Logitech MX Mechanical Mini for Mac Wireless Illuminated Keyboard User Manual

Model: 920-010553 | Brand: Logitech

INTRODUCTION

The Logitech MX Mechanical Mini for Mac is a minimalist wireless illuminated keyboard designed for optimal feel, precision, and performance within the Apple ecosystem. Featuring low-profile mechanical switches, smart illumination, and multi-device connectivity, this manual provides essential information for setup, operation, and maintenance.

WHAT'S IN THE BOX

- Master Series MX Mechanical Wireless Illuminated Performance Keyboard
- USB-C to USB-C Charging Cable
- User Documentation

IN THE BOX

Figure 1: The keyboard and its included USB-C charging cable, as packaged in the box.

SETUP

Initial Charging

Before first use, ensure your keyboard is fully charged. Connect the supplied USB-C to USB-C cable to the keyboard's USB-C port and to a compatible power source (e.g., computer USB-C port, USB wall adapter). The LED indicator on the keyboard will show charging status.

Figure 2: Connecting the USB-C cable to the keyboard for charging.

Bluetooth Pairing

1. Turn on the keyboard using the power switch located on the top edge.
2. Press and hold one of the Easy-Switch keys (F1, F2, or F3) for three seconds until the LED light on the key starts blinking rapidly. This indicates the keyboard is in pairing mode.
3. On your Mac, iPad, or iPhone, go to Bluetooth settings and select "MX Mechanical Mini for Mac" from the list of available devices.
4. Follow any on-screen prompts to complete the pairing process. The LED on the Easy-Switch key will turn solid white for 5 seconds, then glow steadily.

USB-C TO USB-C RECHARGING

Figure 3: Easy-Switch keys (F1, F2, F3) allow seamless switching between up to three paired devices.

Note: If FileVault is enabled on your macOS computer, you might need to use the embedded keyboard for logging in at startup or reboot when connected via Bluetooth. Consider purchasing a Logi Bolt USB Receiver (not included) for a direct connection if this is a frequent issue.

OPERATING THE KEYBOARD

Tactile Quiet Mechanical Switches

The MX Mechanical Mini for Mac features Tactile Quiet mechanical switches. These switches provide a satisfying tactile bump that you can feel but barely hear, offering precise feedback, reactive key reset, and a fluid typing experience with minimal noise. This design is optimized for quiet work environments.

KEY LAYOUT FOR MAC

Figure 4: The keyboard's tactile mechanical switches provide a quiet yet responsive typing experience.

Smart Illumination

The keyboard's backlit keys automatically light up when your hands approach and adjust their brightness based on ambient lighting conditions. This feature helps conserve battery life while ensuring visibility in various environments.

