

XTRONS IAP92M211S

XTRONS Android 13 Car Stereo User Manual

FOR MERCEDES-BENZ E-CLASS W211 / CLS-CLASS W219 (MODEL IAP92M211S)

[Introduction](#) [Compatibility](#) [Features](#) [Accessories](#) [Installation](#) [Operation](#) [Specifications](#) [Troubleshooting & Support](#)

1. INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your XTRONS Android 13 Car Stereo. Please read this manual thoroughly before using the product to ensure correct usage and optimal performance. Keep this manual for future reference.

2. APPLICABLE MODELS AND COMPATIBILITY NOTES

This XTRONS car stereo is designed for specific Mercedes-Benz models and years:

- **Mercedes-Benz E-Class W211:** E200, E220, E240, E270, E280 (Model Years: 2002-2008)
- **Mercedes-Benz CLS-Class W219:** CLS-350, CLS-500, CLS-55 (Model Years: 2005-2006)

Important Compatibility Notes:

- Ensure your car's central console is a trapezoidal central console with a trim strip above before purchasing. This unit will **NOT** fit if your console differs.
- If your vehicle has a screen above the center console, this unit will **NOT** fit.
- Your original CD changer will **NOT** work after installing this unit.
- This unit does **NOT** support your vehicle's air conditioning information display.

6. OPERATING INSTRUCTIONS

This section covers the basic operation of your XTRONS Android 13 Car Stereo.

6.1 Power On/Off and Basic Navigation

Press the power button on the unit to turn it on or off. The intuitive touchscreen interface allows for easy navigation through menus and applications. Swipe left or right to access different screens and tap icons to open applications.

6.2 Changing UI Themes

The unit supports changeable UI themes. Navigate to the settings menu to select and apply your preferred theme. This allows for personalization of the interface layout and appearance.

Your browser does not support the video tag.

Video: Demonstrates the XTRONS car stereo's features, including UI themes, 4G connectivity, CarPlay, Android Auto, DSP, and screen mirroring.

6.3 4G Connectivity

To use 4G connectivity, insert a Micro-SIM network card into the designated slot. Once inserted, the unit will automatically detect the network. Ensure your SIM card is active and has a data plan. You can also share your mobile network via USB tethering by connecting your phone and configuring tethering in your phone's settings.

6.4 Wireless CarPlay and Android Auto

The unit supports both Wireless CarPlay and Wireless/Wired Android Auto. Connect your iPhone or Android phone to the unit via Bluetooth for wireless connection. For wired Android Auto, connect your Android phone using a USB cable. Once connected, you can access compatible apps, navigation, music, and use voice commands (Siri for CarPlay, Google Assistant for Android Auto).

6.5 Digital Sound Processor (DSP)

Access the DSP settings to fine-tune your audio experience. Adjust parameters such as balance, delay, filter settings, and a multi-band equalizer to achieve your desired sound profile. You can also control subwoofer output and other advanced audio features.

6.6 GPS Navigation

The unit comes with pre-installed GPS capabilities. You can use various Android-compatible navigation applications such as Google Maps, Sygic, or Waze. Ensure the GPS antenna is properly installed for accurate positioning.

6.7 Radio Operation

The built-in radio features RDS (Radio Data System) for enhanced information display. Tune into your favorite FM/AM stations. The RDS feature provides additional information like station name, program type, and traffic announcements where available.

6.8 Screen Mirroring

Utilize the screen mirroring function to display your smartphone's screen directly on the car stereo. This feature is ideal for viewing videos, photos, or other content from your phone on a larger display.

7. MAINTENANCE

To ensure the longevity and optimal performance of your XTRONS car stereo, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. Avoid abrasive cleaners or solvents that may damage the surface.
- **Software Updates:** Periodically check for software updates from XTRONS to ensure you have the latest features and bug fixes. Follow the instructions provided with the update carefully.
- **Temperature:** Avoid exposing the unit to extreme temperatures, both hot and cold, as this can affect performance and lifespan.
- **Power:** Ensure the vehicle's electrical system is stable. Fluctuations can potentially harm the unit.

8. TROUBLESHOOTING

If you encounter issues with your XTRONS car stereo, refer to the following common problems and solutions:

- **No Power:** Check all power connections and fuses. Ensure the vehicle's ignition is on.
- **No Sound:** Verify speaker connections. Check volume levels and DSP settings. Ensure the correct audio source is selected.
- **GPS Not Working:** Ensure the GPS antenna is properly connected and has a clear view of the sky. Check GPS settings in the unit.
- **Bluetooth Connection Issues:** Ensure Bluetooth is enabled on both the unit and your phone. Delete previous pairings and try reconnecting.
- **CarPlay/Android Auto Not Connecting:** For wireless connections, ensure Bluetooth and Wi-Fi are active on your phone. For wired Android Auto, try a different USB cable. Check phone settings for permissions.
- **Poor Radio Reception:** Check the radio antenna connection. Ensure the antenna adapter is correctly installed.
- **Unit Freezes/Slow Performance:** Restart the unit. If the problem persists, perform a factory reset (note: this will erase all user data and settings).

If these steps do not resolve the issue, please contact XTRONS customer support for further assistance.

9. PRODUCT SPECIFICATIONS

Feature	Specification
Display Size	9 Inches
Resolution	720 x 1280
Operating System	Android 13
Processor	Octa Core
