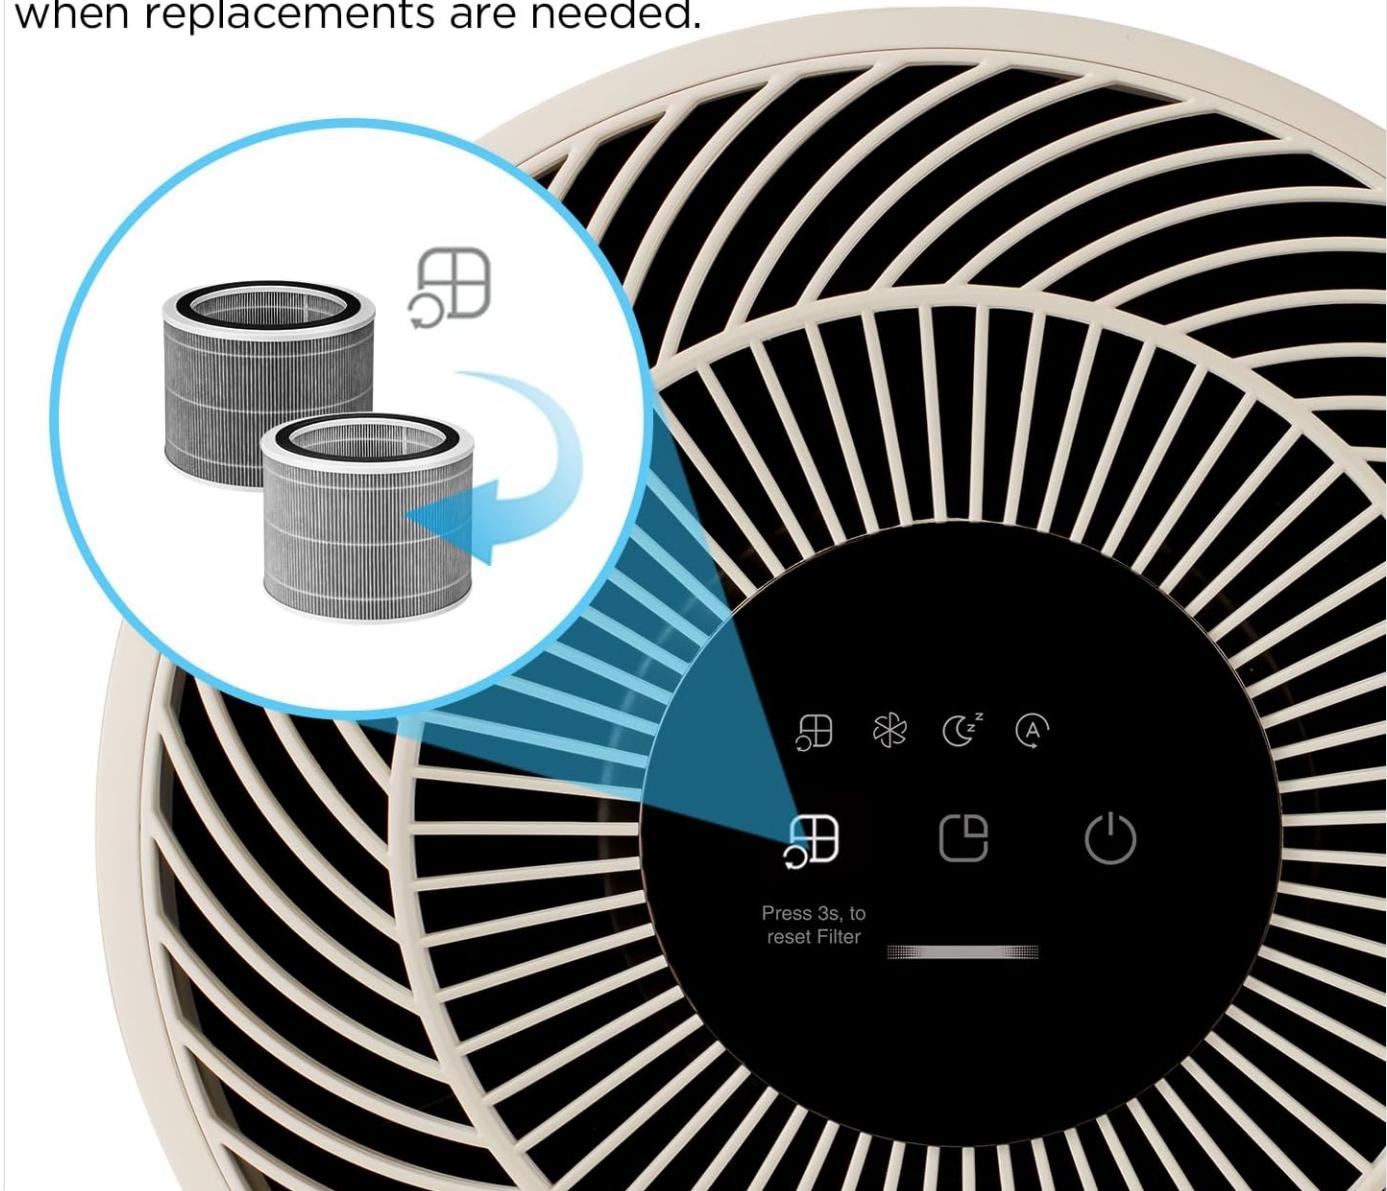

Figure 8: Filter Replacement Indicator

### 6.2 Cleaning

Regular cleaning helps maintain optimal performance.

- Wipe the exterior of the unit with a soft, dry cloth.
- The pre-filter can be gently cleaned with a soft brush or vacuum cleaner to remove large dust particles. Do not wash the HEPA or Activated Carbon filters.

## 7. TROUBLESHOOTING

If you encounter issues with your air purifier, refer to the table below for common problems and solutions.

Problem	Possible Cause	Solution
Unit does not turn on.	Not plugged in; Power outage; Damaged cord.	Ensure power cord is securely plugged in; Check power supply; Contact customer support if cord is damaged.
Poor air purification.	Dirty filter; Incorrect filter installation; Room size too large.	Clean or replace filter; Reinstall filter correctly; Ensure unit is suitable for room size (up to 1,109 sq. ft.).
Unusual noise.	Obstruction in fan; Unit not on a level surface.	Check for foreign objects and remove; Place unit on a stable, flat surface.
Filter replacement indicator remains on after replacement.	Filter reset not performed.	Press and hold the filter reset button for 3 seconds until the light turns off.
