ASSEMBLY INSTRUCTIONS

The KOMFOTT Folding Bed is designed for quick and straightforward assembly. Most components come pre-assembled. Follow these steps to prepare your bed for use:

1. **Unpack the Bed:** Carefully remove the bed from its packaging. The bed will arrive in a folded position with the mattress secured.
2. **Extend Center Legs:** While the bed is still folded, locate and extend the center support legs. These legs provide additional stability when the bed is fully open.
3. **Attach Wheels:** Attach the four wheels (A*4) to the designated points on the frame. Ensure the crossbars (E*2) are placed between the casters with the flat side of the leg facing up. Use the provided bolts (B*4) and wrench (G*1) to tighten them securely. Do not overtighten by hand; use the wrench for proper fastening.
4. **Unfold the Bed:** Release the plastic holders (C*4) that secure the folded bed. Gently unfold the bed until it lies flat.
5. **Pull Out Support Legs:** Pull out the support legs at both ends of the bed completely outward until they lock into position.
6. **Secure Frame to Support:** Use the two connectors (F*2) to connect the main frame to the support legs, ensuring a stable and secure setup.
7. **Position Mattress:** The mattress is already on the frame. Adjust it to ensure it lies flat and evenly across the bed base.

CARE AND MAINTENANCE

- **Mattress Care:** The mattress cover is removable for cleaning. It is recommended to dry clean the mattress cover only. Do not machine wash or tumble dry to prevent damage.
- **Frame Care:** Wipe the steel frame with a damp cloth and mild detergent as needed. Ensure the frame is completely dry before folding or storing.
- **Regular Inspection:** Periodically check all bolts, screws, and connections to ensure they are tight and secure. Tighten any loose fasteners to maintain stability.
- **Storage:** When not in use, store the folded bed in a dry, cool place away from direct sunlight and extreme temperatures to prolong its lifespan.

TROUBLESHOOTING

- **Bed feels unstable or wobbly:** Ensure all support legs are fully extended and locked. Check that all bolts and connectors are securely tightened. Verify the bed is placed on a flat, even surface.
- **Wheels not rolling smoothly:** Check for any debris or obstructions in the wheels. Ensure the

wheels are properly attached and tightened.

- **Difficulty folding/unfolding:** Ensure all support legs are properly folded/extended before attempting to fold/unfold the main frame. Do not force the mechanism; check for any obstructions.
- **Squeaking noises:** Inspect the frame for any loose connections and tighten them. Applying a small amount of lubricant to hinge points may also help.
