## OLEVS 6898GD007Men

# OLEVS Men's Quartz Watch Model 6898GD007Men Instruction Manual

Model: 6898GD007Men

## 1. INTRODUCTION

---

Thank you for choosing the OLEVS Men's Quartz Watch Model 6898GD007Men. This timepiece combines classic design with reliable Japanese quartz movement, offering precise timekeeping and a convenient day and date display. This manual provides essential information for setting up, operating, and maintaining your watch to ensure its longevity and optimal performance.

## 2. SETUP

---

### 2.1 Setting the Time and Date

1. **Pull out the crown:** Gently pull the crown (the knob on the side of the watch) to the first click position.
2. **Set the date:** Rotate the crown clockwise or counter-clockwise to adjust the date. Adjust until the correct date is displayed.
3. **Pull out the crown further:** Pull the crown to the second click position. The second hand will stop.
4. **Set the time:** Rotate the crown to set the hour and minute hands. To ensure the AM/PM is correctly set for the date change, advance the time until the date changes (this indicates midnight). Then, set the current time.
5. **Push in the crown:** Once the time and date are set, push the crown back into its normal position to start the watch.

## 2.2 Adjusting the Bracelet

The stainless steel bracelet can be adjusted by adding or removing links to achieve a comfortable fit. This procedure typically requires specialized tools and is best performed by a qualified watch technician to avoid damaging the bracelet or watch.

## 3. OPERATING THE WATCH

---

### 3.1 Timekeeping

Your OLEVS watch is powered by an imported Japanese Quartz Movement, ensuring accurate timekeeping. The watch operates continuously once the crown is pushed in after setting the time.

### 3.2 Luminous Display

The watch features HD luminous hands and markers, allowing for clear readability in low-light conditions. Exposure to light will charge the luminous material, making it glow in the dark.

Figure 3: The watch displaying its luminous features in low light.

## 4. MAINTENANCE

---

### 4.1 Water Resistance

This watch is rated for 30 meters (3ATM) water resistance. This means it can withstand daily splashes, rain, or brief immersion in water. However, it is **not suitable** for showering, swimming, diving, or snorkeling. Avoid operating the crown while the watch is wet or submerged to prevent water intrusion.

