1. Introduction

Thank you for choosing the Harper & Bright Designs Twin Over Twin Bunk Bed. This manual provides detailed instructions for the safe assembly, proper use, and ongoing maintenance of your new bunk bed. Please read all instructions thoroughly before beginning assembly and retain this manual for future reference.

This versatile bunk bed is designed to maximize space and comfort, featuring a twin-over-twin configuration, integrated stairs with storage, and a convenient pull-out trundle bed. Its solid wood construction ensures durability and stability for years of use.

2. Safety Information

Your safety and the safety of others are paramount. Please adhere to the following safety guidelines:

- **Maximum Weight Capacity:** The upper and bottom beds have a weight capacity of 200 lbs each. The trundle bed has a weight capacity of 175 lbs. Do not exceed these limits.
- **Guardrails:** Always ensure full-length guardrails are properly installed on the upper bunk.
- **Mattress Size:** Use only twin-size mattresses that comply with the bed's dimensions. Ensure the mattress thickness on the upper bunk is below the top of the guardrails.
- **Assembly:** Assembly requires careful attention. It is recommended to have two people for assembly. Ensure all hardware is securely tightened before use. Periodically check and re-tighten all connections.
- **No Jumping:** Do not allow jumping on the bed.
- **Children's Safety:** For younger children, especially toddlers, the lower bunk is recommended due to its proximity to the floor.

- **Ventilation:** Ensure adequate ventilation around the bed.
- **Choking Hazard:** Keep small parts and packaging materials away from children during assembly.

Be cautious during assembly and ensure proper installation of all components for safety.
