INSTALLATION

The JFG RACING Motorcycle Kickstand Assembly is designed for straightforward installation. No drilling is required for mounting.

Installation Steps:

1. Ensure your motorcycle is securely supported on a stand or by another person before beginning installation.
2. Identify the mounting points on the swingarm of your Light Bee Sur-Ron X/S.
3. Position the kickstand assembly against the swingarm, aligning the mounting holes.
4. Securely attach the kickstand assembly to the swingarm. **Note:** This product does not include mounting screws. You will need to acquire appropriate screws to fit your Sur-Ron LBX model for proper installation.
5. Ensure all connections are firm and stable before use.
6. Test the kickstand's deployment and retraction to confirm smooth operation and secure standing.

EASY TO INSTALL

The Motorcycle Sur Ron Rear Kickstand Assembly is no drilling required. Attaches firmly and easily to the swingarm.

Image: Graphic emphasizing the ease of installation, highlighting that no drilling is required and it attaches firmly to the swingarm.

OPERATION

To use the kickstand, simply deploy it downwards until it firmly contacts the ground. Ensure the motorcycle is tilted correctly to achieve a stable and secure standing position. When ready to ride, retract the kickstand fully to prevent interference with vehicle operation.

MAINTENANCE

Regular maintenance will prolong the life and ensure the reliable operation of your kickstand assembly.

- **Cleaning:** Periodically clean the kickstand to remove dirt, mud, and road grime. Use a mild detergent and water, then dry thoroughly.
- **Inspection:** Regularly inspect the kickstand for any signs of damage, bending, cracks, or excessive wear. Check the spring for proper tension and ensure it is not stretched or broken.
- **Fastener Check:** Verify that all mounting screws are tight and secure. Re-tighten if necessary.
- **Lubrication:** Apply a small amount of general-purpose lubricant to the pivot points and spring mechanism to ensure smooth operation and prevent corrosion.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Kickstand is loose or wobbly after installation.	Mounting screws are not tight enough or incorrect screws used.	Ensure correct and appropriately sized screws are used. Tighten all mounting screws securely.
Kickstand does not deploy or retract smoothly.	Lack of lubrication at pivot points or debris accumulation.	Clean the pivot points and spring mechanism. Apply lubricant to ensure smooth movement.
Motorcycle is unstable when parked on kickstand.	Improper installation or damaged kickstand.	Re-check installation steps. Inspect kickstand for any damage or bending. Replace if damaged.
