## 1. IMPORTANT SAFETY INFORMATION

**Failure to follow these safety instructions may result in injury or damage to the product.**

- Install the cabinet on horizontal, stable surfaces. Irregular surfaces can cause stress, deformation, and mechanism failure.
- Avoid placing wet or hot objects directly on the cabinet surfaces. Clean any spills immediately with a soft, absorbent, slightly damp cloth.
- This furniture is not designed for outdoor installation.
- The cabinet is designed to withstand normal humidity levels (steam, accidental splashes). Permanent exposure to high humidity will cause deterioration (swelling) and is not covered by warranty.
- To prevent serious injury or death from tipping or falling, the cabinet must be securely fixed to the wall.
- Wall mounting hardware (e.g., anchors, hooks, screws) provided may be indicative only. Always verify and replace hardware as needed based on your specific wall type and resistance. Consult a specialized professional for appropriate hardware selection.

### 3.1 Pre-Installation Checks

- Ensure the wall surface is clean, dry, and capable of supporting the cabinet's weight (approximately 17 kg).

## 4. OPERATION

---

### 4.1 Opening and Closing Doors

The cabinet doors feature a push-and-pull mechanism. To open, gently press the door panel until it

releases, then pull it open. To close, push the door panel until it clicks securely into place.

## 4.2 Using Open Compartments

The open compartments are designed for easy access storage or display of items. Ensure items placed in these compartments do not protrude excessively to avoid accidental dislodgement.

## 5. MAINTENANCE AND CARE

---

### 5.1 Cleaning Instructions

To clean the cabinet, use a soft, slightly damp cloth. Avoid abrasive cleaners, harsh chemicals, or excessive water, as these can damage the finish. Wipe dry immediately after cleaning.

### 5.2 General Care

- Regularly check the wall fixings to ensure the cabinet remains securely mounted.
- Avoid exposing the cabinet to direct sunlight for prolonged periods to prevent fading.
- Do not overload the shelves or doors, as this can cause structural stress.

## 6. TROUBLESHOOTING

---

### 6.1 Doors Not Closing Properly

- **Check Alignment:** Ensure the cabinet is installed on a perfectly horizontal and even surface. Uneven installation can cause doors to misalign.
- **Inspect Hinges:** Verify that the push-and-pull mechanisms and hinges are free from obstruction and properly engaged.
- **Re-check Wall Fixings:** Confirm the cabinet is securely mounted to the wall and has not shifted.

### 6.2 Cabinet Deformation or Swelling

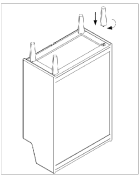

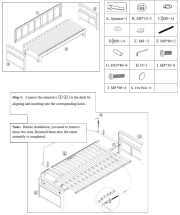

- **Humidity Exposure:** This typically indicates prolonged exposure to high humidity. Ensure the environment is suitable for furniture and avoid direct contact with water.
- **Uneven Installation:** As mentioned in safety, an uneven installation can cause stress leading to deformation.
