- **Up/Down Buttons:** Adjust microphone volume or other settings.
- **USB Micro Charging Port:** Located at the bottom for recharging the microphone's internal battery.

## Remote Control

The included remote control provides convenient access to various functions. Note that the remote control labels may be in Chinese. Refer to the main unit's display and buttons for corresponding functions.

## SETUP

### 1. Charging the Unit and Microphone

1. **Main Unit:** Connect the provided 15V-2A charger to the "DC 15V Power In" port on the rear of the main unit. Plug the charger into a power outlet. The unit will indicate charging status on its display.
2. **Wireless Microphone:** Connect the microphone USB charging cable to the USB Micro charging port at the bottom of the microphone. Connect the other end to a USB power source (e.g., a computer USB port or a USB wall adapter). The microphone will indicate charging status.

*Note: Fully charge both devices before first use for optimal battery life. The main unit's 4400mAh lithium battery provides approximately 6-8 hours of playtime.*

## 2. Powering On

Flip the On/Off switch on the rear panel of the main unit to the "On" position. The display will light up. Press the On/Off button on the wireless microphone to power it on.

## OPERATING INSTRUCTIONS

### 1. Connecting via Bluetooth

1. Ensure the SHIDU T7 unit is powered on.
2. On your smartphone or other Bluetooth-enabled device, navigate to the Bluetooth settings.
3. Search for available devices and select "SHIDU T7" (or similar name) from the list.
4. Once connected, the unit's display will indicate a successful Bluetooth connection.
5. You can now play audio from your device through the SHIDU T7 speaker.

## 3. Using the Wireless Microphone

1. Ensure the microphone is charged and powered on. It will automatically connect to the main unit via UHF wireless.
2. Adjust the microphone volume using the dedicated dial on the top of the main unit or the Up/Down buttons on the microphone.
3. Experiment with the **Voice Presets** (Baby, Lady, Man, Aged) and **Sound Effects** (Cheer, Clap, Whistle) buttons on the top panel for various vocal enhancements.

Figure 9: The UHF wireless microphone offers a stable connection up to 15 meters.

## 4. Adjusting Sound Settings

- **Speaker Volume:** Use the main speaker volume dial on the top panel to adjust the overall output volume.
- **Equalizer Presets:** Rotate the Equalizer Dial on the front panel to select from different sound modes:
  - **Standard:** General audio playback.
  - **Pro:** Enhanced professional sound.
  - **MC:** Optimized for vocal clarity.
  - **Acoustic:** Natural sound reproduction.
  - **Popular:** Boosted bass and treble for popular music.

## MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the exterior of the unit and microphone. Do not use liquid cleaners or abrasive materials.
- **Storage:** Store the unit in a cool, dry place away from direct sunlight and extreme temperatures.

- **Battery Care:** To prolong battery life, avoid fully discharging the unit and microphone frequently. Recharge them regularly, even if not in use for extended periods.

## TROUBLESHOOTING