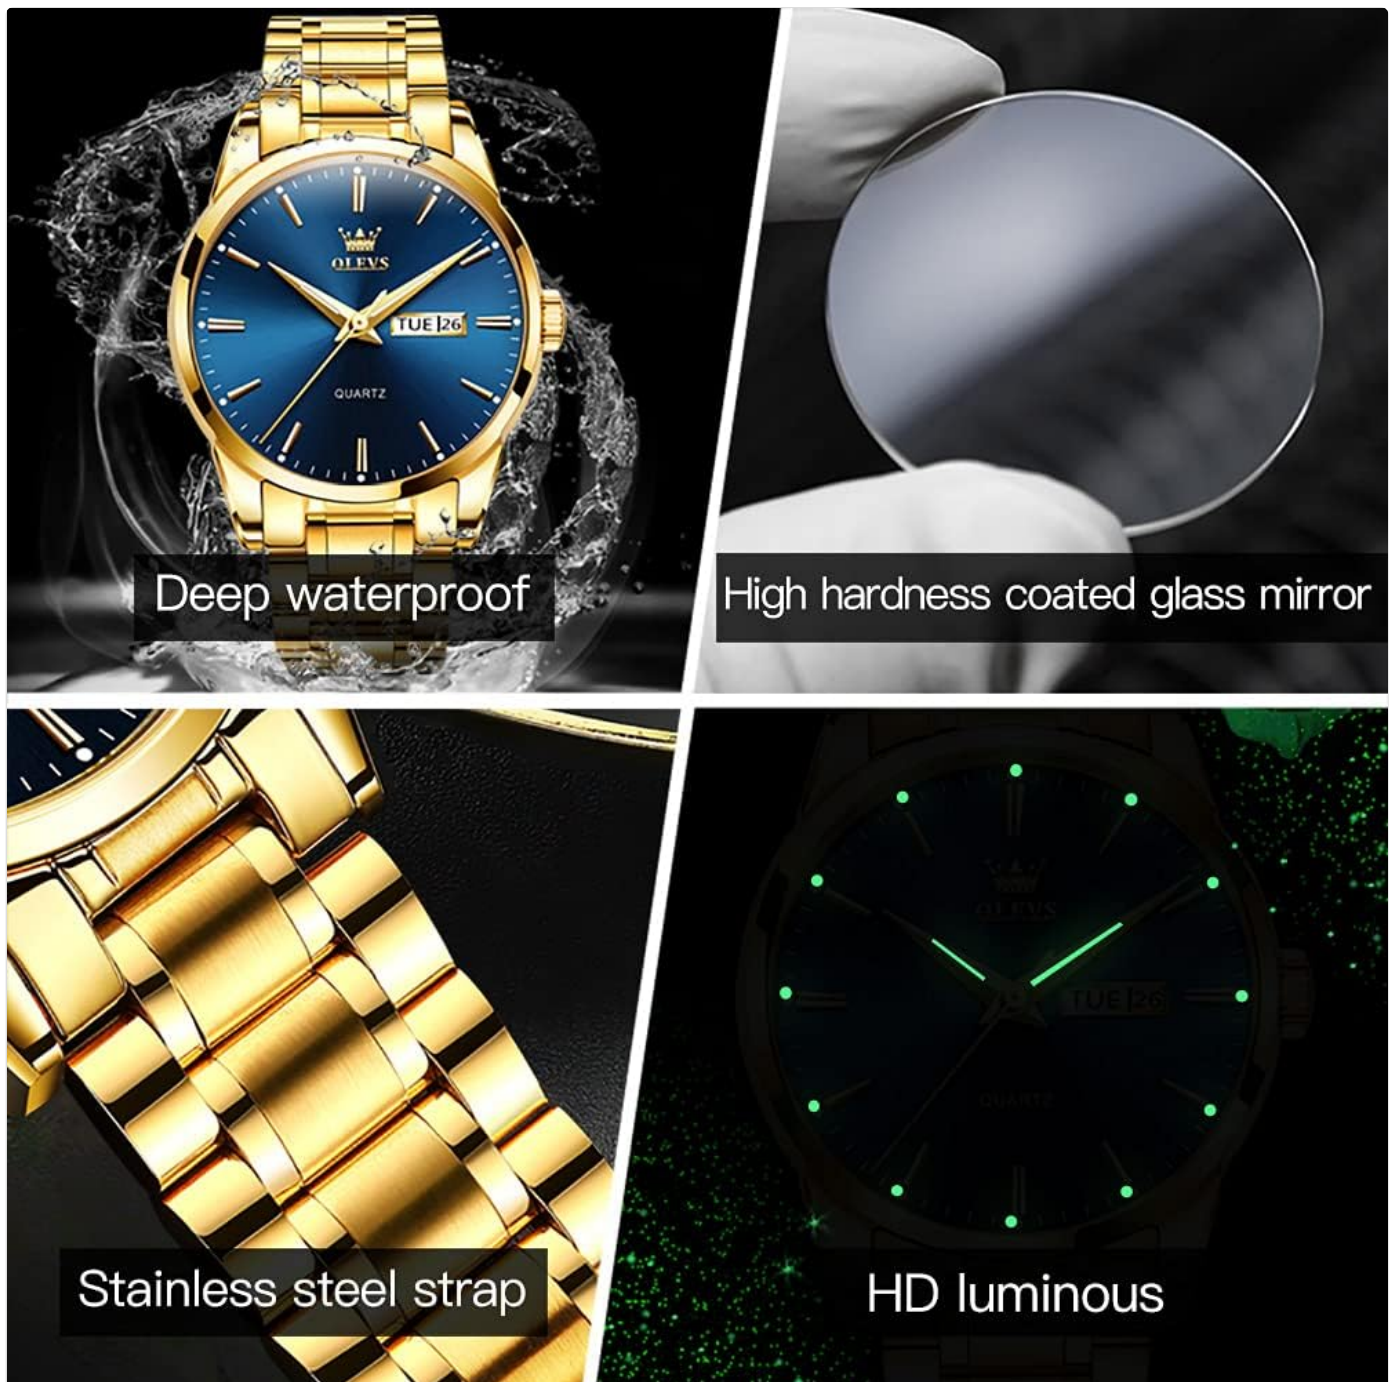

Figure 4: The watch demonstrating its water resistance.

## 4.2 Cleaning

To clean your watch, wipe it gently with a soft, dry cloth. For the stainless steel band, a slightly damp cloth can be used, followed by immediate drying. Avoid using harsh chemicals or abrasive materials, as these can damage the watch's finish or crystal.

## 4.3 Battery Replacement

The watch is powered by a battery, which typically lasts for more than 2 years. When the battery needs replacement, it is recommended to take the watch to a professional watchmaker to ensure proper sealing and to maintain its water resistance.

## 5. TROUBLESHOOTING

---

- **Watch not running:** Check if the crown is fully pushed in. If the watch still does not run, the battery may need replacement.
- **Incorrect time/date:** Refer to Section 2.1 to reset the time and date. Ensure the crown is fully pushed in after adjustment.
- **Condensation under crystal:** This may indicate a loss of water resistance. Avoid further contact with water and seek

professional service immediately.

## 6. SPECIFICATIONS

| Feature                | Specification               |
|------------------------|-----------------------------|
| Brand Name             | OLEVS                       |