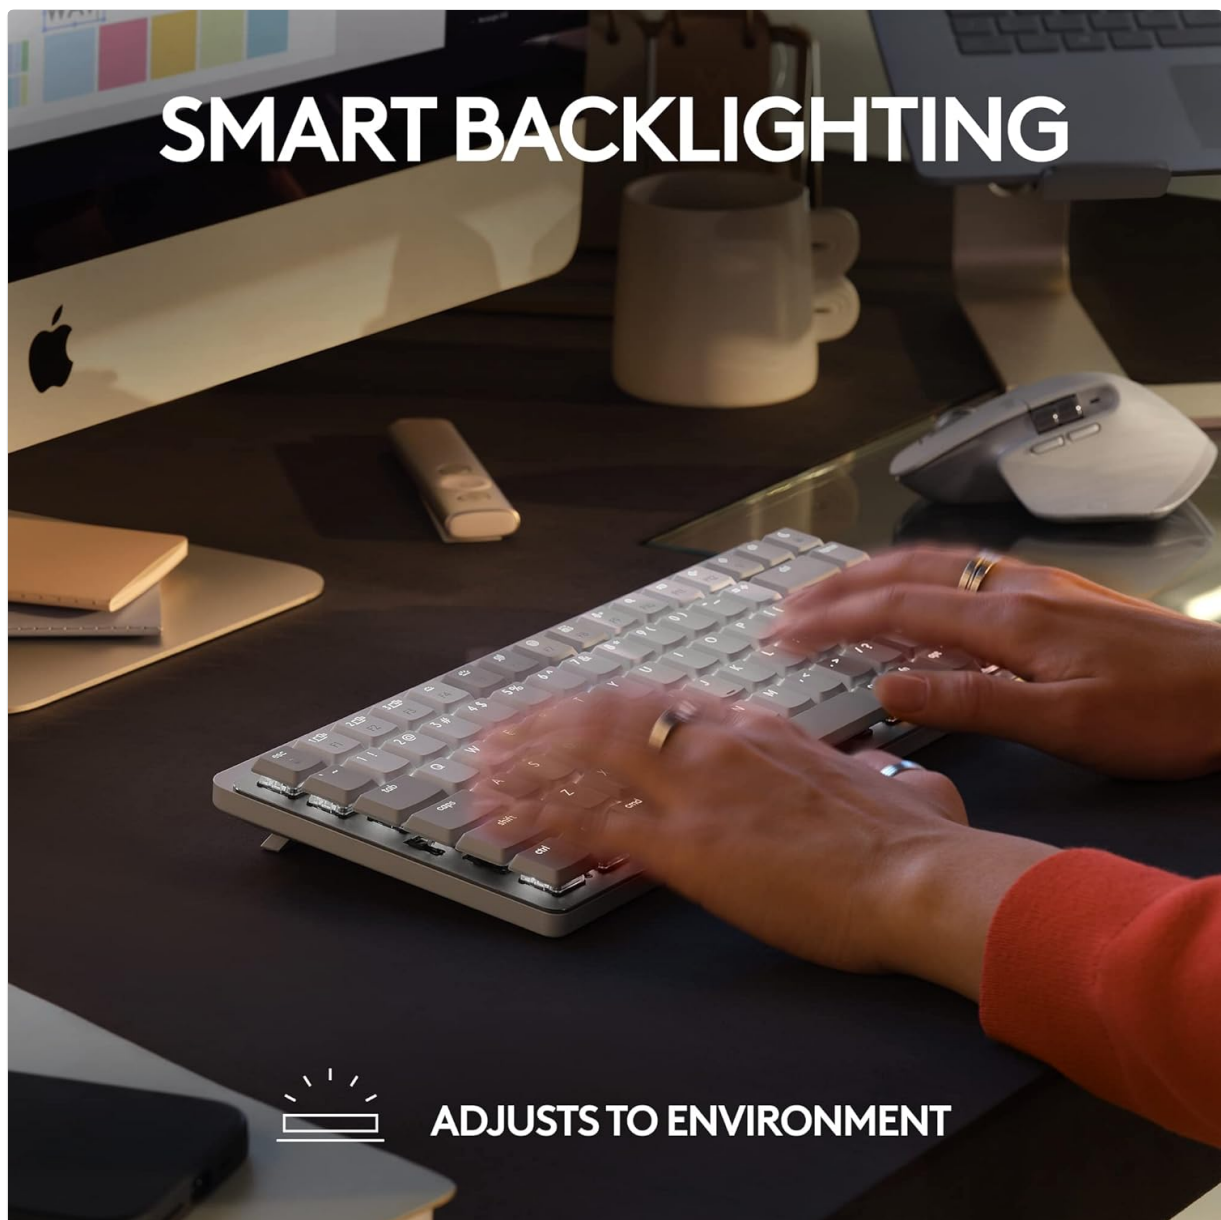

Figure 5: Smart backlighting illuminates keys as hands approach and adapts to ambient light.

Multi-Device Connectivity

Pair your keyboard with up to three Mac computers or iPads using Bluetooth Low Energy. Switch seamlessly between connected devices by simply pressing the corresponding Easy-Switch key (F1, F2, or F3).

Customization with Logi Options+

Enhance your workflow by customizing Fn keys, assigning backlighting effects, and enabling Flow cross-computer control (with a compatible MX Master 3S for Mac mouse) using the improved Logi Options+ software. This software is available for Windows and macOS.

EASY-SWITCH ACROSS APPLE ECOSYSTEM

Figure 6: The Logi Options+ software allows for advanced customization of keyboard functions and backlighting.

MAINTENANCE

Cleaning

To clean your keyboard, use a soft, lint-free cloth. For stubborn dirt, slightly dampen the cloth with water or a mild cleaning solution. Avoid harsh chemicals or abrasive materials. Do not immerse the keyboard in water.

Battery Life & Charging

The keyboard's rechargeable Li-Po (1500 mAh) battery can last up to 15 days on a full charge with backlighting turned on, or up to 10 months with backlighting turned off. Recharge using the provided USB-C to USB-C cable.

TROUBLESHOOTING

- **Keyboard not connecting:** Ensure the keyboard is turned on and fully charged. Check your device's Bluetooth settings to confirm the keyboard is paired. If already paired, try unpairing and re-pairing the

device.

- **Backlighting not working:** Ensure the smart illumination feature is enabled. Check ambient light conditions; the backlighting adjusts automatically. Low battery levels may also disable backlighting.
- **Typing issues with FileVault (macOS):** If FileVault is enabled, you might need to use your Mac's built-in keyboard to log in at startup or after a reboot. Consider using a Logi Bolt USB Receiver (not included) for a more reliable connection in such scenarios.
- **Customization issues:** Ensure you have the latest version of Logi Options+ software installed on your computer.

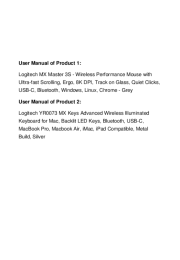

SPECIFICATIONS

Feature	Detail
Brand	Logitech
Model Number	920-010553
Connectivity	Bluetooth Low Energy
Key Switches	Low-Profile Mechanical (Tactile Quiet)
Illumination	Smart Backlighting
Battery Type	Rechargeable Li-Po (1500 mAh)
Battery Life	Up to 15 days (backlight on), 10 months (backlight off)
Charging Port	USB-C
Compatibility	macOS, iPadOS, iOS, Windows, Chrome OS, Linux
Dimensions (including keycaps)	26.10 x 312.60 x 131.55 mm (1 x 12.3 x 5.2 in)
Weight	612 g (21.6 oz)

WARRANTY AND SUPPORT

For warranty information and technical support, please refer to the user documentation included in the box or visit the official Logitech support website. You can also find additional resources and FAQs there.
